

TABLE OF CONTENTS

SECTION 1 – INTRODUCTION

1.1	Proposed Amendments	1-2
1.1.1	Increase the Annual Quantity of Waste Accepted to 220,000TPA from 200,000TPA	1-2
1.1.2	Acceptance of Additional Waste Streams (Hazardous and Non Hazardous)	1-2
1.1.3	Creation of a Centralised Maintenance/Spare Parts Facility for Indaver Ireland	1-3
1.1.4	Extended Opening Hours for Waste Acceptance at the Plant	1-3
1.1.5	Conversion of Temporary Office Block to Permanent Status	1-3
1.3	Environmental Impact Statement (EIS) Methodology	1-4
1.3.1	Requirement for an EIS	1-4
1.3.2	EIS Methodology	1-5
1.4	Company Background	1-5
1.4.1	Indaver's Activities	1-6
1.5	Consultation	1-8
1.5.1	Pre-Planning Consultation	1-8
1.6	Proposed Ongoing Communications	1-9
1.7	Contributors to the EIS	1-10
1.8	Difficulties Compiling Specified Information	1-11
1.9	References	1-11

SECTION 2 – BACKGROUND TO THE PROJECT

2.1	Introduction	2-1
2.1.1	Summary of Amendments	2-1
2.2	Need for the Scheme	2-2
2.2.1	MSW Capacity	2-2
2.2.2	Additional EWC Codes	2-5
2.2.3	Amendments to Waste Acceptance Hours and Dispatch of Residues	2-8
2.2.4	Change in Status of Temporary Structures and Car Park Area	2-8
2.2.5	Ammonia and Fuel Oil Storage Tanks – Future Additional Capacity	2-9

SECTION 3 – ALTERNATIVES

3.1	Alternative Locations	3-1
3.2	Alternative Treatment Technologies	3-2
3.2.1	MSW	3-2
3.2.2	Hazardous Waste	3-3

3.3	Alternative Waste Management Strategies	3-4
3.4	Alternative Designs	3-5

SECTION 4 – PLANNING AND POLICY CONTEXT

4.1	Introduction	4-1
4.2	Assessment of Planning and Policy Context	4-1
4.2.1	The Role of Waste to Energy	4-1
4.2.2	Scale and Location of Waste to Energy	4-5
4.2.3	Hazardous Waste Policy	4-7

SECTION 5 – DESCRIPTION OF THE PROPOSED DEVELOPMENT

5.1	Characteristics of the Application	5-1
5.1.1	Description of Site Layout	5-1
5.1.2	Description of Design, Size and Scale	5-1
5.1.3	Description of Existing Development	5-2
5.4.2	Additional EWC Codes	5-3
5.4.3	Adjustment to Waste Acceptance Hours	5-6
5.4.4	Unrestricted Waste Dispatch Hours	5-6
5.4.5	Conversion of Status – Structures and Car Park Area	5-7
5.4.6	Ammonia and Fuel Oil Storage Tanks – Future Additional Capacity	5-8
5.6	Processes	5-9
5.6.1	Waste Characterisation and Classification	5-10
5.6.2	Moving Grate Incinerator	5-12
5.6.3	De-NO _x – Ammonia Solution Injection	5-12
5.6.4	Waste Heat Boiler	5-13
5.6.5	Steam Turbine/Generator	5-13
5.6.6	Expanded Clay Injection (1 st Stage Dioxin Removal System)	5-13
5.6.7	Evaporating Spray Reactor (1 st Stage Acid Removal System)	5-13
5.6.8	Activated Carbon Injection (2 nd Stage Dioxin Removal System)	5-13
5.6.9	Dry Lime Injection (2 nd Stage Acid Removal)	5-13
5.6.10	Baghouse Filter (Dust Removal System)	5-14
5.6.11	Induced Draft Fan & Stack	5-14
5.6.12	Ash Handling	5-14
5.7	Description of Process Input and Output Requirements	5-15
5.8	Occupants/Staffing	5-17
5.9	Description of Natural Resources Used	5-18

5.10	Description of Secondary Process/Activities	5-18
5.11	Regulatory Control	5-19
5.12	Description of Decommissioning	5-20
5.13	Description of Other Developments	5-20
5.13.1	Design and Construction Health and Safety	5-20
5.13.2	General Operational Safety	5-20
5.13.3	Fire Safety	5-22
5.13.4	Potential Operating Hazards	5-22
5.15	Site Status in relation to the EU Control of Major Accidents Hazards Involving Dangerous Substances Directive	5-22

SECTION 6 – HUMAN BEINGS

6.1	Introduction	6-1
6.1.2	Human Beings Baseline Study	6-1
6.1.2.1	Introduction	6-1
6.1.2.2	Principal Potential Receptors	6-2
6.1.2.3	Recent Trends in Population	6-6
6.1.2.4	Recent Trends in Employment	6-6
6.2	Health & Safety	6-9
6.2.1	Human Health	6-9
6.2.1.1	Proposed New Waste Streams	6-9
6.2.1.2	Transport to the Site	6-9
6.2.1.3	Handling and Storage On Site	6-9
6.2.1.4	Processing and Emissions Control	6-10
6.3	Social Considerations	6-10
6.3.1	Introduction	6-10
6.3.2	Impacts and Mitigation Measures	6-11
6.4	Tourism, Land Use and Economic Activity	6-12
6.4.1	Tourism	6-12
6.4.1.1	Impacts and Mitigation Measures	6-12
6.4.2	Land Use	6-13
6.4.2.1	Impacts and Mitigation Measures	6-13
6.5	Economic Activity	6-13
6.5.1	Introduction	6-13
6.5.2	Impacts	6-13
6.5.3	Mitigation Measures	6-14
6.6	Residual Impacts	6-15

SECTION 7 – AIR QUALITY

7.1	Introduction	7-1
7.1.1	Study Methodology	7-1
7.2	Existing Environment	7-1
7.3	Characteristics of the Proposed Development	7-2
7.3.1	Forecasting Methods	7-2
7.3.2	Construction	7-2
7.3.3	Incineration	7-3
7.3.4	Road Traffic	7-3
7.4	Predicted Impact of Development on Air Quality	7-4
7.4.1	Construction	7-4
7.4.2	Incineration	7-4
7.4.3	Road Traffic	7-5
7.5	Description of Mitigation Measures	7-7
7.5.1	Construction	7-7
7.5.2	Incineration	7-7
7.5.3	Road Traffic	7-7
7.6	References	7-8

SECTION 8 – NOISE & VIBRATION

8.1	Introduction	8-1
8.2	Study Methodology	8-1
8.2.1	Environmental Noise Survey	8-2
8.2.2	Choice of Measurement Locations	8-2
8.2.3	Survey Periods	8-2
8.2.4	Instrumentation	8-3
8.2.5	Procedure	8-3
8.2.6	Measurement Parameters	8-4
8.3	Receiving Environment	8-5
8.3.1	General Description	8-5
8.3.2	Baseline Noise Monitoring Results and Discussion	8-5
8.3.3	Commissioning Noise Monitoring Results and Discussion	8-11
8.4	Characteristics of the Proposed Development	8-18
8.5	Potential Impacts of the Proposed Development	8-18
8.5.1	Construction Noise Criteria	8-18
8.5.2	Operational Noise Criteria	8-18

8.5.3	Vibration Guidelines	8-19
8.5.4	Construction Phase Assessment	8-20
8.5.5	Operational Phase Assessment	8-22
8.6	Mitigation Measures	8-25
8.6.1	Construction Phase	8-25
8.6.2	Operational Phase	8-25
8.7	Predicted Impacts of the Proposed Development	8-26
8.7.1	Construction Phase	8-26
8.7.2	Operational Phase	8-26

SECTION 9 – SOILS AND GEOLOGY

9.1	Introduction	9-1
9.2	Existing Geology and Soils	9-1
9.2.1	Regional Geology	9-2
9.2.2	Local Geology	9-2
9.2.3	Overburden Geology	9-2
9.3	Percolation Testing	9-3
9.4	Potential Impacts	9-3
9.4.1	Construction Phase	9-3
9.4.2	Operation Phase	9-4
9.5	Mitigation Measures	9-4
9.5.1	Construction Phase	9-4
9.5.2	Operational Phase	9-5
9.6	Residual Impacts	9-6

SECTION 10 – GROUNDWATER/HYDROGEOLOGY

10.1	Introduction	10-1
10.2	Overburden Hydrogeology	10-1
10.3	Bedrock Aquifer	10-2
10.4	Aquifer Vulnerability and Resource Protection	10-3
10.4.1	Assessment of Resource Protection Zonation	10-3
10.5	Groundwater Characteristics	10-4
10.5.1	Groundwater Flow	10-4
10.5.2	Groundwater Quality	10-4
10.6	Groundwater Abstractions	10-5
10.6.1	On Site Groundwater Abstraction	10-5

10.7	Potential Impacts	10-5
10.7.1	Construction Phase	10-5
10.7.2	Operational Phase	10-5
10.8	Mitigation Measures	10-7
10.8.1	Construction Phase	10-7
10.8.2	Operational Phase	10-7
10.9	Residual Impacts	10-8

SECTION 11 – SURFACE WATER

11.1	Drainage Network	11-1
11.2	Surface Water Quality	11-2
11.3	Proposed Drainage Network	11-2
11.3.1	Foul Water/Sanitary Management	11-2
11.3.2	Industrial Effluent	11-3
11.3.3	Storm Water Management	11-3
11.4	Potential Impacts	11-5
11.5	Mitigation Measures	11-6
11.6	Residual Impacts	11-8

SECTION 12 – ECOLOGY

12.1	Introduction	12-1
12.2	Nature Conservation Designations	12-1
12.3	Consultation	12-2
12.4	Field Inspections	12-2
12.4.1	Flora	12-2
12.4.1.1	Flora Mitigation Measures	12-2
12.4.1.2	Flora Conclusion	12-3
12.4.2	Fauna	12-3
12.4.2.1	Fauna Mitigation Measures	12-3
12.4.2.2	Fauna Conclusion	12-5
12.4.3	Birds	12-5
12.5	Conclusions	12-5

SECTION 13 – TRAFFIC ASSESSMENT

13.1	Introduction	13-1
13.2	Existing Transport Environment	13-1
	13.2.1 Site Location & Road Network	13-1
	13.2.2 Existing Traffic Conditions	13-3
13.3	Proposed Developments and Site Access	13-4
	13.3.1 Description of the Proposal	13-4
	13.3.2 Vehicular Access	13-4
	13.3.3 Traffic Generation and Capacity Impact Assessment Trip Generation	13-6
13.4	Predicted Impacts and Conclusions	13-10
13.5	Proposed Mitigation	13-11

SECTION 14 – LANDSCAPE AND VISUAL IMPACT ASSESSMENT

14.1	Introduction	14-1
14.2	Methodology for Assessment of Potential Visual Impacts	14-1
14.3	Definition of Visual Impacts	14-1
14.4	Potential Visual Impacts	14-3
14.5	Mitigation	14-3
14.6	Predicted Visual Impacts	14-3

SECTION 15– CLIMATE

15.1	Introduction	15-1
15.2	Characteristics of the Proposed Development	15-1
	15.2.1 Forecasting Methods	15-1
	15.2.2 Construction	15-1
	15.2.3 Incineration	15-1
	15.2.4 Road Traffic	15-2
	15.2.5 Modelling Methodology – Waste-to-Energy Facility	15-2
15.3	Predicted Impact of Development on Climate	15-3
	15.3.1 Construction	15-3
	15.3.2 Incineration	15-3
15.4	Description of Mitigation Measures	15-4
	15.4.1 Construction	15-4
	15.4.2 Incineration	15-5
15.5	References	15-5

SECTION 16– CULTURAL HERITAGE

16.1	Introduction	16-1
16.2	Field Inspection	16-1
16.3	Desk Based Research	16-1
16.4	Information from Recent Archaeological Monitoring	16-2
16.5	Predicted Impacts of the Development	16-2
	16.5.1 Direct Impacts	16-2
	16.5.2 Indirect Impacts	16-3
16.6	Remedial & Mitigation Measures	16-3

SECTION 17 – MATERIAL ASSETS

17.1	Introduction	17-1
17.2	Ownership and Access	17-2
17.3	Local Settlement	17-2
	17.3.1 Property Prices	17-2
17.4	Electricity Supply	17-3
17.5	Transport	17-3
17.6	Water Supply and Usage	17-3
	17.6.1 Process Water	17-3
	17.6.2 Potable Water	17-4
	17.6.3 Fire Water/Water Storage Tank	17-5
	17.6.4 Foul Water	17-5
	17.6.5 Surface Water	17-5
17.7	Waste Management	17-5
	17.7.1 Construction Phase	17-5
	17.7.2 Operational Phase	17-5
	17.7.2.1 Bottom Ash Re-Use Options	17-6
17.8	Agriculture	17-7
17.9	Tourism	17-7
17.10	The Use of Natural Resources	17-7
17.11	Mitigation Measures	17-7
17.12	Residual Impacts	17-8

SECTION 18 – CONSTRUCTION

18.1	Introduction	18-1
18.2	Proposed Works	18-1
18.3	Site Evaluation	18-1
18.4	Duration and Phasing	18-1
18.4	Site Preparation	18-1
18.5	Construction Techniques, Material and Plant	18-1
18.6	Employment	18-2
18.7	Accommodation/Facilities	18-2
18.8	Construction Operation Hours	18-2
18.9	Drainage Works	18-2
18.10	Waste Management	18-3
18.11	Fencing and Security	18-3
18.12	Noise, Vibration and Dust	18-3
18.13	Temporary Environmental Protection Measures	18-3
18.14	Potential Impacts	18-3

SECTION 19– INTERACTIONS

19.1	Interactions	19.1
