## Amendments

*Amend Reasons for the Decision Section of the licence, to read as follows*

The Environmental Protection Agency is satisfied, on the basis of the information available, that subject to compliance with the conditions of licence Reg. No. W0009-03 granted on 21/12/2009 and amended on 28/6/2010 and 19/12/2013 as well as any amendments noted herein, any emissions from the activity will comply with and not contravene any of the requirements of Section 83(5) of the Environmental Protection Agency Act 1992, as amended.

A screening for Appropriate Assessment was undertaken to assess, in view of best scientific knowledge and the conservation objectives of the site, if the proposed activity (being the discharge of leachate to a sewer for treatment at the licensed Portrane waste water treatment plant), individually or in combination with other plans or projects is likely to have a significant effect on a European Site(s). In this context, particular attention was paid to the European sites at Rogerstown Estuary SPA [site code 004015], Rogerstown Estuary SAC [site code 00208], Malahide Estuary SAC [site code 00205], Malahide Estuary SPA [site code 004025], Lambay Island SAC [site code 000204], Lambay Island SPA [site code 004069] and the Agency considered, for the reasons set out below, that the proposed activity is not directly connected with or necessary to the management of those sites as European Sites and that it can be excluded on the basis of objective scientific information, that the proposed activity, individually or in combination with other plans or projects, will have a significant effect on a European site, and accordingly the Agency determined that an Appropriate Assessment of the proposed activity is not required. The reasons for this determination are as follows: The discharge of leachate is to a sewer which discharges to the Portrane waste water treatment plant where it is treated prior to discharge to the Irish Sea. The Portrane waste water treatment plant is authorised by the Agency through licence register number D0114-01 and the Agency took into consideration at the time of grant of that licence the impact of the discharge on European sites. **Irish Water** is responsible for ensuring that the discharge from the waste water treatment plant is compliant with the conditions and emission limit values of the waste water discharge licence. The emission limit values are such that the Agency has determined that environmental pollution will not be caused by the discharge.

This clerical amendment shall be cited as Amendment C, to the licence.

**Sealed by the Seal of the Agency on this the 28<sup>th</sup> day of March, 2014**
