Subject: Tallaght noise survey

Good morning Marian,

Please see the attached in relation to a proposed noise survey in the vicinity of our licensed facility at Tallaght (W0079-01). As you can see, we have proposed to take measurements at four separate locations in the vicinity of the site.

We will prioritise this survey and hope to complete the work this week.

Kind Regards,

Malcolm

regarding
Greenstar Ltd., Cookstown Industrial Estate, Tallaght - EPA waste licence W0079-01

Dear Jim,

Further to recent discussions with the Environmental Protection Agency regarding noise monitoring at the above facility, I attach a site area photo showing four proposed monitoring positions. It is proposed to undertake monitoring at these positions while the licensed facility is both operating and shut down. Measurement of ambient and residual parameters will be undertaken over 30 minute intervals at each position. Comparison of parameters such as L_{Aeq} 30 min, L_{AF10} 30 min, L_{AF90} 30 min and one third octave band data will be included in our survey report. The survey will be undertaken in accordance with *International Standard ISO 1996 Acoustics: Description and measurement of environmental noise Part 1 (2003) & Part 2 (2007)* and with due regard to the Agency documents *Environmental noise survey guidance document (2003)* and *Guidance note for noise in relation to scheduled activities 2nd edition (2006)*. It is proposed to undertake the survey within the next seven days. Following the survey, the facility will be inspected with a view to identifying noise mitigation measures. Any measures identified will be documented in our report.

Please note that the locations shown on the attached are indicative only. Locations may be relocated slightly in order to take local noise receptors into account.

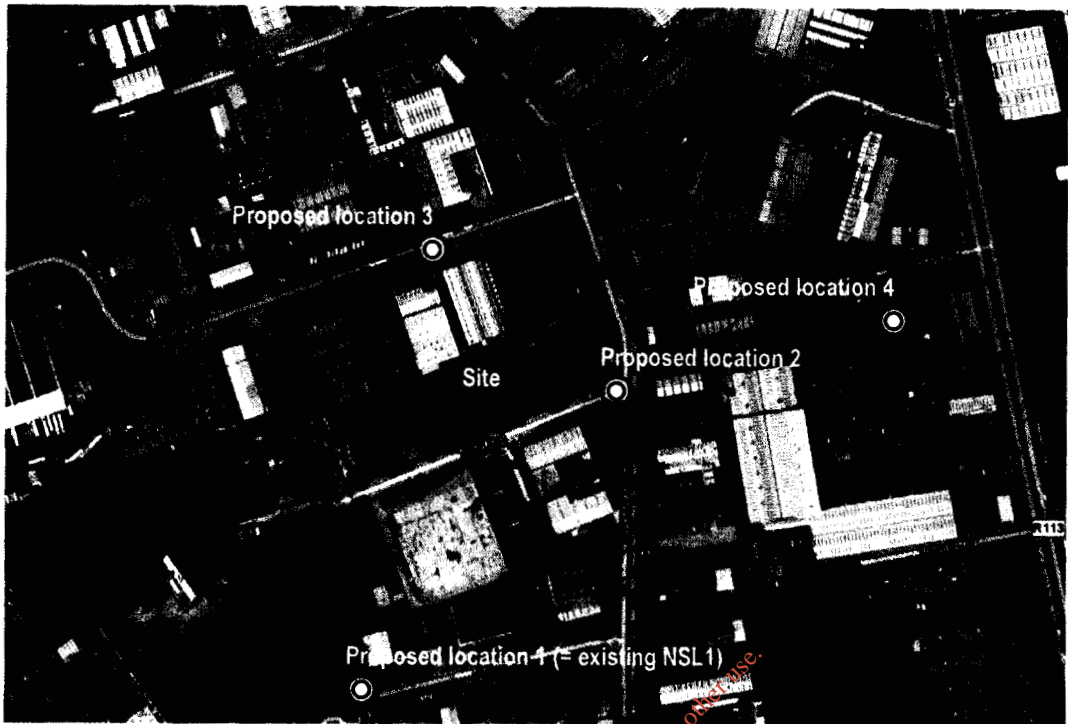

Please contact me if you have any queries.

Yours sincerely,

Damian Brosnan
