Reg. No. W0032-03

re: Notice in accordance with Article 14(2)(b)(ii) of the Waste Management (Licensing) Regulations

Dear Mr. Hynes,

I am to refer to the above referenced application for a waste licence relating to a facility at Dungarvan Waste Disposal Site, Ballynamuck Middle, Dungarvan, Co. Waterford.

Having examined the documentation submitted, I am to advise that the Agency is of the view that the documentation does not comply with Article 12 of the Waste Management (Licensing) Regulations. You are therefore requested, in accordance with Article 14(2)(b)(ii) of the regulations, to take the steps and supply the information detailed below:

ARTICLE 12 COMPLIANCE REQUIREMENTS

1. On drawing no. MDR0350/GD0714, R02, there are two ponds illustrated called the “Lagoon Marsh” and “Marsh Area”. State whether these are lined ponds. State whether the discharge from the ICW passes through these ponds. If it does not, state the purpose of these ponds.
2. Illustrate on a new drawing (or on a drawing referred to below) the exact location of the discharge from the ICW/pond system to the Colligan River. State the maximum proposed rate of discharge (flow) to the Colligan River. State whether the discharge is constant or varies depending on the tide, level in the river or other reasons, and explain the manner by which the discharge rate is controlled.
3. Submit a new drawing, to replace all earlier drawings, some of which are contradictory, showing storm water discharges from the whole facility. Include their symbols and grid reference numbers.
4. Submit a new drawing, to replace all earlier drawings, some of which are contradictory, showing monitoring locations within and outside the site boundary. Include their symbols and grid reference numbers.
5. Submit the most recent monitoring results for the final effluent and the location of this monitoring.

6. Submit a new drawing showing the drainage system for wastewater generated in the waste transfer station, green waste area and the civic amenity area. State whether all this wastewater is treated in the ICW system.

Your reply to this notice should include a **revised non-technical summary** which reflects the information you supply in compliance with the notice, insofar as that information impinges on the non-technical summary.

In the case where any drawings already submitted are subject to revision consequent on this request, a revised drawing should be prepared in each case. It is not sufficient to annotate the original drawing with a textual correction. Where such revised drawings are submitted, provide a list of drawing titles, drawing numbers and revision status, which correlates the revised drawings with the superseded versions.

Please supply the information in the form of a one original plus one copy in hardcopy format within **two weeks** of the date of this notice. In addition please submit two copies of the requested information in electronic searchable PDF format on a CD-ROM to the Agency. Please note that all maps/drawings should not exceed A3 in size.

Please note that the application's register number is **W0032-03**. Please direct all correspondence in relation to this matter to Administration, *Licensing Unit, Office of Climate, Licensing & Resource Use, Environmental Protection Agency, Headquarters, PO Box 3000, Johnstown Castle Estate, County Wexford* quoting the register number.

Yours sincerely,

Ewa Babiarczyk
Inspector
Office of Climate, Licensing & Resource Use
