Caroline,

As per our discussion, I list the figures as follows:

Capacity of landfill: 600,000 Tonnes.

570,000 Tonnes has been placed to date.

157,000 Tonnes was placed prior to Authorisation circa. Mar 2000

413,000 Tonnes has been placed since then.

Remaining capacity at landfill is 30,000 Tonnes.

Regards,
 Michael.

Importance: High

Dear Michael,

As per earlier phone conversation I am contacting you in relation to the Notice sent to Westmeath County Council by Ewa Babiarczyk on the 27th July 2009, regarding Ballydonagh Landfill Licence Reg. No. W0028, under Article 16(3)(i) of the Waste Management (Licensing) Regulations 2004.

Mr. P.J. Carey submitted details in relation to phase 3 only; however, if possible could you forward the **total quantity of waste to be placed at the landfill (over authorised life of the facility)** i.e. the **total space between the formation levels of a landfill to the final profile expressed in cubic metres.**

In other words, it is the total space that has been filled with waste from the start of an authorisation by a waste licence until now **plus** the space that remains to be filled with waste to the end of the landfill operation.

If possible I need this information by the end of the day, please contact me should you require any more information.

Regards,
 Caroline
