**Objection to AD Roscommon Ltd Application
W 0274-10 at Ballinphuill, Tibohine, Co. Roscommon**

We held a public meeting last Saturday 12th June, after evening mass at 8 o'clock. The meeting took place in our local community centre adjacent to the church. It was packed with more than 240 people.

People who are never heard speaking out in public stood up to ask questions and to add their voices against this project in our area – so passionate and concerned are the local community on this issue.

It was a very dignified event and Bio Power representatives were asked very basic questions about the entire operation. If the community were concerned at the beginning, those concerns grew exponentially as the meeting progressed. By the end of the meeting the community were in agreement that the answers received were far from satisfactory.

Not a single person in the hall stood up to promote the project – except the farmer who owns the proposed site and AD Power. Oh and his neighbour selling him land for ease of access to the site.

In one of the EU Directives you mention that projects would only be successful if integrated into the community – that is true and therefore this one can never succeed.

Our most valuable asset in this quiet countryside village is our fresh air and unpolluted environment. The community does not want this blister, this sore, this boil, this abscess in our midst.

You can help us to prevent this by denying permission to W0274....

Yours very Concerned,
P.Morrisroe.
