Subject: RE: GSI Geological Heritage Sites

Hi Peter,

There are no sites of geological or geomorphological interest within the Brownswood townland.

The closest sites of interest lie closer to Enniscorthy, namely (for your information):

- **Tomduff**, Co. Carlow (295400, 139420) with pink andalusite, which has been recommended for NHA designation under the IGH 15 Economic Geology Theme.

- **Greenville farmyard**, Co. Wexford (296300, 141400) with Mid Caradoc Avalonian deep water fauna, has been recommended for NHA designation under the IGH 2 Precambrian to Devonian Palaeontology Theme.

Completed audits of geological heritage for certain counties are now available in PDF format at:

Regards,
Sophie

Subject: GSI Geological Heritage Sites

Hi Sophie,

We are currently undertaking a project for a site at Brownswood townland which is approximately 3km south of Enniscorthy Town, Co. Wexford. Could you please advise whether there are any GSI designated sites for their geological or geomorphological heritage in the proximity of this townland? The grid reference for the site is 297930,137090.

Thanks,

Peter.
