Re: Waste License Application WO 257-01 Query.

Dear Ms O Connor,

I would like to bring to your attention that Country Clean Recycling Ltd have not received any update on its waste license application that was made to the EPA in February 2009 (Ref WO 257-01).

In the mean time our waste permit (WP02/07) from Cork City Council has expired. We made an application to have our waste permit renewed in June 2010 however Cork City Council have stated that this would not be possible, please see attached letter.

In May this year we made an application for an effluent discharge license and Cork City Council are now overdue in making a decision on this matter. While in July this year OES on behalf of Country Clean Recycling furnished the EPA with updated information on the current state of the site.

Country Clean Recycling also received planning permission (TP 09/33682) for on site construction works it plans to make as part of its waste license application.

Country Clean Recycling would like to request the possibility of receiving a temporary waste license to cover its current site activities. We fear that if the site is not covered by a waste license it may affect customer's confidence in our operation and may result in the loss of business.

If Country Clean recycling can assist in any way in speeding up the process of its waste license application please contact me directly at 021 4300 130.

Kind Regards,

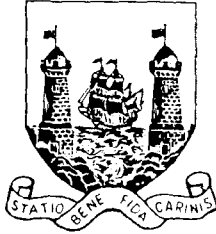

Flor Crowley

Re.: 1) Dust Monitoring Analysis
 2) Expiration of Facility Permit

I acknowledge receipt of the report regarding the second round of dust monitoring which was carried out at your facility. The report shows that considerable improvements have been achieved on site with respect to dust levels. I urge you to continue to utilise the dust suppression system and any changes in work practices that have helped bring about these changes. Cork City Council considers the complaint addressed and the matter closed. Your cooperation is appreciated.

With respect to the expiration of your facility permit, I acknowledge that you have applied to the EPA for a Waste Licence. I also acknowledge receipt of your application for a waste facility permit to cover your operations until such time as you receive your Waste Licence. I advise that Cork City Council cannot issue you with a new permit as your operations exceed the permit threshold. Attached, please find your application fee cheque returned.

Cork City Council will act as the competent authority regarding any environmental issues that may arise at your facility until such time as the EPA issues its decision on your waste licence application.

James Goulding,
 Waste Enforcement,
 Cork City Council.

City Hall
 Cork.
