

## Licensing Action - Reg 18(3)(b) Notice Sent - 3 for Monaghan Licence (D0061-01)

**Licence:** Monaghan (D0061-01)

**Status Reason:** Open

**Issued On:** 05/07/2013

**Due Date:** 19/07/2013

**Action Type:** Licensing Action

**Status History Action:** Reg 18(3)(b) Notice Sent

Dear Applicant

I refer to your application for a waste water discharge licence relating to agglomeration named Monaghan.

Having examined the documentation submitted, I am to advise that the Agency is of the view that the documentation does not comply with Regulation 16 of the Waste Water Discharge (Authorisation) Regulations 2007, as amended.

You are therefore requested, in accordance with Regulation 18(3)(b) of the regulations, to take the steps to supply the information detailed below:

### REGULATION 16 COMPLIANCE REQUIREMENTS

#### Question

Please confirm that all the all wastewater entering the WWTP is treated by the post-1994 works on-site (i.e. the activated sludge treatment system) and that no wastewater is diverted to the pre-1994 works (i.e. the percolation filter system).

#### Associated Documents

**Question**

Describe under what circumstances an overflow occurs for each of the overflows in the agglomeration. Confirm if these overflows are storm water overflows and/or emergency overflows. Note that emergency overflows include overflow mechanisms constructed as part of pump sump infrastructure, whereby a power failure, essential maintenance or other similar interruption in normal operations results in a discharge of untreated waste water from the sump as a consequence of the pumps being disabled - discharges resulting from insufficient hydraulic capacity within the system are not regarded as emergency discharges.

**Associated Documents****Question**

For each storm water overflow (SWO) within the agglomeration please submit the national grid reference for the overflow device and, where different, the national grid reference for the SWO discharge point.

**Associated Documents****Question**

Please give up-to-date details of all pumping stations within the agglomeration, including the any at the WWTP. Include also the name/location and the number and type of pumps (duty, stand-by, back-up etc.) at each station.

**Associated Documents****Question**

Please submit all monitoring data associated with the WWTP for 2012 and 2013, including influent and effluent data, as well as ambient monitoring data for upstream and downstream of the discharge.

**Associated Documents**

Your reply to this notice should include a revised non-technical summary which reflects the information you supply in compliance with the notice, insofar as that information impinges on the non-technical summary.

In the case where any drawings already submitted are subject to revision consequent on this request, a revised drawing should be prepared in each case. It is not sufficient to annotate the original drawing with a textual correction. Where such revised drawings are submitted, provide a list of drawing titles, drawing numbers and revision status, which correlates the revised drawings with the superseded versions.

Please supply the information by 19/07/2013. Please note that all maps/drawings should not exceed A3 in size.

Please direct any queries that you may have in relation to the above to the Inspector Gavin Clabby or to OCLR Admin Team D.

Yours sincerely
