Re: Ballaghaderreen Landfill W0059-02

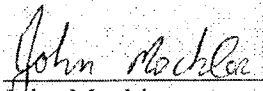

A Chara,

I refer to your letter of 27th July 2009 and your request for information relating to Article 9 of the Council Directive 1999/31/EC of 26 April 1999. I hereby submit the figure of 81000m³ as the total quantity of waste to be placed at the landfill (over the authorized life of the facility). The current rate of compaction for the facility is circa 0.8T/m³ which would translate to a capacity of circa 65000 tonnes.

The above figure was calculated using a topographical survey carried out in July 2009 and subtracting it, using ground modeling software, from the theoretical pre-settlement restoration contours approved with the agency. The above figures are approximate and have a tolerance of +/- 5000m³.

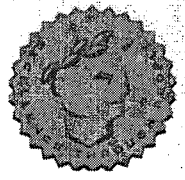

If you have any queries in relation to the information provided please do not hesitate to contact me.

Mise, le meas,

John Mockler,
Senior Executive Engineer,
087 9902378.

Ewa

Please find attached an image of the reply to your request for further information in accordance with Article 16(3)(a)(i) of the Waste Management Licensing Regulations 2004. The original is in the post for your file. I would be grateful if you could confirm by email your receipt of same.

As Senior Executive Engineer in charge of the Environment Department I am authorized to respond to this request. If you have any queries in relation to this submission please do not hesitate to contact me at 087-9902378

Many thanks

John Mockler S.E.E.
