Rampere Landfill W0066-02

For the attention of Ewa Babiarczyk

Dear Sirs,

Reference yours of the 27th July. Due to different people taking annual leave this letter was not responded to and our apologies for that.

The total quantity of waste to be placed at the landfill (over the authorised life of the facility) is currently estimated at **300,000m³**.

This figure is based on calculating the void space between the landfill as constructed and the final formed level of the completed landfill.

It should be noted that the current **planning approval** (as distinct from the licence approval) expires in **July 2010**. Wicklow County Council has applied to An Bord Pleanála for a time extension to **December 2012** and the above capacity is based on the assumption that approval will be granted for the time extension. Should it be refused then the total quantity to be placed would reduce to **200,000m³**.

Please contact the undersigned if more information is required.

Yours sincerely,

Andrew Lawless,
Senior Executive Engineer,
Waste Management
