Ref. Letter of Indaver to the EPA dated 5th August 2014

**Treatment and Disposal of Incinerator Bottom Ash**

Dear Inspector,

In responding to our submission at the relevant ABP Oral Hearing in relation to this application, the inspector informed the interested members of the public that matters relating to the treatment and disposal of bottom ash were the responsibility of the EPA, as he considered this material "an emission". Subsequently no reference to incinerator ash appeared in his report or the ABP final decision.

The residents of Hollywood and district have a continuing interest in this matter as a final decision has not yet been reached on the MEHL Hazardous Waste Landfill license application.

We are of the opinion that this application fails to meet BAT standards in relation to bottom ash.

Yours truly,

Patrick Boyle BE, on behalf of Hollywood and District Conservation Group
