

Attachment G.1 Raw Materials and Energy

With the exception of the wastes described in Section E of the application form, the other materials, intermediates and products that may be used on-site include diesel, engine and hydraulic oil for the plant, water, electricity and woodchips. The estimated quantities of raw materials and energy consumption at the facility are presented in Section 16.5 of the EIS which accompanies the application.

Energy will be used efficiently in the carrying out of proposed activities. Necessary measures will be taken to ensure limited consequences for the environment from accidents or the permanent cessation of activities at the site.
