Re: Ballinspittle and Garrettstown Agglomeration (Register No. A0440-01)
Regulation 25(c)(ii) Further Information Response

Dear Sir/Madam,

Please find the following attached:

- 1 Original of the revised Ballinspittle & Garrettstown Regulation 25 Further Information Response
- 1 Copy of the revised Ballinspittle & Garrettstown Regulation 25 Further Information Response

Yours faithfully,

Noel O'Keeffe
County Engineer & Director of Water Services

Ballinspittle & Garrettstown Regulation 25 Further Information Response

Question 1 Assess the likelihood of significant effect of the waste water discharges from the above agglomerations on the relevant European sites by referring to Circular L8/08 "Water Services Investment and Rural Water Programmes – Protection of Natural Heritage and National Monuments" issued by the Department of Heritage and Local Government. In particular, the flow diagram in Appendix 1 should be completed and the results of each section recorded. Provide details of the results of this assessment within one month of the date of this notice. If significant effects are likely then and appropriate assessment must be carried out and a report of this assessment forwarded to the Agency within one month of the date of this notice. You are advised to provide the requested information in accordance with the "Note on Appropriate Assessments for the purposes of the Waste Water Discharge (Authorisation) Regulations, 2007 (S.I. 684 of 2007)" which is available at www.epa/downloads/forms/lic/wwda/.

The checklist and flowchart from Circular L8/08 "Water Services Investment and Rural Programmes – Protection of Natural Heritage and National Monuments" have been completed for this agglomeration. The results indicate that no significant effects are likely and that no appropriate assessment is required. The checklist and flowchart are included below.

For inspection purposes only.

Water Services Investment and Rural Water Programmes –
Protection of Natural Heritage and National Monuments**

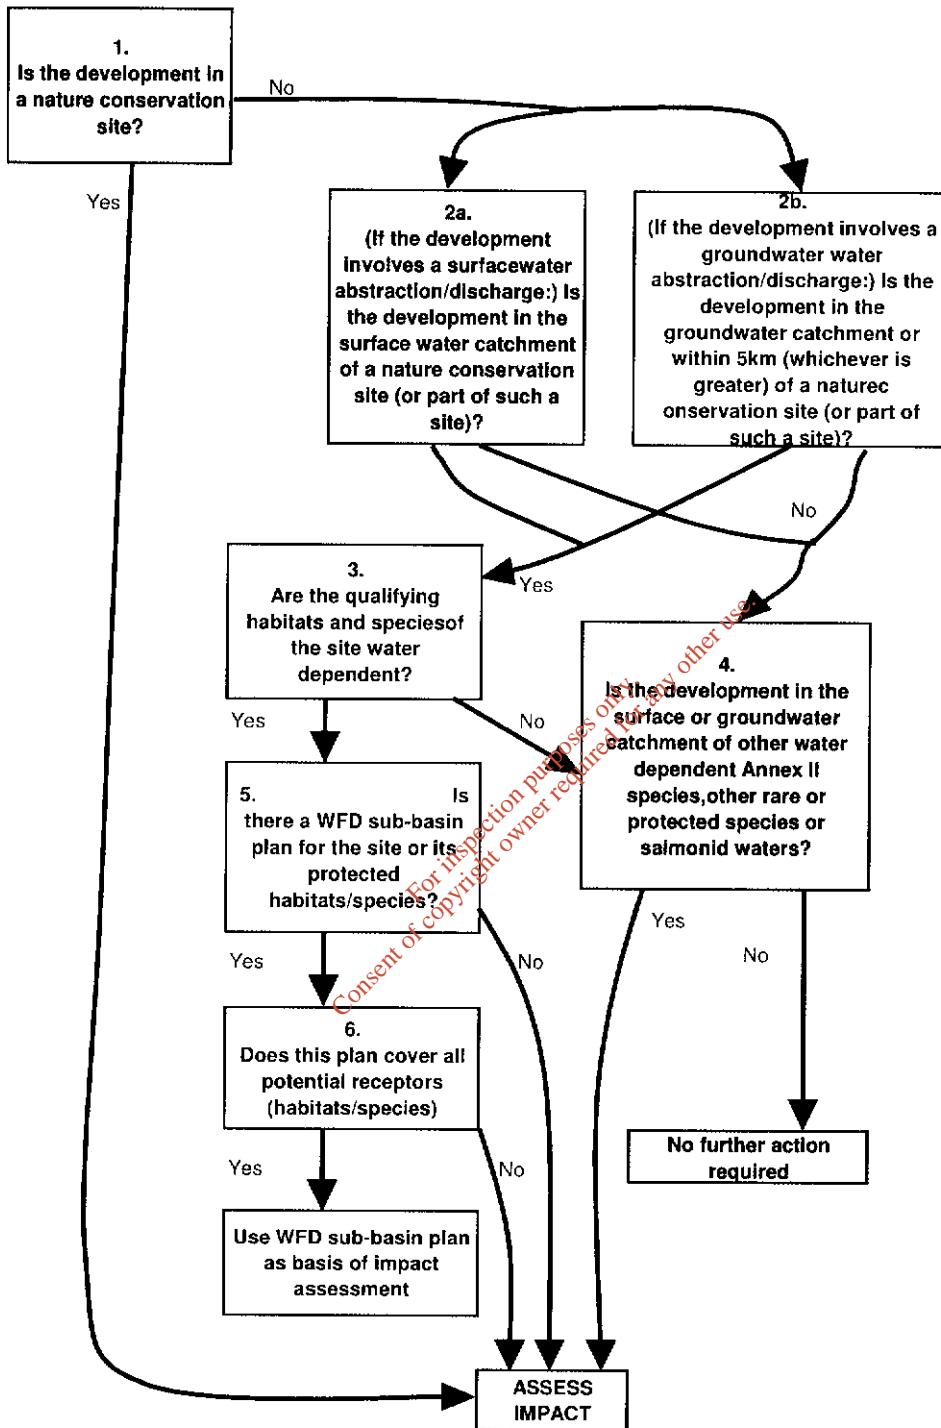

APPENDIX 1

Water Services Schemes - Natural Heritage Checklist for Local Authorities

What projects must be screened?

For new projects and significant changes to any existing operations, if the answer is 'yes' to any of the following, the project (i.e. construction, operation and maintenance) must be screened for its impacts:	
1. Is the development in or on the boundary of a nature conservation site NHA/SAC/SPA?	No
2. Will nationally protected species be directly impacted? Wildlife Acts (1976 and 2000), Flora Protection order (S.I. 94 of 1999)?	No
3. Is the development a surface water discharge or abstraction in the surface water catchment, or immediately downstream of a nature conservation site with water dependant qualifying habitats/ species?	No
4. Is the development a groundwater discharge or abstraction in the ground water catchment or within 5 km of a nature conservation site with water-dependant qualifying habitats/species?	No
5. Is the development in the surface water or groundwater catchment of salmonid waters?	No
6. Is the treatment plant in an active or former floodplain or flood zone of a river, lake, etc?	No
7. Is the development a surface discharge or abstraction to or from marine waters and within 3km of a marine nature conservation site?	No
8. Will the project in combination with other projects (existing and proposed) or changes to such projects affect the hydrology or water levels of sites of nature conservation interest or the habitats of protected species?	No

Flow Diagram with Questions relating to the Agglomeration of Ballinspittle & Garrettstown Shaded Red

Conclusion: No appropriate assessment is required for Ballinspittle & Garrettstown

Question 2 Confirm the design capacity of each of the waste water treatment plants and the current population equivalent (p.e.) being treated at each plant. Please confirm that the current p.e. includes the maximum average weekly loading for the agglomeration having taken account of local festivals, peak holiday seasons etc.

Catchment 1 - Ballinaspittle Septic Tank Estimated Design Capacity 105PE
Catchment 2 – New Council Estate WWTP Design Capacity 100 PE
Catchment 3 – Public Toilet Septic Tanks at Garretstown Beach and White Strand there is no information on Design Capacity Available

Catchment 1 – Ballinaspittle Septic Tank Current Loading 289PE
Catchment 2 – New Council Estate WWTP Current Loading 100PE
Catchment 3- Public Toilet Septic Tanks at Garretstown Beach and White Strand Estimated Current Loading 50 PE at each, 100PE in total.

These Current Loadings have been calculated on the basis of full occupancy of all dwellings in the agglomeration. An additional allowance of 10% has also been included on top of the calculated figure. Therefore these are maximum load figures. See Section B.8 of the Original application.

Question 3 Provide justification for the inclusion of the septic tanks from the public toilets at Garretstown Beach and White Strand in the application.

The septic tanks from the public toilets at Garretstown Beach and White Strand have been included in the application for the following reasons:

1. The close proximity of these Septic Tanks to the main agglomeration.
2. They discharge into the same waterbody – Courtmacsherry Bay.
3. The small size of these Septic Tanks.

Question 4 Clarify whether the treatment plant at Ballcatteen (Catchment 2) has been commissioned. Where the new upgrade plant is not operational provide a timeframe within which the waste water treatment plant will be fully operational.

The new WWTP serving the Council Estate (Catchment 2) is operational.
