**TABLE H.3(i): Generation of waste at the installation and its management**

Waste description	EWC Code (use asterisk to indicate whether hazardous waste or not)	Category per Animal By-products Regulation 1069/2009	Source of waste	Quantity generated (tonnes per month)	Location of recovery or disposal (on-site, off-site, exported)	Method of recovery or disposal (e.g. recycling, energy recovery, other incineration, landfill)
Domestic Refuse	20 03 01		Work areas And canteen	0.5	Disposal	Collected by Mr Binman to Landfill
Fluorescent Tubes	20 01 21 *H		Light throughout unit	1 or 2/month	Re-cycled	Irish Lamps Recycling
Exported Liquid Digestate	19 06 05	Category 2	By product as a result of the process	41,100	Utilized as fertilizer on customer farms	Applied to land by mechanical equipment
Exported Solid Digestate	19 06 06	Category 2	By product as a result of the process	4,570	Utilized as fertilizer on customer farms	Applied to land by mechanical equipment
Waste Water	20 03 06 waste from sewage cleaning		Operational Process	minimal	On-site	Pasteurised and processed through the biogas plant

NOTE 1: Liquid and Solid digestate are included here as they have an EWC Code. We do not however accept them as waste, as they are used as fertilizer on agricultural land to produce crops. As they have a monetary value they are a valuable bi-product of this process.
