Access Waste Recycling

Annual Environmental Report

2011

License No.	W0227-01
Reporting Period:	1st January to 31st December 2011
Submission Date:	23rd March 2012

Table of Contents

1. Introduction

The following information represents the environmental performance of Lawlor Brothers (Waste Disposal) Ltd. t/a Access Waste Recycling in the period from the 1st of January 2011 to 31st of December 2011.

We welcome the Agency's new AER reporting templates which have been used for this AER. The majority of our emissions monitoring in 2011 was compliant, with the exception of some issues relating to elevated dust levels which have since been resolved. As part of our environmental management programme for 2012, these issues will be monitored further to ensure we maintain a satisfactory level of compliance. Also an updated organisational chart is enclosed in this report which depicts the changes made to our environmental management team in 2011.

Since receiving our EPA license (W0227-01) in 2007, we have continued with our commitment to minimize potential environmental impact as a result of our operations and to develop our business in a sustainable manner. The recent economic crisis has resulted in additional pressures on many industries, most notably the waste industry. Despite this, we have maintained a level of reasonable environmental compliance throughout while continuing to express a desire to cooperate fully with the Agency on all matters.

We look forward to meeting the further challenges presented to us in 2012 and working closely with the Agency to overcome same.

Kind Regards,

Niall Lawlor

Director

Lawlor Brother's (Waste Disposal) Ltd. t/a Access Waste Recycling

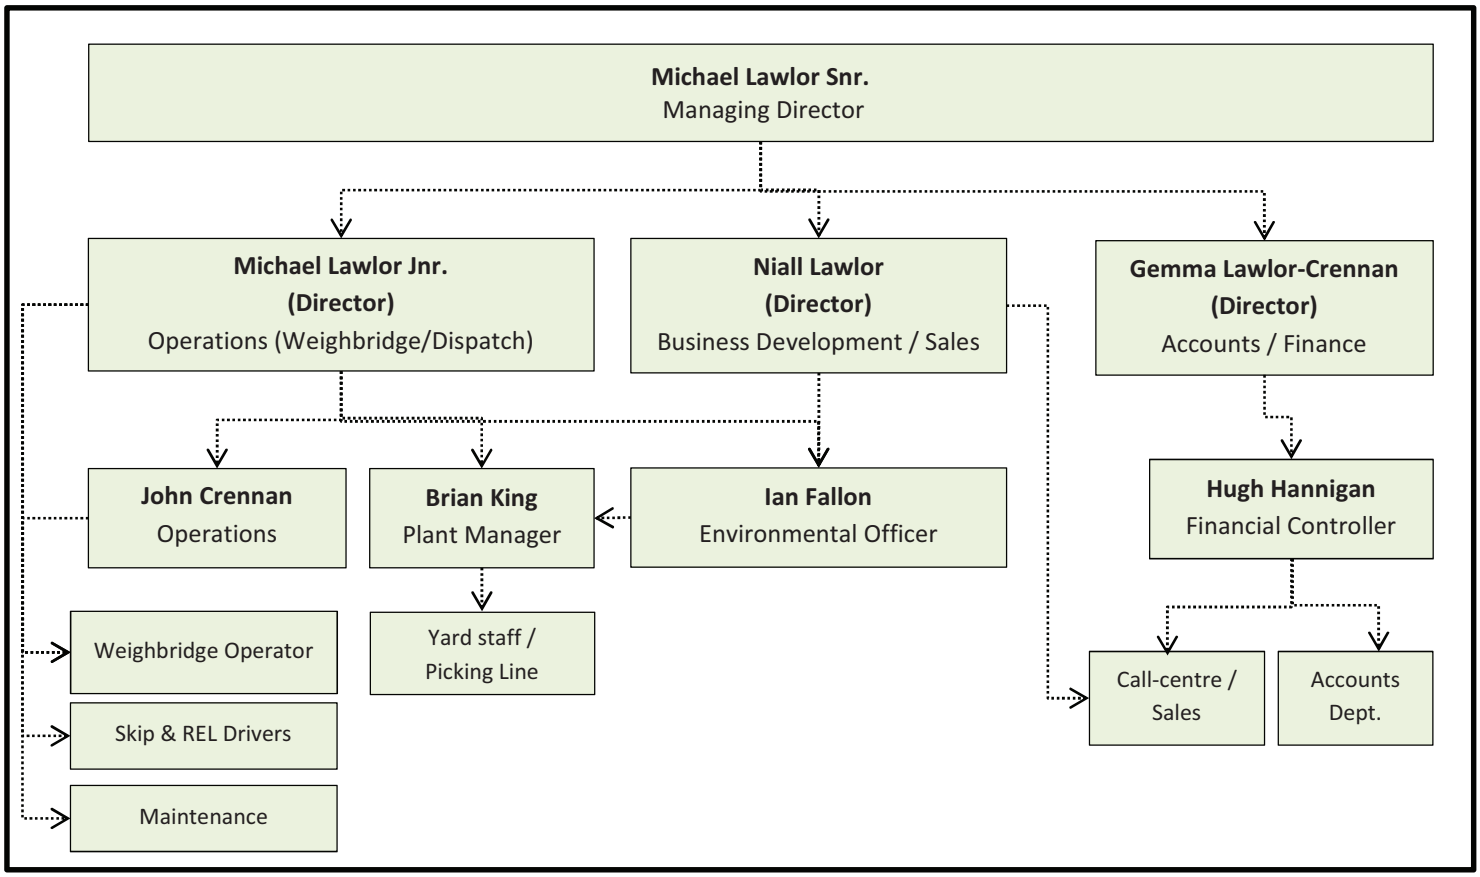
2. Summary Information

The following AER templates provided by the Agency have been completed where applicable and are enclosed;

2.1. Facility Summary Information
2.2. Air
2.3. Water & Wastewater
2.4. Bund testing (general)
2.5. Complaints-Incidents
2.6. Groundwater & Contaminated Land
2.7. ELRA
2.8. EMP
2.9. Noise
2.10. Resource-Energy
2.11. Waste
2.12. PRTR Return for 2011 data

2.1.1. Environmental Management - Organisational Chart

Ian Fallon replaced Robert Kane as the company's environmental officer in June 2011. This has led to a review of the company's organisational chart as follows;



Facility Information Summary

Licence Register Number	W0227-01
Name of site	Lawlor Brothers (Waste Diposal) Ltd. T/A Access Waste Recycling
Site Location	Unit 28 John F Kennedy Road, JFK Industrial Estate, Naas Road, Dublin 12
NACE Code	3832
Class of Activity	Class 11, 12 & 13 (Third schedule of Waste Management Acts 1996 to 2005) Class 2, 3, 4 & 13 (Fourth schedule of Waste Management Acts 1996 to 2005)
RBME risk category	B3
National Grid Reference (6E, 6 N)	+53° 19' 40.13", -6° 21' 24.57"
A brief description of the activities/process at the site for the reporting year. This should include information such as production increases or decreases on site, any infrastructural changes, environmental performance improvements which were measured during the reporting year;	Acceptance and pre-sorting of non-hazardous household, commercial, industrial and C&D skip wastes. Mechanical sorting achieved by way of trommel, screening, windshifters and picking line. Segregated fractions are then sent offiste to suitably licensed facilities for further recycling/recovery/disposal Monitoring carried out to measure dust levels, stormwater and foulwater emissions. Both storm and foulwater drainage systems are fitted with interceptors and are subject to periodic integrity testing as part of PM schedule. All waste entering and leaving site is subject to checks and weighing at weighbridge with all records available.

Declaration:

All the data and information presented in this report has been checked and certified as being accurate. The quality of the information is assured to meet licence requirements.

Additional Data Requested from Landfill operators

For the purposes of the National Inventory on Greenhouse Gases, landfill operators are requested to provide summary data on landfill gas (Methane) flared or utilised on their facilities to accompany the figures for total methane generated. Operators should only report their Net methane (CH4) emission to the environment under T(total) KG/yr for Section A: Sector specific PRTR pollutants above. Please complete the table below:

Landfill: Lawlor Brothers Waste Disposal Ltd t/a Access Skip Hire

Please enter summary data on the quantities of methane flared and / or utilised	T (Total) kg/Year	M/C/E	Method Used: Method Code	Method Used: Designation or Description	Facility Total Capacity m3 per hour	
Total estimated methane generation (as per site model)	0.0				N/A	
Methane flared	0.0				0.0	(Total Flaring Capacity)
Methane utilised in engine/s	0.0				0.0	(Total Utilising Capacity)
Net methane emission (as reported in Section A above)	0.0				N/A
