Ewa/Caroline

Attached is calculation of the total quantity of waste in M3 to be placed at the Scotch Corner landfill over the authorised life of the facility as required under Art 16 of the waste management licensing regs 2004. My previous correspondence provided the quantity in tonnage rather than in cubic metres.

Re: Notice under Article 16(3)(a) of the Waste Management Licensing Regulations 2004 – Scotch Corner Landfill W0020-01.

Dear Ewa,

I refer to my previous letter to you dated 20th August regarding the above. It has come to my attention that I previously gave the licence capacity figure in tonnes rather than in cubic metres as was required by the EPA.

In my correspondence of August 20th I calculated the overall landfill capacity figure as 847,394 tonnes.

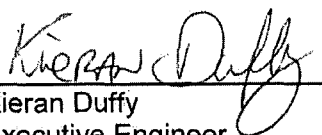

In the design of our cells at Scotch Corner landfill we have typically assumed 0.85 tonnes per cubic metre.

Based on this assumption, it is estimated that the total quantity of waste to be placed at the Scotch Corner landfill over the authorised life of the facility is

996,934m³ (i.e 847,394 tonnes /0.85).

Should you require any clarification or any further information please contact me on 047-30592.

Yours Sincerely,

Kieran Duffy
