B.10 CAPITAL INVESTMENT PROGRAMME

A programme of works had been in place for the provision of a new WWTP to serve Glenville. The new WWTP was to be advanced as a SLI but funding was not approved by the DoEHLG. The new WWTP was then to be advanced through the WSIP but funding was not approved by the DoEHLG. Therefore, no funding is currently available for the replacement of the WWTP serving Glenville.

The proposal consisted of the construction of a new 1,200PE WWTP to fully replace the existing WWTP. The new WWTP was to be located in the same site as the existing WWTP. The new WWTP was to be procured as a DBO contract. The new WWTP was to consist of primary treatment and secondary treatment. It was also to include sludge treatment facilities. The treated effluent was to discharge to the Glashanabrack River, approximately 1km from the WWTP in order to benefit from the increased assimilative capacity of the Glashanabrack River.

As there is no current source of funding for this project, it is not possible to give a timeframe for completion.

B.9(ii) PENDING DEVELOPMENT

The calculated PE to be contributed to the WWTP as a result of planning applications within the agglomeration boundary that have been granted but have not yet been commenced or completed is 380. However, 296 of the total calculated PE relates to Planning Reg. Ref. 09/5419, a residential development of 64 no. dwellings and 10 no. serviced sites. This application will not be granted permission if the existing WWTP is not upgraded or replaced.

0% of the projected PE is non-domestic.

The WWTP serving Glenville is currently at capacity and would be unable to accommodate any additional hydraulic or biological load.
