Re: Ballydehob Waste Water Discharge Licence Application D0467-01

Dear Loretta Joyce,

In response to the Regulation 1893(9b) request for further information notice issued on the 10th of March 2014, please see below relevant information.

Confirm that you wish to proceed with your application for a Waste Water Discharge Licence for the Ballydehob agglomeration, and confirm the current and projected (2020) p.e.; or Confirm that you wish to withdraw the Waste Water Discharge Licence application.

Irish Water has conducted a review of the estimated agglomeration load and based on 2011 CSO population data and a 10% non-domestic factor, it is estimated that the Ballydehob agglomeration currently generates a loading of 326 P.E (winter) – 687P.E(summer) and the estimated population equivalent for 2020 is 338P.E (Winter) – 699P.E (Summer) based on an annual growth rate of 0.644%¹. Irish Water therefore confirms its intent to proceed with the Waste Water Discharge Licence for the Ballydehob agglomeration.

Best Regards,

Gerry Galvin

Chief Technical Advisor
