

Headquarters P.O. Box 3000 Johnstown Castle Estate County Wexford Ireland

# WASTE LICENCE Recommended Decision

Licence Register Number:	W0104-03
Company Register Number:	224173
Licensee:	Advanced Environmental Solutions (Ireland) Limited
Location of Facility:	Cappancur Industrial Estate, Cappancur, Tullamore, County Offaly.

# **INTRODUCTION**

This introduction is not part of the licence and does not purport to be a legal interpretation of the licence.

Advanced Environmental Solutions (Ireland) Limited is authorised to accept non-hazardous waste, including municipal solid waste; commercial and industrial waste; and construction and demolition waste. Waste activities authorised to take place at this facility include the shredding, screening, sorting, separating, baling and repackaging of dry recyclable waste; the sorting of construction and demolition waste; and the bulking-up of mixed municipal solid waste and construction and demolition waste.

Advanced Environmental Solutions (Ireland) Limited's facility in Cappancur Industrial Estate, Cappancur, Tullamore, County Offaly was first issued with a waste licence (Register No. W0104-01) 1 March 2004. A revised licence (Register No. W0104-02) was granted 7 October 2009 to allow for an increase in the waste acceptance threshold. This licence review (Register No. W0104-03) authorises an increase in waste intake from 50,000 tonnes to 60,000 tonnes per annum.

The licensee must manage and operate the facility to ensure that the activities do not cause environmental pollution.

The licence sets out in detail the conditions under which Advanced Environmental Solutions (Ireland) Limited will operate and manage this facility.

Glossary of Terms		1
Decision & Reasons for the Decision		
Part I Schedule of Ac	tivities Licensed	7
Part II Schedule of Ad	ctivities Refused	7
Part III Conditions		
Condition 1.	Scope	8
Condition 2.	Management of the Facility	8
Condition 3.	Infrastructure and Operation	. 10
Condition 4.	Interpretation	. 14
Condition 5.	Emissions	. 15
Condition 6.	Control and Monitoring	. 15
Condition 7.	Resource Use and Energy Efficiency	
Condition 8.	Materials Handling	. 18
Condition 9.	Accident Prevention and Emergency Response	. 20
Condition 10.	Decommissioning & Residuals Management	
Condition 11.	Notification, Records and Reports	
Condition 12.	Financial Charges and Provisions	. 24
SCHEDULE A:	Limitations	
SCHEDULE B:	Emission Limits	. 26
SCHEDULE C:	Control & Monitoring	. 27
SCHEDULE D:	Specified Engineering Works	. 30
SCHEDULE E:	Annual Environmental Report	. 31

# **Glossary of Terms**

All terms in this licence should be interpreted in accordance with the definitions in the Environmental Protection Agency Acts 1992 to 2013 / Waste Management Acts 1996 to 2013, unless otherwise defined in the section.

Adequate lighting	20 lux measured at ground level.	
AER	Annual Environmental Report.	
Aerosol	A suspension of solid or liquid particles in a gaseous medium.	
Agreement	Agreement in writing.	
Annually	At approximately twelve-monthly intervals.	
Application	The application by the licensee for this licence.	
Appropriate Facility	A waste management facility, duly authorised under relevant law and technically suitable.	
Attachment	Any reference to Attachments in this licence refers to attachments submitted as part of this licence application.	
BAT	Best Available Techniques.	
Biannually	At approximately six – monthly intervals.	
Biennially	Once every two years.	
Biodegradable waste	Any waste that is capable of undergoing anaerobic or aerobic decomposition, such as food, garden waste, sewage sludge, paper and paperboard.	
BOD	5 day Biochemical Oxygen Demand (without nitrification suppression).	
CEN	Comité Européen De Normalisation – European Committee for Standardisation.	
COD	Chemical Oxygen Demand.	
Commercial Waste	As defined in Section 5(1) of the Waste Management Acts 1996 to 2013.	
Construction and demolition (C&D) waste	Wastes that arise from construction, renovation and demolition activities: Chapter 17 of the EWC or as otherwise may be agreed.	
Containment boom	A boom that can contain spillages and prevent them from entering drains or watercourses or from further contaminating watercourses.	
CRO Number	Company Register Number.	
Daily	During all days of plant operation and, in the case of emissions, when emissions are taking place; with at least one measurement on any one day.	

Licence Reg. No. W0104-03

	<b>Environmental</b>	Protection	Agency
--	----------------------	------------	--------

Day	Any 24 hour period.
Daytime	0700 hrs to 1900 hrs.
dB(A)	Decibels (A weighted).
DO	Dissolved oxygen.
Documentation	Any report, record, results, data, drawing, proposal, interpretation or other document in written or electronic form which is required by this licence.
Drawing	Any reference to a drawing or drawing number means a drawing or drawing number contained in the application, unless otherwise specified in this licence.
Emission limits	Those limits, including concentration limits and deposition rates, established in Schedule B: Emission Limits, of this licence.
EMP	Environmental Management Programme.
Environmental damage	As defined in Directive 2004/35/EC.
EPA	Environmental Protection Agency.
European Waste Catalogue (EWC)	A harmonised, non-exhaustive list of wastes drawn up by the European Commission and published as Commission Decision 2000/532/EC and any subsequent amendment published in the Official Journal of the European Community.
Evening Time	1900hrs to 2300hrs.
Facility	Any site or premises used for the purpose of the recovery or disposal of waste.
Fortnightly	A minimum of 24 times per year, at approximately two week intervals.
GC/MS	Gas chromatography/mass spectroscopy.
Green Waste	Waste wood (excluding timber), plant matter such as grass cuttings, and other vegetation.
ha	Hectare.
Heavy metals	This term is to be interpreted as set out in "Parameters of Water Quality, Interpretation and Standards" published by the Agency in 2001. ISBN 1- 84095-015-3.

Environmental Protection Agency

Hours of operation	The hours during which the facility is authorised to be operational.		
Hours of waste acceptance	The hours during which the facility is authorised to accept waste.		
ICP	Inductively coupled plasma spectroscopy.		
Incident	<ul> <li>The following shall constitute as incident for the purposes of this licence:</li> <li>(i) an emergency;</li> <li>(ii) any emission which does not comply with the requirements of this licence;</li> <li>(iii) any exceedance of the daily duty capacity of the waste handling equipment;</li> <li>(iv) any trigger level specified in this licence which is attained or exceeded; and,</li> <li>(v) any indication that environmental pollution has, or may have, taken place.</li> </ul>		
Industrial waste	As defined in Section 5(1) of the Waste Management Acts 1996 to 2013.		
Inert waste	Waste that does not undergo any significant physical, chemical or biological transformations. Inert waste will not dissolve, burn or otherwise physically or chemically react, biodegrade or adversely affect other matter with which it comes into contact in a way likely to give rise to environmental pollution or harm human health. The total leachability and pollutant content of the waste and the ecotoxicity of the leachate must be insignificant, and in particular must not endanger the quality of surface water and/or groundwater.		
IPPC	Integrated Pollution Prevention & Control.		
к	Kelvin.		
kPa	Kilopascals.		
L <sub>Acq</sub> ,T	This is the equivalent continuous sound level. It is a type of average and is used to describe a fluctuating noise in terms of a single noise level over the sample period (T).		
Landfill Directive	Council Directive 1999/31/EC.		
L <sub>Ar,T</sub>	The Rated Noise Level, equal to the $L_{Aeq}$ during a specified time interval (T), plus specified adjustments for tonal character and/or impulsiveness of the sound.		
Leachate	Any liquid percolating through and emitted from waste accepted or being processed at the facility.		
Licence	A Waste Licence issued in accordance with the Waste Management Acts 1996 to 2013.		

Environmental Protection Agency Licence Reg. No. W0104-03

Licensee	Advanced Environmental Solutions (Ireland) Limited, Cappancur Industrial Estate, Cappancur, Tullamore, County Offaly. CRO Number, 224173.	
Liquid waste	Any waste in liquid form and containing less than 2% dry matter.	
List I	As listed in the EC Directives 2006/11/EC and 80/68/EEC and amendments.	
List II	As listed in the EC Directives 2006/11/EC and 80/68/EEC and amendments.	
Local Authority	Offaly County Council.	
Maintain	Keep in a fit state, including such regular inspection, servicing, calibration and repair as may be necessary to perform its function adequately.	
Mass flow limit	An emission limit value expressed as the maximum mass of a substance that can be emitted per unit time.	
Mass flow threshold	A mass flow rate above which a concentration limit applies.	
Monthly	A minimum of 12 times per year, at intervals of approximately one month.	
Municipal waste	As defined in Section 5(1) of the Waste Management Acts 1996 to 2013.	
Night-time	2300 hrs to 0700 hrs.	
Noise-sensitive location (NSL)	Any dwelling house, hotel or hostel, health building, educational establishment, place of worship or entertainment, or any other facility or area of high amenity which for its proper enjoyment requires the absence of noise at nuisance levels.	
Oil separator	Device installed according to the International Standard I.S. EN 858-2:2003 (Separator system for light liquids, (e.g. oil and petrol) – Part 2: Selection of normal size, installation, operation and maintenance).	
PRTR	Pollutant Release and Transfer Register.	
Quarterly	At approximately three – monthly intervals.	
Recyclable materials	Waste types, such as cardboard, batteries, gas cylinders etc, may be recycled.	
Sample(s)	Unless the context of this licence indicates to the contrary, the term samples shall include measurements taken by electronic instruments.	
Sanitary effluent	Wastewater from facility toilet, washroom and canteen facilities.	
SOP	Standard operating procedure.	

4

Environmental Protection Agency Licence Reg. No. W0104-03

Source segregated waste	Waste which is separated at source; meaning that the waste is sorted at the point of generation into a recyclable fraction(s) for separate collection (e.g., paper, metal, glass, plastic, bulk dry recyclables, biodegradables, etc.,) and a residual fraction. The expression 'separate at source' shall be construed accordingly.	
Specified emissions	Those emissions listed in Schedule B: Emission Limits, of this licence.	
Specified Engineering Works	Engineering works listed in Schedule D: Specified Engineering Works of this licence.	
Standard method	A National, European or internationally recognised procedure (e.g. I.S. EN, ISO, CEN, BS or equivalent); or an in-house documented procedure based on the above references; a procedure as detailed in the current edition of "Standard Methods for the Examination of Water and Wastewater" (prepared and published jointly by A.P.H.A., A.W.W.A. & W.E.F.), American Public Health Association, 1015 Fifteenth Street, N.W., Washington DC 20005, USA; or an alternative method as may be agreed by the Agency.	
Storm water	Rain water run-off from roof and non-process areas.	
Temporary storage	In relation to waste is a period of less than six months as defined in the Waste Management Acts 1996 to 2013.	
The Agency	Environmental Protection Agency.	
тос	Total organic carbon.	
Trade effluent	Trade effluent has the meaning given in the Water Services Act, 2007.	
Trigger level	A parameter value, the achievement or exceedance of which requires certain actions to be taken by the licensee.	
Water Services Authority	Offaly Council.	
WEEE	As defined in the European Communities (WEEE) Regulations, 2011 (S.I. No. 355 of 2011).	
Weekly	During all weeks of plant operation and, in the case of emissions, when emissions are taking place; with at least one measurement in any one week.	
WWTP	Waste water treatment plant.	

5

.

# **Decision & Reasons for the Decision**

The Environmental Protection Agency is satisfied, on the basis of the information available, that subject to compliance with the conditions of this licence, any emissions from the activity will comply with and will not contravene any of the requirements of Section 40(4) of the Waste Management Acts 1996 to 2013.

#### **Recommended Determination**

In reaching this decision the Environmental Protection Agency has considered the application and supporting documentation received from the applicant, all submissions received from other parties and the report of its inspector.

A screening for Appropriate Assessment was undertaken to assess, in view of best scientific knowledge and the conservation objectives of the site, if the **proposed activity**, individually or in combination with other plans or projects is likely to have a significant effect on a European Site(s). In this context, particular attention was paid to the European sites at **Charleville Wood Special Area of Conservation** (SAC) (site code 000571); **Clara Bog SAC** (site code 000572); **Raheenmore Bog SAC** (site code 000582); **Clonsalee Eskers and Derry Bog SAC** (site code 000859); **River Barrow and River Nore SAC** (site code 002162); and Slieve Bloom Mountains Special Protection Area (SPA) (site code 004160) and the Agency considered, for the reasons set out below, that the **proposed activity** is not directly connected with or necessary to the management of those sites as European Sites and that it can be excluded on the basis of objective scientific information, that the **proposed activity**, individually or in combination with other plans or projects, will have a significant effect on a European site, and accordingly the Agency determined that an Appropriate Assessment of the **proposed activity** is not required.

It has been determined that this facility does not have the potential for significant effects on any European site due to the absence of significant environmental emissions from the facility and its distance to European sites.

# Part I Schedule of Activities Licensed

In pursuance of the powers conferred on it by the Waste Management Acts 1996 to 2013, as amended, the Environmental Protection Agency (the Agency) proposes, under Section 46(8) of the said Acts to grant this Waste Licence to Advanced Environmental Solutions (Ireland) limited, Cappancur Industrial Estate, Cappancur, Tullamore, County Offaly carry on the waste activities listed below at Cappancur Industrial Estate, Cappancur, Tullamore, County Offaly subject to conditions, with the reasons therefor and the associated schedules attached thereto set out in the licence.

Licensed Waste Disposal Activities, in accordance with the Third Schedule of the Waste Management Acts 1996 to 2013

Class D 13.	Blending or mixing prior to submission to any of the operations numbered D 1 to D 12 (if there is no other D code appropriate, this can include preliminary operations prior to disposal including pre-processing such as, amongst others, sorting, crushing, compacting, pelletising, drying, shredding, conditioning or seperating prior to submission to any of the operations numbered D1 to D12).
Class D 14.	Repackaging prior to submission to any of the operations numbered D 1 and D 13.
Class D 15	Storage pending any of the operations numbered D 1 to D 14 (excluding temporary storage (being preliminary storage according to the definition of "collection" in section 5(1), pending collection on the site where the waste is produced.

Licensed Waste Recovery Activities, in accordance with the Fourth Schedule of the Waste Management Acts 1996 to 2013

Class R 3.	Recycling /reclamation of organic substances which are not used as solvents (including composting and other biological transformation processes), which includes gasification and pyrolisis using the components as chemicals.
Class R 4.	Recycling/reclamation of metals and metal compounds.
Class R 5.	Recycling/reclamation of other inorganic materials, which includes soil cleaning resulting in recovery of the soil and recycling of inorganic construction materials.
Class R 12.	Exchange of waste for submission to any of the operations numbered R 1 to R 11 (if there is no other R code appropriate, this can include preliminary operations prior to recovery including pre-processing such as, amongst others, dismantling, sorting, crushing, compacting, pelletising, drying, shredding, conditioning, repackaging, separating, blending or mixing prior to submission to any of the operations numbered R1 to R11).
Class R 13.	Storage of waste pending any of the operations numbered R 1 to R 12 (excluding temporary storage (being preliminary storage according to the definition of 'collection' in section 5(1)), pending collection, on the site where the waste is produced).

# Part II Schedule of Activities Refused

None of the proposed activities as set out in the licence application have been refused.

Environmental Protection Agency

# Part III Conditions

## Condition 1. Scope

- 1.1 Waste activities at this facility shall be restricted to those listed and described in *Part I* Schedule of Activities Licensed, and shall be as set out in the licence application or as modified under Condition 1.4 of this licence and subject to the conditions of this licence.
- 1.2 Activities at this facility shall be limited as set out in *Schedule A: Limitations*, of this licence.
- 1.3 For the purposes of this licence, the facility authorised by this licence is the area of land outlined in **red** on Drawing No. **16705-01 (Revision A)** of the application. Any reference in this licence to "facility" shall mean the area thus outlined in **red**. The licensed activities shall be carried on only within the area outlined.
- 1.4 No alteration to, or reconstruction in respect of, the activity, or any part thereof, that would, or is likely to, result in
  - (i) a material change or increase in:
    - the nature or quantity of any emission;
    - the abatement/treatment or recovery systems;
    - the range of processes to be carried out;
    - the fuels, raw materials, intermediates, products or wastes generated, or
  - (ii) any changes in:
    - site management, infrastructure or control with adverse environmental significance;

shall be carried out or commenced without prior notice to, and without the agreement of, the Agency.

- 1.5 Waste Acceptance Hours and Hours of Operation
  - 1.5.1 Waste shall be accepted at or dispatched from the facility only between the hours of 0600hrs and 0000hrs Monday to Saturday inclusive.
  - 1.5.2 The facility shall be operated only during the hours of 0700hrs and 2300hrs Monday to Saturday inclusive.
  - 1.5.3 The facility shall not operate or accept/dispatch waste on Sundays or on Public Holidays without the agreement of the Agency.
- 1.6 The facility shall be controlled, operated and maintained, and emissions shall take place as set out in the licence. All programmes required to be carried out under the terms of this licence become part of this licence.
- 1.7 This licence is for purposes of waste licensing under the Waste Management Acts 1996 to 2013, as amended only and nothing in this licence shall be construed as negating the licensee's statutory obligations, or requirements under any other enactments or regulations.
- 1.8 This licence is being granted in substitution for the waste licence granted to the licensee on 7
   October 2009 (Register No: W0104-02). The previous waste licence (Register No: W0104-02) is superseded by this licence.

Reason: To clarify the scope of this licence.

# **Condition 2.** Management of the Facility

#### 2.1 Facility Management

- 2.1.1 The licensee shall employ a suitably qualified and experienced facility manager who shall be designated as the person in charge. The facility manager or a nominated, suitably qualified and experienced deputy shall be present on the facility at all times during its operation or as otherwise required by the Agency.
- 2.1.2 The licensee shall ensure that personnel performing specifically assigned tasks shall be qualified on the basis of appropriate education, training and experience as required and shall be aware of the requirements of this licence.
- 2.2 Environmental Management System (EMS)
  - 2.2.1 The licensee shall maintain an Environmental Management System (EMS). The EMS shall be updated on an annual basis.
  - 2.2.2 The EMS shall include, as a minimum, the following elements:
    - 2.2.2.1 Management and Reporting Structure.
    - 2.2.2.2 Schedule of Environmental Objectives and Targets.

The licensee shall maintain a Schedule of Environmental Objectives and Targets. The schedule shall, as a minimum, provide for a review of all operations and processes, including an evaluation of practicable options, for energy and resource efficiency, the use of cleaner technology, cleaner production and the prevention, reduction and minimisation of waste and shall include waste reduction targets. The schedule shall include time frames for the achievement of set targets and shall address a five-year period as a minimum. The schedule shall be reviewed annually and amendments thereto notified to the Agency for agreement as part of the Annual Environmental Report (AER).

2.2.2.3 Environmental Management Programme (EMP)

The licensee shall maintain an EMP, including a time schedule, for achieving the Environmental Objectives and Targets prepared under Condition 2.2.2.2. Once agreed the EMP shall be maintained by the licensee. It shall include:

- designation of responsibility for targets;
- the means by which they may be achieved;
- the time within which they may be achieved.

The EMP shall be reviewed annually and amendments thereto notified to the Agency for agreement as part of the Annual Environmental Report (AER).

A report on the programme, including the success in meeting agreed targets, shall be prepared and submitted to the Agency as part of the AER. Such reports shall be retained on-site for a period of not less than seven years and shall be available for inspection by authorised persons of the Agency.

#### 2.2.2.4 Documentation

- (i) The licensee shall maintain an environmental management documentation system which shall be to the satisfaction of the Agency.
- (ii) The licensee shall issue a copy of this licence to all relevant personnel whose duties relate to any condition of this licence.

#### 2.2.2.5 Corrective Action

The licensee shall maintain procedures to ensure that corrective action is taken should the specified requirements of this licence not be fulfilled. The responsibility and authority for persons initiating further investigation and corrective action in the event of a reported non-conformity with this licence shall be defined.

#### 2.2.2.6 Awareness and Training

The licensee shall maintain procedures for identifying training needs, and for providing appropriate training, for all personnel whose work can have a significant effect upon the environment. Appropriate records of training shall be maintained.

2.2.2.7 Communications Programme

The licensee shall maintain a Public Awareness and Communications Programme to ensure that members of the public can obtain information at the facility, at all reasonable times, concerning the environmental performance of the facility.

2.2.2.8 Maintenance Programme

The licensee shall maintain a programme for maintenance of all plant and equipment based on the instructions issued by the manufacturer/supplier or installer of the equipment. Appropriate record keeping and diagnostic testing shall support this maintenance programme. The licensee shall clearly allocate responsibility for the planning, management and execution of all aspects of this programme to appropriate personnel (see Condition 2.1 above).

2.2.2.9 Efficient Process Control

The licensee shall maintain a programme to ensure there is adequate control of processes under all modes of operation. The programme shall identify the key indicator parameters for process control performance, as well as identifying methods for measuring and controlling these parameters. Abnormal process operating conditions shall be documented, and analysed to identify any necessary corrective action.

Reason: To make provision for management of the activity on a planned basis having regard to the desirability of ongoing assessment, recording and reporting of matters affecting the environment.

## **Condition 3.** Infrastructure and Operation

- 3.1 The licensee shall establish and maintain, for each component of the facility, all infrastructure referred to in this licence in advance of the commencement of the licensed activities in that component, or as required by the conditions of this licence. Infrastructure specified in the application that relates to the environmental performance of the installation and is not specified in the licence, shall be installed in accordance with the schedule submitted in the application.
- 3.2 Facility Notice Board
  - 3.2.1 The licensee shall maintain a Facility Notice Board on the facility so that it is legible to persons outside the main entrance to the facility. The minimum dimensions of the board shall be 1200 mm by 750 mm. The notice board shall be maintained thereafter.
  - 3.2.2 The board shall clearly show:
    - (i) the name and telephone number of the facility;
    - (ii) the normal hours of opening;
    - (iii) the name of the licence holder;
    - (iv) an emergency out of hours contact telephone number;
    - (v) the licence reference number; and
    - (vi) where environmental information relating to the facility can be obtained.

- 3.2.3 A plan of the facility clearly identifying the location of each storage and treatment area shall be displayed as close as is possible to the entrance to the facility. The plan shall be displayed on a durable material such that is legible at all times. The plan shall be replaced as material changes to the facility are made.
- 3.3 Specified Engineering Works
  - 3.3.1 The licensee shall submit proposals for all Specified Engineering Works, as defined in *Schedule D: Specified Engineering Works*, of this licence, to the Agency for its agreement at least two months in advance of the intended date of commencement of any such works. No such works shall be carried out without the prior agreement of the Agency.
  - 3.3.2 All specified engineering works shall be supervised by a competent person(s) and that person, or persons, shall be present at all times during which relevant works are being undertaken.
  - 3.3.3 Following the completion of all specified engineering works, the licensee shall complete a construction quality assurance validation. The validation report shall be made available to the Agency on request. The report shall, as appropriate, include the following information:
    - (i) A description of the works;
    - (ii) As-built drawings of the works;
    - (iii) Any other information requested in writing by the Agency.
- 3.4 The licensee shall install on all emission points such sampling points or equipment, including any data-logging or other electronic communication equipment, as may be required by the Agency. All such equipment shall be consistent with the safe operation of all sampling and monitoring systems.
- 3.5 In the case of composite sampling of aqueous emissions from the operation of the facility, a separate composite sample or homogeneous sub-sample (of sufficient volume as advised) shall be retained as required for EPA use.
- 3.6 The licensee shall clearly label and provide safe and permanent access to all on-site sampling and monitoring points and to off-site points as required by the Agency. The requirement with regard to off-site points is subject to the prior agreement of the landowner(s) concerned.
- 3.7 Tank, Container and Drum Storage Areas
  - 3.7.1 All tank, container and drum storage areas shall be rendered impervious to the materials stored therein. Bunds shall be designed having regard to Agency guidelines 'Storage and Transfer of Materials for Scheduled Activities' (2004).
  - 3.7.2 All tank and drum storage areas shall, as a minimum, be bunded, either locally or remotely, to a volume not less than the greater of the following:
    - (i) 110% of the capacity of the largest tank or drum within the bunded area; or
    - (ii) 25% of the total volume of substance that could be stored within the bunded area.
  - 3.7.3 All drainage from bunded areas shall be treated as contaminated unless it can be demonstrated to be otherwise. All drainage from bunded areas shall be diverted for collection and safe disposal, unless it can be deemed uncontaminated and does not exceed the trigger levels set for storm water emissions under this licence.
  - 3.7.4 All inlets, outlets, vent pipes, valves and gauges must be within the bunded area.
  - 3.7.5 All tanks, containers and drums shall be labelled to clearly indicate their contents.
- 3.8 Facility Security
  - 3.8.1 Security and stockproof fencing and gates shall be maintained. The base of the fencing shall be set in the ground. Subject to the implementation of the Decommissioning Management Plan and to the agreement of the Agency, the requirement for such site security may be removed.

- 3.8.2 The licensee shall install a CCTV system which records all truck movement into and out of the facility; the CCTV system shall be operated at all times and copies of recording kept on site and made available to the Agency on request.
- 3.8.3 Gates shall be locked shut when the facility is unsupervised.
- 3.8.4 The licensee shall remedy any defect in the gates and/or fencing as follows:
  - (i) A temporary repair shall be made by the end of the working day; and
  - (ii) A repair to the standard of the original gates and/or fencing shall be undertaken within three working days.
- 3.9 Facility Roads and Site Surfaces
  - 3.9.1 Effective site roads shall be maintained to ensure the safe and nuisance-free movement of vehicles within the facility.
  - 3.9.2 The licensee shall maintain an impermeable concrete surface in all areas of the facility; the surfaces shall be concreted and constructed to British Standard 8110 or an alternative as agreed by the Agency. The licensee shall remedy any defect in concrete surfaces within five working days.
- 3.10 Facility Office
  - 3.10.1 The licensee shall maintain an office at the facility. The office shall be constructed and maintained in a manner suitable for the processing and storing of documentation.
  - 3.10.2 The licensee shall maintain a working telephone and a method for electronic transfer of information at the facility.
- 3.11 Waste Inspection and Quarantine Areas
  - 3.11.1 A Waste Inspection Area and a Waste Quarantine Area shall be maintained at the facility.
  - 3.11.2 These areas shall be constructed and maintained in a manner suitable, and be of a size appropriate, for the inspection of waste and subsequent quarantine if required. The waste inspection area and the waste quarantine area shall be clearly identified and segregated from each other.
  - 3.11.3 Drainage from these areas shall be directed to the trade effluent collection & storage system.
- 3.12 Weighbridge and Wheel Cleaners
  - 3.12.1 The licensee shall maintain a weighbridge and wheel cleaner at the facility.
  - 3.12.2 The wheel cleaner shall be used by all vehicles leaving the facility as required to ensure that no wastewater or waste is carried off-site. All water from the wheel cleaning area shall be directed to the vehicle wash water collection & recycling interceptor/sump
  - 3.12.3 Vehicle wash-water not recycled on site shall be disposed of as trade effluent.
  - 3.12.4 The wheel-wash shall be inspected on a daily basis and drained as required. Silt, stones and other accumulated material shall be removed as required from the wheel-wash and disposed of appropriately.
- 3.13 Waste handling, ventilation and processing plant
  - 3.13.1 Items of plant deemed critical to the efficient and adequate processing of waste at the facility (including *inter alia* waste-loading vehicles and ejector trailers) shall be provided on the following basis:
    - (i) 100% duty capacity;
    - (ii) 20% standby capacity available on a routine basis; and
    - (iii) Provision of contingency arrangements and/or backup and spares in the case of breakdown of critical equipment.

- 3.13.2 The licensee shall maintain on site a record detailing the duty and standby capacity in tonnes per day, of all waste handling and processing equipment to be used at the facility. These capacities shall be based on the licensed waste intake, as per *Schedule A: Limitations*, of this licence.
- 3.13.3 The quantity of waste to be accepted at the facility on a daily basis shall not exceed the duty capacity of the equipment at the facility. Any exceedance of this intake shall be treated as an incident.
- 3.14 Waste Transfer/Processing Buildings

The licensee shall maintain the waste transfer/processing buildings. The buildings shall be acoustically screened.

3.15 Dust/Odour Control

The licensee shall provide and maintain adequate measures for the control of odours and dust emissions, including fugitive dust emissions, from the facility. Installation of an odour-management system shall at a minimum include the following:

- 3.15.1 Dust curtains (or equivalent approved by the Agency) shall be maintained on the entry/exit points from the waste transfer building; all other doors in this building shall be kept closed where possible.
- 3.15.2 Unless otherwise agreed by the Agency, all buildings processing putrescible waste shall be maintained at negative air pressure with ventilated gases being subject to treatment as may be agreed by the Agency.
- 3.16 All sanitary effluent and trade effluent shall drain to a bunded storage tank for holding prior to disposal off-site. The tank shall be fitted with high-level liquid alarms and a leak detection system. Trade and sanitary effluent stored in the on-site storage tanks shall be tankered off-site in fully enclosed road tankers to an agreed Wastewater Treatment Plant where it shall be appropriately treated.
- 3.17 Construction and Demolition Waste Recovery Area
  - 3.17.1 The licensee shall maintain a construction and demolition waste recovery area. This infrastructure shall at a minimum comprise the following:
    - (i) an impermeable concrete slab;
    - (ii) collection and disposal infrastructure for all run-off; and
    - (iii) appropriate bunding to provide visual and noise screening.
  - 3.17.2 All stockpiles shall be adequately contained to minimise dust generation.
  - 3.17.3 Only Construction and Demolition waste shall be accepted at this area. Wastes that are capable of being recovered shall be separated and shall be stored temporarily in this area in advance of being subjected to other recovery activities at the facility or transport off the facility.
  - 3.17.4 The licensee shall implement measures to minimise dust generation at this facility and shall as instructed by the Agency install a sprinkling irrigation system for the control of dust nuisance from the facility. Any remedial works necessary to control dust must be implemented within a time-scale to be agreed by the Agency.
- 3.18 The licensee shall have in storage an adequate supply of containment booms and/or suitable absorbent material to contain and absorb any spillage at the facility. Once used, the absorbent material shall be disposed of at an appropriate facility.
- 3.19 Silt Traps and Oil Separators

The licensee shall maintain silt traps and oil separators at the facility:

- (i) Silt traps to ensure that all storm water discharges, other than from roofs, from the facility pass through a silt trap in advance of discharge;
- (ii) An oil separator on the storm water discharge from yard areas. The separator shall be a Class I full retention separator.

Environmental Protection Agency

The silt traps and separator shall be in accordance with I.S. EN-858-2: 2003 (separator systems for light liquids).

- 3.20 Fire-water Retention
  - 3.20.1 The licensee shall carry out a risk assessment to determine if the activity should have a fire-water retention facility. The licensee shall submit the assessment and a report to the Agency on the findings and recommendations of the assessment within six months of the date of grant of this licence.
  - 3.20.2 In the event that a significant risk exists for the release of contaminated fire-water, the licensee shall, based on the findings of the risk assessment, prepare and implement, with the agreement of the Agency, a suitable risk management programme. The risk management programme shall be fully implemented within three months of date of notification by the Agency.
  - 3.20.3 In the event of a fire or a spillage to storm water, the site storm water shall be diverted to the containment pond. The licensee shall examine, as part of the response programme in Condition 3.20.2 above, the provision of automatic diversion of storm water to the containment pond. The licenses shall have regard to any guidelines issued by the Agency with regard to firewater retention.
  - 3.20.4 The licensee shall have regard to the Environmental Protection Agency Draft Guidance Note to Industry on the Requirements for Fire-Water Retention Facilities when implementing Conditions 3.20.1 and 3.20.2 above.
- 3.21 All pump sumps, storage tanks, lagoons or other treatment plant chambers from which spillage of environmentally significant materials might occur in such quantities as are likely to breach local or remote containment or separators, shall be fitted with high liquid level alarms (or oil detectors as appropriate).
- 3.22 The provision of a catchment system to collect any leaks from flanges and valves of all overground pipes used to transport material other than water shall be examined. This shall be incorporated into a Schedule of Environmental Objectives and Targets set out in Condition 2 of this licence for the reduction in fugitive emissions.
- 3.23 All wellheads shall be adequately protected to prevent contamination or physical damage.
- 3.24 Surface Water Management

Surface water management infrastructure shall be provided and maintained at the facility. As a minimum, the infrastructure shall be capable of the following:-

- a) the prevention of discharge of contaminated water, process effluent and/or leachate into surface water drains and courses; and
- b) the collection/diversion of run-off arising from paved areas.
- 3.25 The licensee shall maintain in a prominent location on the site a wind sock, or other wind direction indicator, which shall be visible from the public roadway outside the site.

**Reason:** To provide for appropriate operation of the facility to ensure protection of the environment.

## **Condition 4.** Interpretation

- 4.1 Where the ability to measure a parameter is affected by mixing before emission, then, with agreement from the Agency, the parameter may be assessed before mixing takes place.
- 4.2 Noise

Noise from the facility shall not give rise to sound pressure levels  $(L_{Aeq. T})$  measured at the noise sensitive locations of the facility which exceed the limit value(s).

#### 4.3 Dust and Particulate Matter

Dust and particulate matters from the activity shall not give rise to deposition levels which exceed the limit value(s).

Reason: To clarify the interpretation of limit values fixed under the licence.

## **Condition 5. Emissions**

- 5.1 No specified emission from the facility shall exceed the emission limit values set out in *Schedule B: Emission Limits*, of this licence. There shall be no other emissions of environmental significance.
- 5.2 No emissions, including odours, from the activities carried on at the site shall result in an impairment of, or an interference with amenities or the environment beyond the facility boundary or any other legitimate uses of the environment beyond the facility boundary.
- 5.3 No substance shall be discharged in a manner, or at a concentration, that, following initial dilution, causes tainting of fish or shellfish.
- 5.4 No trade effluent, leachate or contaminated storm water shall be discharged to surface water drains and surface water courses.
- 5.5 Storm Water Emissions to Surface Water

Unless otherwise agreed by the Agency, the trigger levels for the surface water discharge from the facility to the drainage ditch on the southern perimeter of the facility at location SW1 are:-

- (i) Suspended Solids 25mg/l
- (ii) BOD 2.6 mg/l
- (iii) Total Ammonia (as N) 0.14 mg/l
- 5.6 There shall be no direct emissions to groundwater.
- 5.7 The licensee shall ensure that all or any of the following:
  - Vermin
  - Birds
  - Flies
  - Mud
  - Dust
  - Litter

associated with the activity do not result in an impairment of, or an interference with, amenities or the environment at the facility or beyond the facility boundary or any other legitimate uses of the environment beyond the facility boundary. Any method used by the licensee to control or prevent any such impairment/interference shall not cause environmental pollution.

Reason: To provide for the protection of the environment by way of control and limitation of emissions.

## Condition 6. Control and Monitoring

6.1 The licensee shall carry out such sampling, analyses, measurements, examinations, maintenance and calibrations as set out below and as in accordance with *Schedule C: Control & Monitoring*, of this licence.

Environmental Protection Agency

- 6.1.1 Analyses shall be undertaken by competent staff in accordance with documented operating procedures.
- 6.1.2 Such procedures shall be assessed for their suitability for the test matrix and performance characteristics shall be determined.
- 6.1.3 Such procedures shall be subject to a programme of Analytical Quality Control using control standards with evaluation of test responses.
- 6.1.4 Where any analysis is sub-contracted it shall be to a competent laboratory.
- 6.2 The licensee shall ensure that:
  - (iii) sampling and analysis for all parameters listed in the Schedules to this licence; and
  - (iv) any reference measurements for the calibration of automated measurement systems;

shall be carried out in accordance with CEN-standards. If CEN standards are not available, ISO, national or international standards that will ensure the provision of data of an equivalent scientific quality shall apply.

- 6.3 All automatic monitors and samplers shall be functioning at all times (except during maintenance and calibration) when the activity is being carried on unless alternative sampling or monitoring has been agreed in writing by the Agency for a limited period. In the event of the malfunction of any continuous monitor, the licensee shall contact the Agency as soon as practicable, and alternative sampling and monitoring facilities shall be put in place. The use of alternative equipment, other than in emergency situations, shall be as agreed by the Agency.
- 6.4 Monitoring and analysis equipment shall be maintained as necessary so that monitoring accurately reflects the emission/discharge (or ambient conditions where that is the monitoring objective).
- 6.5 All groundwater-monitoring infrastructure shall be maintained.
- 6.6 The licensee shall ensure that groundwater monitoring well sampling equipment is available/installed on-site and is fit for purpose at all times. The sampling equipment shall be to Agency specifications.
- 6.7 All treatment/abatement and emission control equipment shall be calibrated and maintained in accordance with the instructions issued by the manufacturer/supplier or installer.
- 6.8 The frequency, methods and scope of monitoring, sampling and analyses, as set out in this licence, may be amended with the agreement of the Agency following evaluation of test results.
- 6.9 The licensee shall prepare a programme, to the satisfaction of the Agency, for the identification and reduction of fugitive emissions using an appropriate combination of best available techniques. This programme shall be included in the Environmental Management Programme.
- 6.10 The integrity and water tightness of all underground pipes, tanks, bunding structures and containers and their resistance to penetration by water or other materials carried or stored therein shall be tested and demonstrated by the licensee at least once every three years and reported to the Agency on each occasion. This testing shall be carried out in accordance with any guidance published by the Agency. A written record of all integrity tests and any maintenance or remedial work arising from them shall be maintained by the licensee.
- 6.11 The drainage system (i.e., gullies, manholes, any visible drainage conduits and such other aspects as may be agreed) and bunds, silt traps and oil separators shall be inspected weekly and desludged as necessary. All sludge and drainage from these operations shall be collected for safe disposal. The drainage system, bunds, silt traps and oil interceptors shall be properly maintained at all times.
- 6.12 Litter Control
  - 6.12.1 All loose litter or other waste, placed on or in the vicinity of the facility, other than in accordance with the requirements of this licence, shall be removed, subject to the

Environmental Protection Agency

agreement of the landowners, immediately and in any event by 10.00 am of the next working day after such waste is discovered.

- 6.12.2 The licensee shall ensure that all vehicles delivering waste to and removing waste and materials from the facility are appropriately covered.
- 6.13 Dust/Odour Control
  - 6.13.1 The licensee shall undertake, at a frequency to be agreed or directed by the Agency, in any case to be no less than once every three years, an odour impact assessment. The assessment shall identify and quantify all significant odour sources at the facility and shall include an assessment of the suitability and adequacy of the odour abatement system. Any recommendations arising from the odour impact assessment shall be implemented following agreement by the Agency.
  - 6.13.2 In dry weather, site roads and any other areas used by vehicles shall be sprayed with water as and when required to minimise airborne dust nuisance.
- 6.14 Monitoring Locations
  - 6.14.1 The licensee shall provide an additional dust monitoring location, annotated A2-1, at the exit from the air extraction system **if instructed by the Agency**. This location is to be identified using an eight-digit grid reference number.
  - 6.14.2 The licensee shall maintain an appropriately scaled drawing showing all the monitoring locations that are stipulated in this licence including any noise-sensitive locations and private wells to be monitored. The drawing shall include the eight-digit national grid reference of each monitoring point.
- 6.15 Nuisance Monitoring

The licensee shall, at a minimum of one-week intervals inspect the facility and its immediate surrounds for nuisances caused by litter, vermin, birds, flies, mud, dust and odours. The licensee shall maintain a record of all nuisance inspections.

- 6.16 Storm Water
  - 6.16.1 A visual examination of the storm water discharges shall be carried out daily. A log of such inspections, shall be maintained.
  - 6.16.2 The licensee shall, within three months of the date of grant of this licence, develop and maintain to the satisfaction of the Agency a response programme to address instances where the trigger level values, as set in condition 5.5 of this licence, are exceeded. This response programme shall include actions designed to ensure that there will be no storm water emissions of environmental significance.
- 6.17 Noise

The licensee shall carry out a noise survey of the site operations annually. The survey programme shall be undertaken in accordance with the methodology specified in the 'Guidance Note for Noise: Licence Applications, Surveys and Assessments in Relation to Scheduled Activities (NG4)' as published by the Agency.

- 6.18 An inspection system for the detection of leaks on all flanges and valves on over-ground pipes used to transport materials other than water shall be developed and maintained.
- 6.19 Pollutant Release and Transfer Register (PRTR)

The licensee shall prepare and report a PRTR for the site. The substance and/or wastes to be included in the PRTR shall be as agreed by the Agency each year by reference to EC Regulations No. 166/2006 concerning the establishment of the European Pollutant Release and Transfer Register. The PRTR shall be prepared in accordance with any relevant guidelines issued by the Agency and shall be submitted electronically in specified format and as part of the AER.

6.20 The licensee shall **maintain** a Data Management System for collation, archiving, assessing and graphically presenting the monitoring data generated as a result of this licence.

*Reason:* To provide for the protection of the environment by way of treatment and monitoring of emissions.

# Condition 7. Resource Use and Energy Efficiency

- 7.1 The licensee shall carry out an audit of the energy efficiency of the site within one year of the date of grant of this licence. The audit shall be carried out in accordance with the guidance published by the Agency, "Guidance Note on Energy Efficiency Auditing". The energy efficiency audit shall be repeated at intervals as required by the Agency.
- 7.2 The audit shall identify all practicable opportunities for energy use reduction and efficiency and the recommendations of the audit will be incorporated into the Schedule of Environmental Objectives and Targets under Condition 2 above.
- 7.3 The licensee shall identify opportunities for reduction in the quantity of water used on site including recycling and reuse initiatives, wherever possible. Reductions in water usage shall be incorporated into Schedule of Environmental Objectives and Targets.
- 7.4 The licensee shall undertake an assessment of the efficiency of use of raw materials in all processes, having particular regard to the reduction in waste generated. The assessment should take account of best international practice for this type of activity. Where improvements are identified, these shall be incorporated into the Schedule of Environmental Objectives and Targets.

Reason: To provide for the efficient use of resources and energy in all site operations.

## Condition 8. Materials Handling

- 8.1 Disposal or recovery of waste on-site shall only take place in accordance with the conditions of this licence and in accordance with the appropriate National and European legislation and protocols.
- 8.2 Waste sent off-site for recovery or disposal shall be transported only by an authorised waste contractor. The waste shall be transported from the site of the activity to the site of recovery/disposal only in a manner that will not adversely affect the environment and in accordance with the appropriate National and European legislation and protocols.
- 8.3 The licensee shall ensure that, in advance of transfer to another person, waste shall be classified, packaged and labelled in accordance with National, European and any other standards which are in force in relation to such labelling.
- 8.4 The loading and unloading of materials shall be carried out in designated areas protected against spillage and leachate run-off.
- 8.5 Waste shall be stored in designated areas, protected as may be appropriate against spillage and leachate run-off. The waste shall be clearly labelled and appropriately segregated.
- 8.6 No waste classified as green list waste in accordance with the EU Shipment of Waste Regulations (Council Regulation EEC No. 1013/2006, as may be amended) shall be consigned for recovery without the agreement of the Agency.
- 8.7 Waste for disposal/recovery off-site shall be analysed in accordance with *Schedule C: Control & Monitoring*, of this licence.
- 8.8 Unless approved in writing, in advance, by the Agency the licensee is prohibited from mixing a hazardous waste of one category with a hazardous waste of another category or with any other non-hazardous waste.
- 8.9 The licensee shall neither import waste into the State nor export waste out of the State except in accordance with the relevant provisions of Regulation (EC) No 1013/2006 of the European

Parliament and of the Council of 14th June 2006 on shipments of waste and associated national regulations.

- 8.10 Waste Acceptance and Characterisation Procedures
  - 8.10.1 Waste shall only be accepted at the facility from Local Authority waste collection or transport vehicles or holders of waste permits, unless exempted or excluded, issued under the Waste Management Acts 1996 to 2013. Copies of these waste collection permits shall be maintained at the facility.
  - 8.10.2 The licensee shall maintain and operate detailed written procedures for the acceptance and handling of wastes.
  - 8.10.3 Waste shall be accepted at the facility only from known customers or new customers subject to initial waste profiling and waste characterisation off-site. The written records of this off-site waste profiling and characterisation shall be retained by the licensee for all active customers and for a two year period following termination of licensee/customer agreements.
  - 8.10.4 Waste arriving at the facility shall have its documentation checked at the point of entry to the facility and subject to this verification, weighed, documented and directed to the Waste Transfer Building. Each load of waste arriving at the Waste Transfer Building shall be inspected upon tipping within this building. Only after such inspections shall the waste be processed for disposal or recovery.
  - 8.10.5 Any waste deemed unsuitable for processing at the facility and/or in contravention of this licence shall be immediately separated and removed from the facility at the earliest possible time. Temporary storage of such wastes shall be in a designated Waste Quarantine Area. Waste shall be stored under appropriate conditions in the quarantine area to avoid putrefaction, odour generation, the attraction of vermin and any other nuisance or objectionable condition.

#### 8.11 Operational Controls

- 8.11.1 All waste processing shall be carried out inside the waste transfer building.
- 8.11.2 All dry recyclable materials shall be stored internally within the waste transfer building unless otherwise agreed by the Agency.
- 8.11.3 Mechanically recovered marketable waste produced at the facility may be stored outdoors only under conditions that will not diminish the integrity or value of the recovered waste or lead to nuisance emissions including dust and odour. All such storage areas shall be covered except as may be agreed by the Agency.
- 8.11.4 All putrescible and other odour forming waste for disposal stored overnight at the facility shall be stored in suitably covered and enclosed containers, and shall be removed from the facility within 48 hours of its arrival to avoid odour nuisance.
- 8.11.5 The floor of the waste transfer building shall be cleaned on a weekly basis and on a daily basis where putrescible waste is handled. The floor of the storage bays for recovered wastes shall be washed down and cleaned on each occasion such bays are emptied, or as a minimum on a weekly basis.
- 8.11.6 Scavenging shall not be permitted at the facility.
- 8.11.7 All tanks and drums shall be labelled to clearly indicate their contents.
- 8.11.8 There shall be no unauthorised public access to the facility.
- 8.11.9 No dirty vehicles with the potential to foul the public highway shall be permitted to exit the site.
- 8.11.10 The licensee shall provide and use adequate lighting during the operation of the facility in hours of darkness.
- 8.11.11 The road network in the vicinity of the facility shall be kept free from any debris caused by vehicles entering or leaving the facility. Any such debris or deposited materials shall be removed without delay.

- 8.12 Only waste that has been subject to treatment may be dispatched for disposal at a landfill facility. Treatment shall reflect published EPA guidance as set out in *Municipal Solid Waste Pre-treatment and Residuals Management*, EPA, 2009. With the agreement of the Agency, this condition shall not apply to:
  - (i) Inert waste for which treatment is not technically feasible; and
  - (ii) Other waste for which such treatment does not contribute to the objectives of the Landfill Directive as set out in Article 1 of the Directive by reducing the quality of the waste or the hazards to human health or the environment.
- 8.13 Each load of waste dispatched to landfill shall be accompanied by documentation verifying the type of treatment carried out on the waste and, in the case of municipal waste or treated municipal waste, its biodegradable content.
- 8.14 Unless agreed by the Agency the licensee shall not dispose of any waste that has been accepted at the facility for the purpose of a recovery activity.

Reason: To provide for the appropriate handling of material and the protection of the environment.

## Condition 9. Accident Prevention and Emergency Response

- 9.1 The licensee shall ensure that a documented Accident Prevention Procedure is in place that addresses the hazards on-site, particularly in relation to the prevention of accidents with a possible impact on the environment. This procedure shall be reviewed annually and updated as necessary.
- 9.2 The licensee shall ensure that a documented Emergency Response Procedure is in place, that addresses any emergency situation which may originate on-site. This procedure shall include provision for minimising the effects of any emergency on the environment. This procedure shall be reviewed annually and updated as necessary.
- 9.3 Incidents
  - 9.3.1 In the event of an incident the licensee shall immediately:
    - (i) carry out an investigation to identify the nature, source and cause of the incident and any emission arising therefrom;
    - (ii) isolate the source of any such emission;
    - (iii) evaluate the environmental pollution, if any, caused by the incident;
    - (iv) identify and execute measures to minimise the emissions/malfunction and the effects thereof;
    - (v) identify the date, time and place of the incident;
    - (vi) notify the Agency and other relevant authorities.
  - 9.3.2 The licensee shall provide a proposal to the Agency for its agreement within one month of the incident occurring or as otherwise agreed by the Agency, to:
    - (i) identify and put in place measures to avoid recurrence of the incident; and
    - (ii) identify and put in place any other appropriate remedial actions.
- 9.4 Emergencies
  - 9.4.1 In the event of a breakdown of equipment or any other occurrence which results in the closure of the transfer station building, any waste arriving at or already collected at the facility shall be transferred directly to appropriate landfill sites or any other appropriate facility until such time as the transfer station building is returned to a fully operational status. Such a breakdown event will be treated as an emergency and rectified as soon as possible.

- 9.4.2 All significant spillages occurring at the facility shall be treated as an emergency and immediately cleaned up and dealt with so as to alleviate their effects.
- 9.4.3 No waste shall be burnt within the boundaries of the facility. A fire at the facility shall be treated as an emergency and immediate action shall be taken to extinguish it and notify the appropriate authorities.
- 9.4.4 In the event that monitoring of local wells indicates that the facility is having a significant adverse effect on the quantity and/or quality of the water supply this shall be treated as an emergency and the licensee shall provide an alternative supply of water to those affected.

Reason: To provide for the protection of the environment.

## Condition 10. Decommissioning & Residuals Management

- 10.1 Following termination, or planned cessation for a period greater than six months, of use or involvement of all or part of the site in the licensed activity, the licensee shall, to the satisfaction of the Agency, decommission, render safe or remove for disposal/recovery any soil, subsoil, buildings, plant or equipment, or any waste, materials or substances or other matter contained therein or thereon, that may result in environmental pollution.
- 10.2 Decommissioning Management Plan (DMP)
  - 10.2.1 The licensee shall prepare, to the satisfaction of the Agency, a fully detailed and costed plan for the decommissioning or closure of the site or part thereof. This plan shall be submitted to the Agency for agreement within six months of the date of grant of the licence.
  - 10.2.2 The plan shall be reviewed annually and proposed amendments thereto notified to the Agency for agreement as part of the AER. No amendments may be implemented without the agreement of the Agency.
  - 10.2.3 The licensee shall have regard to the Environmental Protection Agency Guidance on Environmental Liability Risk Assessment, Residuals Management Plans and Financial Provision when implementing Condition 10.2.1 above.
- 10.3 The Decommissioning Management Plan shall include, as a minimum, the following:
  - (i) a scope statement for the plan;
  - (ii) the criteria that define the successful decommissioning of the activity or part thereof, which ensures minimum impact on the environment;
  - (iii) a programme to achieve the stated criteria;
  - (iv) where relevant, a test programme to demonstrate the successful implementation of the decommissioning plan; and
  - (v) details of the costings for the plan and the financial provisions to underwrite those costs.
- 10.4 A final validation report to include a certificate of completion for the Decommissioning Management Plan, for all or part of the site as necessary, shall be submitted to the Agency within three months of execution of the plan. The licensee shall carry out such tests, investigations or submit certification, as requested by the Agency, to confirm that there is no continuing risk to the environment.

**Reason:** To make provision for the proper closure of the activity ensuring protection of the environment.

## Condition 11. Notification, Records and Reports

- 11.1 The licencee shall notify the Agency by both telephone and either email or webform, to the Agency's headquarters in Wexford, or to such other Agency office as may be specified by the Agency, as soon as practicable after the occurrence of any of the following:
  - (i) any release of environmental significance to atmosphere from any potential emissions point including bypasses;
  - (ii) any emission that does not comply with the requirements of this licence;
  - (iii) any malfunction or breakdown of key control equipment or monitoring equipment set out in *Schedule C: Control and Monitoring*, of this licence which is likely to lead to loss of control of the abatement system; and
  - (iv) any incident with the potential for environmental contamination of surface water or groundwater, or posing an environment threat to air or land, or requiring an emergency response by the Local Authority.

The licensee shall include as part of the notification, date and time of the incident, summary details of the occurrence, and where available, the steps taken to minimise any emissions.

- 11.2 In the case of any incident relating to discharges to water, the licensee shall notify the Local and Water Services Authority and Inland Fisheries Ireland as soon as practicable after such an incident.
- 11.3 The licensee shall make a record of any incident. This record shall include details of the nature, extent, and impact of, and circumstances giving rise to, the incident. The record shall include all corrective actions taken to manage the incident, minimise wastes generated and the effect on the environment, and avoid recurrence. The licensee shall, as soon as practicable following incident notification, submit to the Agency the incident record.
- 11.4 The licensee shall record all complaints of an environmental nature related to the operation of the activity. Each such record shall give details of the date and time of the complaint, the name of the complainant (if provided), and give details of the nature of the complaint. A record shall also be kept of the response made in the case of each complaint.
- 11.5 The licensee shall record all sampling, analyses, measurements, examinations, calibrations and maintenance carried out in accordance with the requirements of this licence and all other such monitoring which relates to the environmental performance of the facility.
- 11.6 The licensee shall as a minimum ensure that the following documents are accessible at the site:
  - (i) the licences relating to the facility;
  - (ii) the current EMS for the facility;
  - (iii) the previous year's AER for the facility;
  - (iv) records of all sampling, analyses, measurements, examinations, calibrations and maintenance carried out in accordance with the requirements of this licence and all other such monitoring which relates to the environmental performance of the facility;
  - (v) relevant correspondence with the Agency;
  - (vi) up-to-date site drawings/plans showing the location of key process and environmental infrastructure, including monitoring locations and emission points;
  - (vii) up-to-date Standard Operational Procedures for all processes, plant and equipment necessary to give effect to this licence or otherwise to ensure that standard operation of such processes, plant or equipment does not result in unauthorised emissions to the environment; and
  - (viii) any elements of the licence application referenced in this licence.

This documentation shall be available to the Agency for inspection at all reasonable times.

- 11.7 The licensee shall submit to the Agency, by the 31<sup>st</sup> March of each year, an AER covering the previous calendar year. This report, which shall be to the satisfaction of the Agency, shall include as a minimum the information specified in *Schedule E: Annual Environmental Report*, of this licence and shall be prepared in accordance with any relevant guidelines issued by the Agency.
- 11.8 A full record, which shall be open to inspection by authorised persons of the Agency at all times, shall be kept by the licensee on matters relating to the waste management operations

and practices at this site. This record shall be maintained on a monthly basis and shall as a minimum contain details of the following:

- (i) the tonnages and EWC Code for the waste materials imported and/or sent off-site for disposal/recovery;
- (ii) the names of the agent and carrier of the waste, and their waste collection permit details, if required (to include issuing authority and vehicle registration number);
- (iii) details of the ultimate disposal/recovery destination facility for the waste and its appropriateness to accept the consigned waste stream, to include its permit/licence details and issuing authority, if required;
- (iv) written confirmation of the acceptance and disposal/recovery of any hazardous waste consignments sent off-site;
- (v) details of all waste consigned abroad for Recovery and classified as 'Green' in accordance with the EU Shipment of Waste Regulations (Council Regulation EEC No. 1013/2006, as may be amended). The rationale for the classification must form part of the record;
- (vi) details of any rejected consignments;
- (vii) details of any approved waste mixing;
- (viii) the results of any waste analyses required under Schedule C: Control & Monitoring, of this licence; and
- (ix) the tonnage and EWC Code for the waste materials recovered/disposed on-site.
- 11.9 The licensee shall maintain a written record for each load of waste arriving at and departing from the facility. The licensee shall record the following:
  - (i) the date and time;
  - (ii) the name of the carrier (including if appropriate, the waste carrier registration details);
  - (iii) the vehicle registration number;
  - (iv) the trailer, skip or other container unique identification number (where relevant);
  - (v) the name of the producer(s)/collector(s) of the waste as appropriate;
  - (vi) the name of the waste facility (if appropriate) from which the load originated including the waste licence or waste permit register number;
  - (vii) a description of the waste including the associated EWC/HWL codes;
  - (viii) the quantity of the waste, recorded in tonnes;
  - (ix) details of the treatment(s) to which the waste has been subjected;
  - (x) the classification and coding of the waste, including whether MSW or otherwise;
  - (xi) whether the waste is for disposal or recovery and if recovery for what purpose;
  - (xii) the name of the person checking the load; and where loads or wastes are removed or rejected, details of the date of occurrence, the types of waste and the facility to which they were removed.
- 11.10 A record shall be kept of each consignment of trade effluent, leachate and/or contaminated storm water removed from the facility. The record shall include the following:
  - (i) the name of the carrier;
  - (ii) the date and time of removal of trade effluent, leachate and/or contaminated storm water from the facility;
  - (iii) the volume of trade effluent, leachate and/or contaminated storm water, in cubic metres, removed from the facility on each occasion;
  - (iv) the name and address of the Wastewater Treatment Plant to which the trade effluent, leachate and/or contaminated storm water was transported; and
  - (v) any incidents or spillages of trade effluent, leachate and/or contaminated storm water during its removal or transportation.
- 11.11 Waste Recovery Reports

The licensee shall as part of the Annual Environmental Report for the site submit a report on the contribution by this facility to the achievement of the waste recovery objectives stated in Condition 2.2.2.2 and as otherwise may be stated in National and European Union waste policies and shall, as a minimum, include the following:

- (i) the recovery of metals;
- (ii) the recovery of C & D derived waste materials;
- (iii) the separation and recovery of other recyclable materials.
- 11.12 The licensee shall submit report(s) as required by the conditions of this licence to the Agency's Headquarters in Wexford, or to such other Agency office as may be specified by the Agency.
- 11.13 All reports shall be certified accurate and representative by the facility manager or a nominated, suitably qualified and experienced deputy.

Reason: To provide for the collection and reporting of adequate information on the activity.

## **Condition 12.** Financial Charges and Provisions

- 12.1 Agency Charges
  - 12.1.1 The licensee shall pay to the Agency an annual contribution of €10,958, or such sum as the Agency from time to time determines, having regard to variations in the extent of reporting, auditing, inspection, sampling and analysis or other functions carried out by the Agency, towards the cost of monitoring the activity as the Agency considers necessary for the performance of its functions under the Waste Management Acts 1996 to 2013. The first payment shall be a pro-rata amount for the period from the date of grant of this licence to the  $31^{st}$  day of December, and shall be paid to the Agency within one month from the date of grant of the licence. In subsequent years the licensee shall pay to the Agency such revised annual contribution as the Agency of its relevant functions under the Waste Management Acts 1996 to 2013, and all such payments shall be made within one month of the date upon which demanded by the Agency.
  - 12.1.2 In the event that the frequency or extent of monitoring or other functions carried out by the Agency needs to be increased, the licensee shall contribute such sums as determined by the Agency to defray its costs in regard to items not covered by the said annual contribution.
- 12.2 Water Services Authority Charges

The licensee shall pay to the Water Services Authority such sum as may be determined from time to time, having regard to the variations in the cost of providing drainage and the variation in effluent reception and treatment costs. Payment to be made on demand.

- 12.3 Environmental Liabilities
  - 12.3.1 The licensee shall as part of the AER, provide an annual statement as to the measures taken or adopted at the site in relation to the prevention of environmental damage, and the financial provisions in place in relation to the underwriting of costs for remedial actions following anticipated events (including closure) or accidents/incidents, as may be associated with the carrying on of the activity.
  - 12.3.2 The licensee shall arrange for the **revision**, by an independent and appropriately qualified consultant, of a comprehensive and fully costed Environmental Liabilities Risk Assessment (ELRA) which addresses the liabilities from past and present activities. The assessment shall include those liabilities and costs identified in Condition 10 for execution of the DMP. A report on this assessment shall be submitted to the Agency for agreement within twelve months of the date of grant of this licence. The ELRA shall be reviewed as necessary to reflect any significant

Environmental Protection Agency

change on site, and in any case every three years following initial agreement. Review results are to be notified as part of the AER.

- 12.3.3 As part of the measures identified in Condition 12.3.1, the licensee shall, to the satisfaction of the Agency make financial provision to cover any liabilities associated with the operation (including closure). The amount of indemnity held shall be reviewed and revised as necessary, but at least annually. Proof of renewal or revision of such financial indemnity shall be included in the annual 'Statement of Measures' report identified in Condition 12.3.1.
- 12.3.4 The licensee shall revise the cost of closure annually and any adjustments shall be reflected in the financial provision made under Condition 12.3.3.
- 12.3.5 The licensee shall have regard to the Environmental Protection Agency Guidance on Environmental Liability Risk Assessment, Residuals Management Plans and Financial Provision when implementing Conditions 12.3.2 and 12.3.3 above.

Reason: To provide for adequate financing for monitoring and financial provisions for measures to protect the environment.

### **SCHEDULE A:** Limitations

A.1 Limitations on the facility

The following waste related processes are authorised:

(i) Shredding, screening, sorting, separating, baling, repackaging of dry recyclable waste.

-+\*+-

- (ii) Sorting of C&D waste.
- (iii) Storage of waste

No additions to these processes are permitted unless agreed in advance with the Agency.

#### A.2 Waste Acceptance

#### Table A.2 Waste Categories and Quantities

Non-Hazardous Waste Type Note 1	Maximum <sup>Note 2</sup> (Tonnes Per Annum)
Municipal Solid Waste	27,200
Commercial and Industrial	28,000
Construction & Demolition	4,800
Total	60,000

Note 1: Any proposals to accept other compatible non-hazardous waste types must be agreed in advance by the Agency.
 Note 2: The limitation on individual non-hazardous waste types may be varied with the agreement of the Agency subject to the total limit for non-hazardous waste staying the same.

## **SCHEDULE B:** Emission Limits

#### **B.1** Emissions to Air

There shall be no emissions to air of environmental significance.

------**\***------

•

#### **B.2** Emissions to Water

There shall be no emissions to water of environmental significance.

### **B.3** Emissions to Sewer

There shall be no emissions to sewer.

#### **B.4** Noise Emissions

Environmental Protection Agency Licence Reg. No. W0104-03

Daytime dB L <sub>Ar.T</sub>	Evening time dB L <sub>Ar.T</sub>	Night-time dB L <sub>Aeg,T</sub>
(30 minutes)	(30 minutes)	(15-30 minutes)
55	50	45 <sup>Note I</sup>

Note 1: There shall be no clearly audible tonal component or impulsive component in the noise emission from the activity at any noise-sensitive location.

---

#### **B.5** Ambient Air limits

#### **Dust Deposition Limits:**

Monitoring Point Reference No.: D1, D2, D3 and D4.

Parameter	Level (mg/m <sup>2</sup> per day) Note
Total dust deposition	350

----

Note 1: 30 day composite sample with the results expressed as mg/m<sup>2</sup> per day.

## SCHEDULE C: Control & Monitoring

#### C.1.1. Control of Emissions to Air

There shall be no emissions to air of environmental significance.

#### C.1.2. Monitoring of Emissions to Air

Emission Point Reference No:	A2-1
Emission point location:	To be agreed with the Agency.

Parameter	Monitoring Frequency	Analysis Method/Technique
Particulates	Biannually Note I	Standard Method
	July Deline Deline Defension No. 42.1	· · · · · ·

-----

-:--

Note 1: Monitoring is required when Emission Point Reference No. A2-1 is installed.

#### C.2.1. Control of Emissions to Water

There shall be no emissions to water of environmental significance.

#### C.2.2. Monitoring of Emissions to Water

There shall be no emissions to water of environmental significance.

-+\*+-

\_\_...

C.2.3. Control of Storm Water Emissions

Emission Point Reference No:	SW1 (Formerly SW02)
Description of Treatment:	Interceptor/Silt Traps

Control Parameter	Monitoring	Key Equipment Note 1
Oil removal	Mineral oil content in water at discharge point	Class 1 Full Retention Oil Interceptor Shut-off valve.
Suspended solids	Suspended solids concentration in water at discharge point	Silt Trap

Note 1: The licensee shall maintain appropriate access to standby and/or spares to ensure the operation of the abatement system.

#### C.2.4. Monitoring of Storm Water Emissions

Emission Point Reference No:

SW1 (Formerly SW02)

Parameter		Key Equipment/Technique
рН	Weekly	pH electrode/meter with recorder
Conductivity	Weekly	Conductivity Meter
Visual Inspection	Weekly	Sample and examine for colour and odour <sup>Note I</sup> .
BOD	Quarterly	Standard method
COD	Quarterly	Standard method
Suspended Solids	Quarterly	Standard method
Total Ammonia	Quarterly	Standard method
Chloride	Quarterly	Standard method
Mineral Oils	Quarterly	Standard method

Note 1: Where there is evidence of contamination, additional samples should be analysed and the full suite of parameters shown tested.

#### C.3.1. Control of Emissions to Sewer

There shall be no emissions to sewer.

#### C.3.2. Monitoring of Emissions to Sewer

There shall be no emissions to Sewer.

### C.4 Tankered Effluent and Waste Analysis

Waste Class	Frequency	Parameter	Method
Trade effluent sent off-	Quarterly	BOD, COD, Metals,	Standard Method
site for disposal	Quarterly	Mineral Oils, Chloride,	Standard Method

٠.

		Ammonia (NH <sub>4</sub> ), Sulphate, Suspended Solids, pH	
Municipal waste dispatched to landfill	As may be specified by the Agency	BMW content	Waste characterisation or other methods as may be specified.
Other Note 1			

Note 1: Analytical requirements to be determined on a case by case basis.

### C.5 Noise Monitoring

Location	Measurement	Frequency
N1, N2, N3, N4 and NSL as indicated on Drawing No. 1 in the	Daytime dB L <sub>Ar. T</sub> (30 minutes)	
application documentation.	Evening dB L <sub>Ar. T</sub> (30 minutes)	Quarterly
Other noise sensitive locations within the vicinity of the facility or as may be otherwise agreed/directed, or as may be amended under Condition 6.9	Night-time dB L <sub>Aeq. T</sub> (15 – 30 minutes)	
Period	Minimum Survey D	uration
Daytime	4 hour survey with a minimum of 3 sa monitoring location. Note 2	mpling periods at each noise
Evening-time	2 hours survey with a minimum of 1 so monitoring location.	ampling period at each noise
Night-time <sup>Note 1</sup>	3 hour survey with a minimum of 2 sa monitoring location.	mpling periods at each noise

Note 1: Night-time measurements should be made between 2300hrs and 0400hrs, Sunday to Thursday, with 2300hrs being the preferred start time.

**Note 2:** Sampling period is to be the time period T stated within the relevant licence. Typically this will be either 15 minutes or 30 minutes in duration. This applies to day, evening and night time periods.

-•\*•-

### Air Monitoring

Locations:

D1, D2, D3 and D4

Parameter	Monitoring Frequency	Analysis Method/Technique
Dust deposition	Three times per annum Note T	Standard Method

Note 1: Twice during the period May to September.

### Groundwater Monitoring

Monitoring point reference No.:

GW1A, GW2 and GW3

Parameter	Monitoring Frequency	Analysis Method/Techniques
Visual Inspection	Quarterly	•*
Total Ammonia	Quarterly	Standard Method
Conductivity	Quarterly	Standard Method
Diesel Range Organics	Quarterly	Standard Method
рН	Quarterly	pH electrode/meter
Groundwater Level	Annually	Standard Method
COD	Annually	Standard Method
Nitrate	Annually	Standard Method
Total Ammonia	Annualiy	Standard Method
Total Nitrogen	Annually	Standard Method
Chloride	Annually	Standard Method
Fluoride	Annually	Standard Method
Arsenic	Annually	Standard Method
Mercury	Annually	Standard Method
Sulphate	Annually	Standard Method
Total Organic Carbon	Annually	Standard Method
Faecal Coliforms	Annually	Standard Method
Total Coliforms	Annually	Standard Method
Organic Compounds <sup>Notel</sup>	Annually	Standard Method

Note 1: Screening for pollutant list substances (such as US EPA volatile and/or semi-volatile compounds).

# SCHEDULE D: Specified Engineering Works

Specified Engineering Works

Construction of the treated waste water and trade effluent holding tank.

Installation of dust suppression infrastructure.

Any other works notified in writing to the Agency.

# SCHEDULE E: Annual Environmental Report

<ul> <li>Waste management record.</li> <li>Waste Recovery Report.</li> <li>Waste activities carried out at the facility.</li> <li>Quantity and composition of waste recovered, received and disposed of during the reporting period and eac previous year (relevant EWC codes and waste description to be used).</li> <li>Full title and written summary of any procedures developed by the licensee in the year relating to the facilit operation.</li> <li>Review of nuisance controls.</li> <li>Volume of trade effluent/treated waste water produced and volume transported off-site.</li> <li>Resource consumption summary.</li> <li>Complaints summary.</li> <li>Complaints summary.</li> <li>Schedule of Environmental Objectives and Targets.</li> <li>Environmental management programme – report for previous year.</li> <li>Pollutant Release and transfer Register – report for previous year.</li> <li>Pollutant Release and transfer Register – proposal for current year.</li> <li>Pollutant Release and transfer Register – proposal for current year.</li> <li>Noise monitoring report summary.</li> <li>Tank and pipeline testing and inspection report.</li> <li>Report on the assessment of the efficiency of use of raw materials in processes and the reduction in wast generated.</li> <li>Report on progress made and proposals being developed to minimise water demand and the volume of trade effluent discharges.</li> <li>Development/Infrastructural works summary (completed in previous year or prepared for current year).</li> <li>Review of decommissioning management plan.</li> <li>Statement of measures in relation to prevention of environmental damage and remedial actions (Environmental Liabilities).</li> <li>Environmental Liabilities Risk Assessment Review (every three years or more frequently as dictated by relevan on-site change including financial provisions.</li> <li>Revior on decommissioning management plan.</li> <li>Statement of measures in relation to prevention of environmental damage and remedial actions (Environmental Liabilities).</li> <li>Envir</li></ul>	Emissions from t	ne facility.
