Public Notices

APPLICATION TO THE ENVIRONMENTAL PROTECTION AGENCY FOR A WASTE LICENCE

Public Notices

Notice is hereby given in accordance with the provisions of the Third and Fourth Schedules of the Waste Management Act 1996 (as amended) and Articles 6 and 7 of the Waste Management (Licensing) Regulations 2004 (SI No 395 of 2004) that Cork County Council, County Hall, Carrigrohane, Cork, acting as agent for the Minister for Agriculture, Food and the Marine, Agriculture House, Kildare Street, Dublin 2, will lodge an application for a Waste Licence for the proposed remediation of the East Tip Haulbowline Island, Co. Cork (National Grid Reference E17974023 N6535673) with the Environmental Protection Agency on behalf of the Minister.

The Waste Licence Application boundary covers an area of approximately 118 hectares and the proposed development will involve works on the foreshore. It is proposed to remediate the East Tip site by:

- Constructing an engineered capping system over the surface of the waste body and installing a surface water drainage system to limit surface water infiltration.
- Constructing a Perimeter Engineered Structure (PES) to limit tidal inundation to the site.
- Re-profiling and landscaping the site to facilitate the provision of a public park (including grassland, wetland, paths, playing area, car park for 54 no. cars, bicycle parking area, future overflow parking area, entrance feature, boundary and other fencing, bird viewing areas, bird roosting ledge, and all associated landscaping works).

As part of these works it is proposed to recover and recycle slag, scrap metal, C&D material and small scale material where feasible. It is also proposed to reuse recovered materials where feasible. The classes of activity concerned in accordance with the Third Schedule of the Waste Management Act 1996 (as amended) during the Construction phase and/or End use, Maintenance and Aftercare phases are as follows:

- Class D1: Deposit into or on to land (e.g. landfill, etc.)
- Class D4: Surface impoundment (e.g. placement of liquid or sludgy discards into pits, ponds or lagoons, etc.)
- Class D7: Release to seas/oceans including sea-bed insertion
- Class D13: Blending or mixture prior to submission to any of the operations numbered D1 to D12 (if there is no other D code appropriate, this can include preliminary operations prior to disposal including pre-processing such as, amongst others, sorting, crushing, compacting, pelleting, drying, shredding, conditioning or separating prior to submission to any of the operations numbered D1 to D12)
- Class D15: Storage pending any of the operations numbered D1 to D14 (excluding temporary storage (being preliminary storage according to the definition of collection in section 5(1)), pending collection, on the site where the waste is produced)

The classes of activity concerned in accordance with the Fourth Schedule of the Waste Management Act 1996 (as amended) are as follows:

- Class R4: Recycling/reclamation of metals and metal compounds
- Class R5: Recycling/reclamation of other inorganic materials, which includes soil cleaning resulting in recovery of the soil and recycling of inorganic construction materials
- Class R17: Exchange of waste for submission to any of the operations numbered R1 to R11 (if there is no other R code appropriate, this can include preliminary operations prior to recovery including pre-processing such as, amongst others, dismantling, sorting, crushing, compacting, pelleting, drying, shredding, conditioning, repackaging, separating, blending or mixing prior to submission to any of the operations numbered R1 to R11)
- Class R13: Storage of waste pending any of the operations numbered R1 to R12 (excluding temporary storage (being preliminary storage according to the definition of collection in section 5(1)), pending collection on the site where the waste is produced)

The Principal Activity at the site is Class D1 of the Third Schedule as detailed above.

An Environmental Impact Statement (EIS) and a Natura Impact Statement (NIS) will be submitted to the Agency with the application. A copy of the Waste Licence Application, the EIS, the NIS and such further information relating to the application as may be furnished to the Agency in the course of the Agency's consideration of the application will, as soon as is practicable after receipt by the Agency, be available for inspection or purchase, at the Headquarters of the Environmental Protection Agency.

**Environmental Protection Agency,
Johnstown Castle Estate, County Wexford.**
