Re: Notice under Article 16(3)(a)(i) of the Waste Management (Licensing) Regulations 2004.

Dear Ms. Babiarczyk,

I refer to your recent request under the above Regulations for information relating to the remaining capacity (in cubic metres) of this Council's landfill and wish to advise as follows:

1. The remaining capacity over the authorised life of the facility is 238,101 cubic metres, on 1<sup>st</sup> August 2009.
2. The remaining capacity was calculated using figures supplied by RPS Consulting who carried out a topographical survey of the landfill in January 2009. Based on this survey and the proposed final profile of the landfill the remaining void space was calculated at the end of January 2009 to be 249,003 m<sup>3</sup>. The total tonnage inputted between 1/2/09 and 31/7/09 was converted to cubic metres using a compaction rate of 0.76t/m<sup>3</sup> (this was based on a survey carried out by RPS Consulting in March 2009) and this amount was then deducted from the January 2009 figure giving a remaining void space of 238,101 cubic metres.

Yours sincerely,

Karl Cashen,  
Director of Services.
