Re: - Technical Amendment Request W0147-01

To whom it may concern.

Following a recent meeting with Mr. Michael Owens of OCLR, I hereby make a request for a Technical Amendment to our existing waste licence.

Requested Technical Amendment:-

1. Redefinition of Site Boundary.

The redefining of the site boundary will have no adverse impact on the Environment. Furthermore the redefinition of the boundary will not impact our processing capacity and will not lead to any change of activities on the Ashgrove site. Please refer to enclosed AutoCAD Drawing (DRG No IE0310549-30-DR-0001) for existing and proposed boundary detail.

2. Increase in Emission Limit Value for Sulphate as SO₄ (Schedule C.4)

Parameter	Current ELV mg/l Grab Sample	Proposed ELV mg/l Grab Sample
Sulphate SO ₄	100	300

Correspondence with Cork City Council has indicated they have no objection to an increase in Sulphate ELV to public sewer. A letter of consent from Senior Executive Chemist with Cork City Council is enclosed.

If you require any further information or clarification, please do not hesitate to contact me.

Yours sincerely;

Mr. Trevor Parry
Environmental Manager
