Re: Waste Licence Number W0274-01 b

AD Power Limited

Site at Ballinphuill, Tibohine, Castlerea, Co Roscommon

We wish to make the following submission regarding the above application.

We live beside the above mentioned site and have resided in this area for the past 30 years and so have both our families for generations previously. We built our own home here in 2004 where we currently live in with our 2 children.

We have great concern about this project and how it will affect us and the local community. This project started out a couple of years ago as a Rape-seed oil Bio Diesel production operation. However, it now seems to be developing into a waste disposal unit in this area which in our opinion will cause a great deal of problems for the area.

This "Waste Facility" is located right beside the local school. We are concerned about the smell and noise pollution which this "Waste Facility" will attract for the large number of children attending this school including our own! Both of our children have asthma and we feel that this will contribute more to the condition in the long term, not to mention all the other health risks.

This area is not suitable for this sort of project. We do not want our water, air and community polluted.

Signed

Damien and Lorraine Kerrane.
