Dear Sir or Madam

I refer to your application for waste water discharge licence for the agglomeration named Newmarket and Environs.

I am to advise you in accordance with Regulation 42(8)(a) of the European Communities (Birds and Natural Habitats) Regulations 2011 (S.I. No. 477 of 2011) that the Agency has made a determination that an Appropriate Assessment is not required as the project, individually or in combination with other plans or projects, is not likely to have a significant effect on a European site(s).

The Appropriate Assessment Screening Determination is available to view below this notice. Please direct any queries that you may have in relation to the above to Loretta Joyce at 01-268 0100 or to OCLR Admin Team E.

Yours sincerely

Loretta Joyce,

Appropriate Assessment Screening Determination

In accordance with Regulation 42(1) of the European Communities (Birds and Natural Habitats) Regulations, 2011, S.I. No. 477 of 2011, the Agency has undertaken Appropriate Assessment screening to assess, in view of best scientific knowledge and the conservation objectives of the site, if the activity, individually or in combination with other plans or projects is likely to have a significant effect on a European Sites. In this context, particular attention was paid to the European Sites listed below.

Licence/Permit Application Details:

Reg. No.	D0333-01
Applicant Name:	Irish Water
Location of Agglomeration:	Newmarket and Environs
Licence / Permit Application Date:	27/02/2009
European Site(s) assessed:	Blackwater River (Cork/Waterford) SAC Site Code: 002170
Date of AA Screening Determination:	27/06/2014

AA Screening Determination:

That the activity is not directly connected with or necessary to the management of the site as a European Site and that it can be excluded on the basis of objective scientific information, that the activity individually or in combination with other plans or projects, will have a significant effect on a European site, and accordingly the Agency determined that an Appropriate Assessment of the activity is not required.

It has been determined that the activity does not have the potential for significant effects on a European Site due to the significant dilution available in the receiving water and the volume and quality of the effluent discharge.
