

Attachment K.1 Decommissioning

There is no short or long term proposal to either shut down or decommission all or part of the facility. In the unlikely event that the facility has to close, the shut down will be carried out in accordance with the actions set out in a Decommissioning Plan, the scope of which will be agreed with the Agency.

Attachment K.2 Aftercare Management Plan

The majority of the site is either paved or occupied by buildings, with minor landscape works at the site boundary. It is not anticipated that the waste processing activities will cease in the medium to long term. In the unlikely event that the facility, or a part of the facility, closes, it will be decommissioned in accordance with a Decommissioning Plan, the scope of which will be agreed with the Agency. Post closure monitoring and aftercare measures will also be agreed with the Agency.
