**Installation of Wood Shredder**

Dear Mr. Gibbons,

Due to the growth of our business, Bergin Waste Disposal Ltd., Waste Licence no. W0163-01 is seeking approval to relocate the wood shredder to the north side of the site on the concrete hard-standing area (approximately 80' x 80') within the new extended area of the site which was approved in April 2006. The drainage from this hard-standing area is diverted to the foul water system.

We will not be changing our waste activities carried out at the facility in any way, and we do not require an increase in the waste acceptance quantities as we were well within our maximum tonnage allowance per annum for the facility in 2009.

We are seeking this relocation to improve the processing capacity for our shredded wood. The wood shredder would be in operation approximately once a week. We have discussed all other options but see no alternative but to seek a change to our existing licence that will allow the processing of wood at this new location.

In addition to the wood processing we are also using the area for temporary storage of waste prior to sorting within the facility itself. This material is all contained in skips or bins and in most cases is covered. No material in this area with the exception of the timber is stored on the ground and all storage is strictly temporary.

We seek permission from the agency to process & store material in this new area as listed above and await your instruction as to the best and most cost effective method of implementing this change. Once we have received your instruction as to the process which needs to be followed, we assure you this will be given our immediate attention and will be submitted to you as a priority.

Yours sincerely,

PP Ann Clarke
