

# Annual Environmental Report 2014

<b>Agglomeration Name:</b>	Ringsend
Licence Register No.	D0034-01

# **Preface**

This 2014 Annual Environmental Report is made up of 5 parts dealing specifically with each functional area within the Ringsend agglomeration and a final part containing the Certification and Sign-Off:

- Part 1 Dublin City Functional Area
- Part 2 South Dublin County Council
- Part 3 Fingal County Functional Area
- Part 4 Dun Laoghaire Rathdown County Functional Area
- Part 5 Meath County Functional Area (to follow)
- Part 6 Certification and Sign Off

# PART 1

# Annual Environmental Report 2014

Agglomeration Name:	Ringsend
Licence Register No.	D0034-01

# PART 1

# **Table of Contents**

Section 1. Executive Summary and Introduction to the 2014 AER 1.1 Summary report on 2014	<b>1</b> 1
111 Cammary report on 201	_

5.7 Habitats Impact Assessment Report	41
Section 6. Appendix	39

#### Section 1 Executive Summary and Introduction to the 2014 AER

#### 1.1 Summary report on 2014

This Annual Environmental Report has been prepared for D0034-01, Ringsend Agglomeration, in County Dublin in accordance with the requirements of the wastewater discharge licence for the agglomeration. Specified assessments are included as an appendix to the AER as follows:

- Priority Substances Assessment (Appendix 6.6)
- Toxicity / Leachate Management Report (Appendix 6.7)
- Final Effluent Toxicity Assessment (Appendix 6.8)

The agglomeration is served by a wastewater treatment plant with a mean Design PE of 1.64 million. The treatment process includes the following:-

- preliminary treatment (including screening / grit removal), FOG removal
- primary treatment
- sludge treatment
- secondary treatment SBR
- tertiary treatment UV treatment during the bathing season.

The final effluent from the Primary Discharge Point was compliant with the following Emission Limit Values in 2014 –pH, Toxicity and E.Coli (during the Bathing Season).

The following parameters exceeded the emission limit values in 2014:-

- COD
- cBOD
- Suspended solids
- Total nitrogen
- Total phosphorus

15,779 tonnes sludge (as tonnes dry solids) were removed from the wastewater treatment plant in 2014.

14,236 tonnes were removed as Biofert and 1,543 tonnes as Biocake (dewatered sludge cake) (Source: CAW). Sludge was transferred to Quinn's, Baltinglass, Co. Wicklow.

There were no major capital or operational changes undertaken in 2014.

An Annual Statement of Measures 2015 is included in Appendix 6.1.

### **Section 2** Monitoring Reports Summary

#### 2.1 Summary report on monthly influent monitoring

**Table 2.1 - Influent Monitoring Summary** 

	BOD (mg/l)	COD (mg/l)	SS (mg/l)	TP (mg/l P)	TN (mg/l N)	Hydraulic Loading (m³/d)	Organic Loading (PE/day)

Annual							
Mean	253						1 920 024
(UWW)							1,830,924

<sup>\*</sup>Derived from IW Flow Weighted Average Organic Load Calculation Instructions for 2014

#### Significance of results

The annual mean hydraulic loading is less than the Treatment Plant Capacity as detailed further in Section 3.2.

The annual maximum organic loading is greater than the Treatment Plant Capacity as detailed further in Section 3.2.

#### 2.2 Discharges from the agglomeration

#### **Table 2.2 - Effluent Monitoring Summary (SW1 Dublin)**

**Table 2.2 - Effluent Monitoring Summary (SW1 Dublin)** 

	BOD	COD	TSS	Total P	Total N	рН	Toxicity	Comment

Overall Compliance	Fail	Fail	Fail	Fail***	Fail	Pass	Pass	***No Total P Removal on-site
(Pass/Fail)								

#### Significance of results

The WWTP was compliant with the ELV's set in the wastewater discharge licence for pH and Toxicity. Non-compliances for COD/TSS in a sample taken on 04/02/14 (834003), for BOD in a sample taken on 13/02/14 (837104), for TSS in a sample taken on 05/10/14 (921664) and for BOD and TSS in a sample taken on 13/11/14 were due to storm conditions alerted by Met Eireann (orange/red wind conditions and orange rainfall conditions) on these dates. The impact on receiving waters is assessed further in Section 2.3.

**Table 2.2 continued - Effluent Monitoring Summary** 

	DIN (mg/I N)	Ammonia (mg/I N)	Ortho- Phosphate (mg/I P)	OFG (mg/l)	E.Coli *** (MPN/100 ml)	Enterococci*** (CFU/100 ml)	Colour Visual Inspection ****	Comment

Annual Mean (for parameters where a mean ELV applies)	12.56	8.95	2.45	5.09	N/A	N/A	47	
Overall Compliance (Pass/Fail)	-	-	-	-	Pass	-	-	

The WWTP was compliant with the ELV set for E.Coli (during the Bathing Season) in the wastewater discharge licence. There was 1 sample non-compliant with the ELV (25/08/14). The impact on receiving waters is assessed further in Section 2.3.

#### 2.3 Ambient monitoring summary

**Table 2.3 - Ambient Monitoring Report Summary** 

Ambient Monitoring Point from WWDL (or as agreed with EPA)	Irish Grid Reference	EPA Feature Coding Tool code	Current EQS Status	Does assessment of the ambient monitoring results indicate that the discharge is impacting on water quality?
<u>Upstream monitoring points;</u> Lower Liffey, Chapelizod Bridge	Many		Moderate	No
Mixing Zone monitoring points; Liffey Estuary Upper Liffey Estuary Lower Tolka Estuary	Many		Moderate Good Moderate	Yes (See Summary below)
Downstream monitoring points; Dublin Bay	Many		Good	No

The results for the upstream, mixing zone and downstream monitoring are included in Appendix 6.2.

#### Significance of results

The WWTP was compliant and non-compliant with the ELV's set in the wastewater discharge licence as detailed in Section 2.2.

The discharge from the wastewater treatment plant does not have an observable negative impact on the water quality in the River Liffey upstream of the Islandbridge Weir. The EPA Ecological Status was reported as Moderate for the 2010-2012 period.

The discharge from the wastewater treatment plant has a negative impact on the receiving water quality within the near field of SW1. The EPA Ecological Status in the Liffey Estuary Upper and Lower was reported as Moderate and Good respectively for the 2010-2012 period.

The EPA Ecological Status in the Tolka Estuary was reported as Moderate for the 2010-2012 period. The discharge from the wastewater treatment plant has no observable impact on the receiving coastal water quality in Dublin Bay. The EPA Ecological Status in Dublin Bay was reported as Good for the 2010-2012 period.

#### **Summary of Results**

Licence D0034-01 requires monitoring and assessment of the impacts of the Ringsend effluent discharge on receiving water quality at agreed sampling locations as follows:

- 1. 9 Ambient Surface Waters (ASW2 ASW10) covering sampling points in the lower Liffey Estuary in the near field of the discharge (ASW2 to ASW5), and points on the River Liffey and River Tolka (ASW6 to ASW10)
- 2. 11 additional monitoring points on the Liffey and Tolka Estuaries (Surface and Depth)
- 3. 9 monitoring locations in Dublin Bay (Surface and Depth)
- 4. 8 shoreline locations, 3 of which are EC designated bathing waters (Dollymount Bathing Zone, Sandymount and Merrion Strands).

See map of monitoring locations agreed with the EPA in Appendix 6.2(1). See monitoring data for 2014 in Appendix 6.2 (2), (3), (4) and (5).

The Liffey Estuary from Islandbridge Weir to the Poolbeg Lighthouse including the River Tolka Basin and the South Bull Lagoon is designated as a "sensitive area" by Part 2 of Schedule 3 of the Urban Wastewater Regulations, SI 254 of 2001. The European Communities Environmental Objectives (Surface Waters) Regulations 2009 (SI 272 of 2009), sets physico-chemical standards for High and Good status in transitional and coastal water bodies to be complied with <u>outside the allocated mixing zone of a licensed discharge</u>.

The Rivers Liffey and Tolka and their estuaries are classified under the Water Framework Directive as Transitional Water Bodies. The outer Estuary / Dublin Bay is classified as a Coastal Water Body.

The parameter suite set in the marine monitoring section of the licence was tested in all samples (Temperature / Dissolved Oxygen / BOD / Salinity / Dissolved Inorganic Nitrogen / Total Oxidised Nitrogen / Molybdate Reactive Phosphate / Ammonia / Silica / Chlorophyll).

Tidal Conditions during the 6 monthly estuarine surveys are tabulated below:

Survey No. and Month	Date	High Tide	Height (m OD)	Low Tide Time	Height (m OD)	Tidal Status during Survey
2014		Time				
1. April	24/04/14	07.56	3.63	14.02	0.87	High to Mid-Ebb
2. May	15/05/14	12.42	3.99	05.55	0.52	Mid Flow to High
3. June	11/06/14	10.57	3.81	04.09	0.95	Mid Flow to High
4. July	24/07/14	11.05	3.64	04.22	1.18	Mid Flow to High
5. August	21/08/14	09.48	3.47	03.05	1.36	High to Mid-Ebb
6. September	11/09/14	13.48	4.16	07.07	0.15	Mid Flow to High

#### 1. Marine Monitoring Summary – ASW2 to ASW10

A total of 6 surveys were carried out in the Liffey and Tolka Estuaries during 2014 at the designated locations in the licence, tabulated below:

EPA Map Code	Licence Code	Sampling Point
		Liffey Estuary Lower
	ASW2	25 metres North of Poolbeg Wall
	ASW3	50 metres North of Poolbeg Wall
	ASW4	75 metres North of Poolbeg Wall
	ASW5	100 metres North of Poolbeg Wall
		Liffey
DB000	ASW6	Liffey City, Downstream Islandbridge Weir
DB010	ASW7	Liffey City, Heuston Station, Upstream of Camac Outfall
	ASW8	Liffey City, Winetavern Street Bridge
		Liffey Estuary Lower
DB210	ASW9	Liffey (Surface), Downstream of East Link Toll Bridge
		Tolka
DB310	ASW10	Tolka, Downstream of Annesley Bridge

A summary of transitional water quality compliance with SI 272 of 2009 for the above locations is presented below and complete water quality data is presented in Appendix 6.2 (2).

This shows compliance with Temperature, Dissolved Oxygen (lower) and Dissolved Oxygen (upper) at all locations on all survey dates except for ASW5 where the Dissolved Oxygen was slightly supersaturated (122% Sat.) on 24/07/14 at depth and at ASW10 where the Dissolved Oxygen was slightly supersaturated (129%) on 11/09/14.

All BOD values were compliant except for 1 location at ASW6 where the mean BOD was 2.3 mg/l due to a BOD concentration of 7 mg/l on 24/07/14.

Three exceedances of median Molybdate Reactive Phosphate (MRP) standards occurred in the near field of the Ringsend discharge at ASW2, ASW3, ASW4, all at the surface. One slight exceedance of the standard (freshwater) occurred at the upstream boundary point ASW6, the Liffey downstream of Islandbridge Weir. The non-compliant MRP results were as follows:

Location	MRP 2014 Median Result	SI 272 Standard	Comment
		40 μg/l as P at 35 PSU	
		60 μg/l as P 0-17 PSU	
ASW2 (Surface)	146 μg/l as P		Close to SW1 Outfall
ASW3 (Surface)	326 μg/l as P		Close to SW1 Outfall
ASW4 (Surface)	101 μg/l as P		Close to SW1 Outfall

Location	MRP 2014 Median Result	SI 272 Standard	Comment
ASW6 (Surface)	37 μg/l as P (mean)	35 μg/l as P River Water	Upstream pollution

#### 2. Marine Monitoring – Transitional Water Monitoring – Points Agreed with EPA – DB020 to DB420

A total of 6 surveys were carried out in the Liffey and Tolka Estuaries during 2014, at 11 locations agreed with the EPA, as tabulated below:

EPA Map	Sampling Point
Code	
	Liffey Estuary Lower
DB 120	Dodder / Grand Canal Basin
DB 210	East Link Toll Bridge
DB 220	RO RO Ramp No.5 (Old Treatment Works Outfall)
DB 410	Ringsend Cascade
DB 420	Poolbeg Lighthouse
	Liffey Estuary Upper
DB 020	Matt Talbot Bridge
	Tolka Estuary
DB 320	East Point Business Park Bridge
DB 330	Castle Avenue
DB 340	Clontarf Boat Club
DB 350	South Lagoon at Bull Wall Wooden Bridge
	Tolka
DB 300	Upstream of Drumcondra Bridge

A summary of transitional water quality compliance with S.I 272 of 2009 for the above locations is presented below and complete water quality data is presented in Appendix 6.2(3).

This shows full compliance with BOD, Temperature, Dissolved Oxygen (upper and lower) and median Molybdate Reactive Phosphorus at all locations, on all survey dates except those detailed below.

An exceedance of the BOD standard occurred at DB 320 (Surface) – the Tolka at East Point Business Park Bridge, with BOD concentrations of 5 mg/l on 24/07/14 and 7 mg/l on 21/08/14.

Dissolved Oxygen (upper) exceedances (slight) occurred in the Tolka Estuary at DB 330 – Castle Avenue (Surface) - 123% saturation on 24/07/14, at DB 350 – South Lagoon at Wooden Bridge (Surface and Depth) – 128% and 124% saturation respectively on 24/07/14 and at DB 300 - Tolka upstream of Drumcondra Bridge (Surface) – 124% saturation on 24/04/14.

2 Molybdate Reactive Phosphate (MRP) (median) exceedances occurred as follows:

Location	MRP 2014 Median Result	SI 272 Standard	Comment
	Liffey Estuary Lower		
DB 410 (Surface)	203 μg/l P	< 40 μg/l P	SW1 Discharge Impact
	Tolka		
DB 350 (Surface)	48 μg/l P	< 40 μg/l P	River / SW1 Impacts

Median Chlorophyll concentrations met the High-Good boundary concentration at 5 locations, met the Good-Moderate boundary concentration at 11 locations and failed to meet the Good – Moderate boundary concentrations at 5 locations. These are tabulated below:

Location	Chlorophyll-a Median Result	SI 272 Standard Good-Moderate	Comment
	Wicdian Nesale	Boundary	
	Liffey Estuary Lower	5 mg/m <sup>3</sup>	
DB 120 (Depth)	5.8 mg/m <sup>3</sup>		River / SW1 Impacts
DB 210 (Depth)	6.1 mg/m <sup>3</sup>		River / SW1 Impacts
	Liffey Estuary Upper		
DB 020 (Depth)	5.7		River / SW1 Impacts
	Tolka Estuary		
DB 320 (Depth)	6.4		River / SW1 Impacts
DB 330 (Depth)	5.2		River / SW1 Impacts

Concentrations of DIN and Silica are included in Appendix 6.2.3 for all samples taken. No standards exist for Transitional Water Bodies in S.I 272 of 2009.

#### 3. Marine Monitoring - Coastal Water Monitoring - Dublin Bay - Points Agreed with EPA

A total of 4 surveys were carried out at 9 locations in Dublin Bay during 2014. These locations - 6 coastal waters and 3 Irish Sea locations (\*), agreed with the EPA, are tabulated below:

ЕРА Мар	Sampling Point
Code	
	Dublin Bay
DB 610	Off Bailey Lighthouse, Howth
DB 430	1 km. NE Poolbeg Lighthouse
DB 450	South Bull Buoy, 1 km. SE Poolbeg Lighthouse
DB 510*	2.5 km. ENE Poolbeg Lighthouse
DB 540*	2.5 km. SSE Poolbeg Lighthouse
DB 550	No.4 Buoy, 2.5 km. E of S Poolbeg Lighthouse
DB 560	Drumleck Point, Howth, 5 km. ENE Poolbeg Lighthouse
DB 570*	5 km. ESE Poolbeg Lighthouse

DB 580	Dun Laoghaire, 5 km. E of S Poolbeg Lighthouse	
--------	--	--

These locations were sampled at surface (S) and depth (D) only when the Salinity varied on the recommendation of the EPA. Composite samples were taken at all other times.

A summary of coastal water quality compliance with S.I 272 of 2009 for the above locations is presented below and complete water quality data is presented in Appendix 6.2(4).

Monitoring shows full compliance with Temperature, Dissolved Oxygen (lower), Dissolved Oxygen (upper) and Chlorophyll-a at all 9 locations on all survey dates. A slight exceedance of Dissolved Oxygen (upper) occurred at DB 430, 1 km NE of Poolbeg Lighthouse (Surface). The value was 122% saturation on 23/07/14.

Median Chlorophyll values met the High – Good boundary condition at DB 510 and DB 570 and the other 7 locations met the Good – Moderate boundary condition.

The Dissolved Inorganic Nitrogen (DIN) standard for HIGH status (170  $\mu$ g/I N) was met by median and mean concentrations measured at all 9 locations during 2014.

The Silica concentrations measured were all <0.40 mg/l (as SiO2).

There were no impacts on coastal and Irish Sea water quality during surveys carried out in 2014.

#### 4. Shoreline Monitoring – 2014 Bathing Season

Bathing Water is currently regulated by the Bathing Water Quality Regulations, 2008 (SI No.79 of 2008) and Bathing Water Quality (Amendment) Regulations 2011 (SI No. 351 of 2011).

Shoreline sampling was carried out at 8 locations during the 2014 bathing season:

- ASW 11 Dollymount North,
- ASW 12 Dollymount Bathing Zone\*
- ASW 13 Dollymount South
- ASW 14 Bull Wall Wood Causeway
- ASW 15 Poolbeg Outfall (Main)
- ASW 16 Half Moon Club Southside
- ASW 17 Sandymount Strand\*
- ASW 18 Merrion Strand\*

A summary of bathing water quality compliance with S.I No. 79 of 2008 for the above locations, three of which are designated\* is presented below and complete water quality data is presented in Appendix 6.2 (4).

#### In summary:

Bathing water status was determined by the EPA in 2014 following the 3 year "transitional" period from 2011 to 2013.

Designated bathing waters at Dollymount (Bathing Zone) and Sandymount Strand were allocated **GOOD** status by the EPA in 2014. Merrion Strand was allocated **SUFFICIENT** status in 2014.

The remaining 5 locations are not designated bathing waters.

Monitoring between 27/05/14 and 15/09/14 indicated microbiological impacts as highlighted in Appendix 6.2 (5) and summarised below:

Site Location	ASW 11	ASW 13	ASW 14	ASW 15*	ASW 16
No. of E.Coli results	25	22	22	22	20
Samples complying with GOOD and SUFFICIENT	24	22	18		19
No. of Enterococci results	25	22	22	21	20
Samples complying with GOOD	22	22	18		18
Samples complying with SUFFICIENT	22	22	18		18

<sup>\*</sup>Poolbeg Outfall <u>is not a bathing area</u> and is monitored to check the impact of the Ringsend discharge plume.

**2.4** Data collection and reporting requirements under the Urban Waste Water Treatment Directive The electronic submission of data was completed in January 2015.

#### 2.5 Pollutant Release and Transfer Register (PRTR) - 2014

The printed PRTR is included in Appendix 6.3.

#### **Section 3 Operational Reports Summary**

#### 3.1 Treatment Efficiency Report

A summary presentation of the efficiency of the treatment process including information for all the parameters specified in the licence is included below:

**Table 3.1 - Treatment Efficiency Report Summary** 

	cBOD *(t/yr)	COD *(t/yr)	SS *(t/yr)	Total P *(t/yr)	Total N *(t/yr)	Comment
Influent mass loading (kg/year)	38,938	82,024	40,674	822	5,291	Loadings expressed in tonnes/year
Effluent mass emission (kg/year)	3,108	12,628	5,844	546	2,429	Emissions in tonnes/year
% Efficiency (% reduction of influent load)	92.02%	84.61%	85.63%	33.59%	54.11%	

<sup>\*</sup>Flow weighted loadings

#### 3.2 Treatment Capacity Report

**Table 3.2 - Treatment Capacity Report Summary** 

Hydraulic Capacity – Design / As Constructed (m³/year) Peak	171,550,000
Hydraulic Capacity – Design / As Constructed (m³/year) DWF	350,049,600
Hydraulic Capacity – Current loading (m³/year)	166,059,305
Hydraulic Capacity – Remaining (m³/year)	183,990,295*
Organic Capacity - Design / As Constructed (PE)	1.64 million (mean)
Organic Capacity - Current loading (PE)	1.77 million (mean)
Organic Capacity – Remaining (PE)	None
Will the capacity be exceeded in the next three years? (Yes / No)	Yes**

<sup>\*</sup> Flows in excess of peak flows cause hydraulic overload and operational problems at the WWTP

<sup>\*\*</sup> Plans are being progressed to expand the current hydraulic and organic capacity at Ringsend.

#### 3.3 Extent of Agglomeration Summary Report

In this section Irish Water is required to report on the amount of urban waste water generated within the agglomeration. It does not include any waste water collected and treated in a private system and discharged to water under a Section 4 Licence issued under the Water Pollution Acts 1977 (as amended):

**Table 3.3 - Extent of Agglomeration Summary Report** 

	% of p.e. load generated in the agglomeration
Load generated in the agglomeration that is collected in the sewer network	100%
Load collected in the agglomeration that enters treatment plant	Unknown
Load collected in the sewer network but discharged without treatment	Unknown

The data in Table 3.3 above is based on influent monitoring as detailed in Section 2.1 above.

#### **3.4 Complaints Summary**

A summary of complaints of an environmental nature is included below.

Complaints relating to the performance of the WWTP or network in Dublin City Council's functional area in 2014 are summarised in Table 3.4.

**Table 3.4 - Complaints Summary Table:** 

WONUM	REPORT_DATE	Nature of	Cause of	Actions Taken	CURRENT_STATUS

# 3.5 Reported Incidents Summary

Reported incidents in the agglomeration in 2014 are summarised in Table 3.5.1

Table 3.5.1 - Summary of Incidents

Incident	Date	Inc Description	Cause	Corrective	Authorities	Reported	Closed	Location
Number				Action	Contacted	to E.P.A.		
1004213	08/05/2014	Blocked Sewer	Blockage	Blockage Cleared	N	Υ	Υ	Woodview Ave
1004333	01/01/2014	Uncontrolled release	Rainfall	T.W. Upgrade	N	Υ	Υ	RWWTW
1004334	08/01/2014	ELV Exceedance	Rainfall	T.W. Upgrade	N	Υ	Υ	RWWTW
1004336	09/01/2014	Uncontrolled Release	Rainfall	T.W. Upgrade	N	Υ	Υ	RWWTW

#### **Table 3.5.2 - Summary of Overall Incidents**

Number of Incidents in 2014	53
Number of Incidents reported to the EPA via EDEN in 2014	53
Explanation of any discrepancies between the two numbers above	N/A

#### 3.6 Sludge / Other inputs to the WWTP

'Other inputs' to the waste water treatment plant are summarised in Table 3.6 below.

**Table 3.6 - Other Inputs** 

Table 3.0 - Other Inputs					
Input type	m³/year	PE/year	% of load	Is there a	Is there a
			to WWTP	leachate/sludge	dedicated
				acceptance	leachate/sludge
				procedure for	acceptance
				the WWTP?	facility for the
				(Y/N)	WWTP? (Y/N)
Domestic /Septic Tank	0	N/A	Negligible	Υ	Υ
Sludge					
Industrial / Commercial	20,846	N/A	Negligible	Υ	Υ
Sludge					
Landfill Leachate	30,242	N/A	Negligible	Υ	Υ
(delivered by tanker)					
Landfill Leachate	0	N/A	Negligible	Υ	Υ
(delivered by sewer					
network)					
Other (specify)	0	N/A	Negligible	Υ	Υ

#### Notes:

- 1. Other Inputs include; septic tank sludge, industrial /commercial sludge, landfill leachate and any other sludge that is collected and added to the treatment plant.
- 2. <u>Sludge that is added to a dedicated sludge reception facility at a waste water treatment plant not included in Table 3.6</u>. Only include sludge which is added to the waste water treatment process stream. Enter zero where there are no inputs

### Section 4. Infrastructural Assessments and Programme of Improvements

#### 4.1 Storm water overflow identification and inspection report

The Storm Water Overflow Summary Report, Tables 4.1 and 4.2 are shown below. Actual data for columns 5 (no. time activated), 6 (total volume discharged in m³) and 7 (total volume discharged in PE) in Table 4.1 are not available for Dublin City Council. This data have been estimated by combining information contained within the Greater Dublin Strategic Drainage Study (GDSDS) with an analysis of discharge from a single storm water overflow during a major storm event. The GDSDS was never intended to provide the level of detail required to complete Table 4.1 and is, therefore, unreliable.

Accurate data for Table 4.1 can only be obtained through a comprehensive study of individual storm water overflows. The study should determine the following:

- Frequency of overflow
- Volume discharge in each overflow episode
- An assessment of the quality of the effluent discharged

Table 4.1 Storm water overflow identification and assessment summary table

Table 4.1.2 - SWO Identification and Inspection Summary Report

How much sewage was discharged via SWOs in the agglomeration in the year (m3/yr)?	Data not available
How much sewage was discharged via SWOs in the agglomeration in the year (p.e.)?	Data not available
What % of the total volume of sewage generated in the agglomeration was discharged via SWOs in the agglomeration in 2014?	Data not available
Is each SWO identified as non-compliant with <b>DoEHLG Guidance</b> included in	Yes
the Programme of Improvements?	See Section 4.2
The SWO assessment includes the requirements of Schedule A3	Yes, where applicable
Have the EPA been advised of any additional SWOs / changes to Schedule C3	No.
and A4 under Condition 1.7?	

# 4.2 Report on progress made and proposals being developed to meet the improvement programme requirements.

Condition 5 of the licence requires the licensee to prepare and implement an improvement programme to maximise the effectiveness and efficiency of the work as specified in Condition 5.1.

**Table 4.2.1 - Specified Improvement Programme Summary** 

Specified Improvement Programmes	Licence Schedule (A or C)	Licence Completion Date	Date Expired?	Status of Works	Comments	Licensee Timeframe for Completing Works
Improvement Programme for Primary Discharge						
Upgrade waste water treatment plant and ancillary works in accordance with Condition 5.5	C.1	December 2015	No	Part- commenced	The Project consists of three main elements as follows: 'Surgical Insertion' Works Commenced on site in 2013. Odour Upgrades and Bio-Cake Outloading facility due for completion by March 2015. 1st Stage Power Supply upgrade complete. Additional works at design/execution stage. Secondary	Element 2 Secondary Treatment Extension – completion mid- 2019.  Overall completion – 2021.

Specified Improvement Programmes	Licence Schedule (A or C)	Licence Completion Date	Date Expired?	Status of Works	Comments	Licensee Timeframe for Completing Works
					Treatment Extension Consultants appointed in September 2014 and design ongoing. Revised design proposals necessitated abandonment of existing OJEU competition. New OJEU Notice for DB Construction Contract anticipated in Q2/3 2015. Long Sea Outfall Tunnel No progress this period. Priority given to expediting WwTW upgrades & expansion.	
					expansion. Land/power supply negotiations with ESB ongoing.  Note: A proving exercise to demonstrate that a nutrient removal technology will work successfully in the Ringsend wastewater environment will commence at Ringsend WWTP in March 2015	
Upgrade storm water storage tank at WWTP as necessary	C.1	Not applicable	Not applicable	Not applicable	and will run for a 6 month period until September 2015.  There are no current plans to upgrade the storm water storage tanks at the Works. This position being reviewed as part of WwTW Detailed	Not applicable

Specified Improvement Programmes	Licence Schedule (A or C)	Licence Completion Date	Date Expired?	Status of Works	Comments	Licensee Timeframe for Completing Works
City Centre Sewerage Scheme (CCSS)	C.3	None specified	Not applicable	In progress	N/A	Consultant appointed in June 2013 to construct hydraulic model. 2 No. CCTV contracts completed. Hydraulic model construction and verification currently underway
North Docklands Sewerage Scheme	C4	None specified	Not applicable	Work on Site	75%	See Section 4.2.1.
Rathmines and Pembroke (R&P) Scheme now renamed as 'Rathmines – Pembroke and Grand Canal Tunnel Drainage Area Study'	C.3	None specified	Not applicable	Transferred to Irish Water	N/A	This project was transferred to Irish Water in January 2014. The project went to tender in December 2014 to engage a project consultant. Management of this project has been transferred to Irish Water

**Table 4.2.2 – Improvement Programme Summary Table** 

Improvement	Improvement Source	Progress (% Complete)	Expected
Description			<b>Completion Date</b>
WWTP Upgrade	WWTP (Condition 5.2)	At development stage	Subject funding
City Centre Sewerage Scheme	SWO Assessment (Conditions 4 and 5.2) Improved Operational Control Incident Reduction	Circa 50%	Mid 2017
North Docklands Sewerage Scheme	SWO Assessment (Conditions 4 and 5.2) Improved Operational Control Incident Reduction	> 75%	Mid 2016
Rathmines and Pembroke Drainage Scheme (and Grand Canal)	SWO Assessment (Conditions 4 and 5.2) Improved Operational Control Incident Reduction	At early development stage	Subject funding

#### **North Docklands Sewerage Scheme**

#### **Background & Progress**

The Docklands Drainage Area Plan (DAP) produced in 2006 identified that there was a need to upgrade the existing water and drainage facilities in the North Docklands Area. The Docklands DAP identified that a new pumping station at Spencer Dock with Rising Mains to convey flows across to Ringsend Wastewater Treatment Works was the only viable solution to meet future drainage demand of new development in the north docklands area. The scheme was originally conceived as Serviced Land Initiative Scheme (SLI) rolling over into the WSIP 2007 - 2009. The remaining contracts still outstanding were extended into the DECLG WSIP 2010 – 2013. Following a series of design and scope changes the delivery strategy devised for the North Docklands Sewerage Scheme (NDSS) (previously referred to as the Spencer Dock Sewerage Scheme) was to split the overall scheme into four contracts. The title of each element (listed hereunder) reflects the current position:

- Contract 1 Spencer Dock Pumping Station (SDPS) Remaining works titled NDSS Contract 4C
- Contract 2 Dublin Docklands Rising Mains Sewerage Scheme completed
- Contract 3 Liffey Services Installation Contract (LSIC) completed
- Contract 4 Network Upgrade -Split into two contracts 4A Under construction and 4B Tender Documents complete

When all Docklands Contracts are completed the necessary drainage infrastructure will be in place to adequately deal with the current and future sustainable development of the North Docklands Area. Furthermore it will reduce CSO spills and flooding risk in the north docklands. The engineering solution has been designed to complement drainage infrastructural requirements envisaged by the new Dublin City Council Strategic Development Zone (SDZ) Plan and CIE Master Development Plan.

#### Contract 1 - Spencer Dock Pumping Station (SDPS)

An integral component of the overall Spencer Dock Sewerage Scheme, a main pumping station has been constructed in the North Lotts Area of Spencer Dock, Dublin 1 on behalf of Dublin City Council by means of a development agreement between Dublin City Council and original Developers SDCC (No.9) Ltd.

The overall objective of the pumping station is to transfer existing and future combined flows from within the Spencer Dock catchment to the existing Ringsend Wastewater Treatment Plant for treatment and disposal. The Spencer Dock Pumping Station is located at the junction of Sheriff Street Upper and New Wapping Street. To date, the main pumping station substructure and mechanical & electrical fit-out has been completed. However a number outstanding works (listed hereunder) that were included in the original scope of works to be delivered have not been constructed to date. Effectively this has prevented the completion of the commissioning phase of the Spencer Dock Pumping Station. Funding was secured by Irish Water and following a tender process, contracts were awarded in Q3 2014 for the completion of the outstanding works to Ward & Burke Construction Ltd and CMP Ltd (SISK).

#### 1. The Sherriff Street 1200 mm diameter Incoming Sewer

Completion January 2015

2. New Wapping Street Twin Rising Mains and Overflow Sewer to connect to Contract 2.

Expected completion date April 2015

3. Mayor Street incoming Sewer (including Mayor Street Rising Main Rehabilitation works).

Expected completion date April 2015

4. Final commissioning of Mechanical and Electrical Plant and handover of the pumping station.

Expected completion date June 2015

#### North Docklands Sewerage Scheme - Contract 4A

The works consists of the upgrade of existing sewerage infrastructure within the Spencer Dock area of the North Docklands, transferring flows from existing sewers on Church Road, East Road and Sherriff Street, via a new 530 metre long 1200 mm diameter arterial tunnelled sewer network to the new Spencer Dock Pumping Station constructed as contract 1 of the overall scheme. The Contractor, Ward and Burke Construction Ltd. were formally appointed by Dublin City Council in July 2013 to undertake the construction contract. Construction is underway since September 2013 with an anticipate 16 month program. RPS Group consulting engineers are appointed as project supervisor for construction and handover stages.

#### North Docklands Sewerage Scheme - Contract 4B

Completion of Contract 4B is the last remaining element providing the necessary drainage infrastructure to facilitate new development and upgrade existing sewerage infrastructure to transfer flows to the pumping station from Sheriff Street Upper and Castleforbes Road. It will involve 740 metres of combined gravity sewer using trenchless construction methods (433 metres of 1,200 mm diameter, and 307 metres of 600 mm diameter using micro tunnelling) including 8 drive and reception pits. Approximately 48 metres of combined gravity sewers and ancillary manholes using open cut methods with connections to existing manholes and extensive accommodation works involving diversion of existing utilities at all shaft and open cut manhole locations is included. The Project transferred to Irish Water in January 2014. Further Optioneering was required following difficulty securing Wayleave agreement through 3rd party lands. The design has been completed by Nicholas O'Dwyer Consulting Engineers with the intention for going to tender for Gate 3 Construction in Q1 2015.

#### New flaps fitted to storm water overflows on Quay wall

The GDSDS identified that there was significant infiltration in the Ringsend Agglomeration. In 2009 an assessment was carried out using operational data to quantify the amount of additional water that needed to be pumped and treated as a result of this infiltration. This assessment gave a figure of 400 l/s between high-tide and low tide night time flows. New flaps were fitted to the quay wall of the river Liffey at the end of 2013 / beginning of 2014. A similar assessment showed that these flows had reduced by 25% as a result of these works.

#### Table 4.2.3 – Sewer Integrity Risk Assessment Tool Summary

As reported last year, as part of the City Centre Sewerage Scheme, a modified Sewer Integrity Tool was developed and piloted. The pilot indicated the extreme complexity in applying the Sewer Integrity Tool to an agglomeration with more than 900 km of foul and combined sewer and that the full application of the Sewer Integrity Tool to each of the catchments within the agglomeration would require considerable time, funding and resources. There has been no further progress on this issue in 2014

# **Section 5. Licence Specific Reports**

**Licence Specific Reports Summary Table** 

Licence Specific Report	Required in 2014 AER or outstanding from previous AER	Included in 2014 AER	Reference to relevant section of AER			
Priority Substances Assessment	Yes	Yes	Full report in Appendix 6.6			
Drinking Water Abstraction Point Risk Assessment	No	No	N/A			
Habitats Impact Assessment	No	No	N/A			
Shellfish Impact Assessment	No	No	N/A			
Pearl Mussel Report	No	No	N/A			
Toxicity/Leachate Management	Yes	Yes	See Appendix 6.7			
Toxicity of Final Effluent Report	Yes	Yes	See Appendix 6.8			

**Licence Specific Reports Summary of Findings** 

Licence Specific	Recommendations	Summary of Recommendations in Report
Report	in Report	No 517// and not in the Linear of Fau Driesity Delly tenta in CVA/A
		No ELV's are set in the Licence for Priority Pollutants in SW1
Priority Substances		effluent discharge.
Assessment	No	Minor exceedances in standards for receiving water quality
Assessment		occur in the effluent discharge. These are complied with
		following dilution. See report in Appendix 6.6.
Drinking Water		
Abstraction Point	N/A	N/A
Risk Assessment	,	,
Habitats Impact	N/A	NI/A
Assessment	N/A	N/A
Shellfish Impact	N/A	N/A
Assessment	14/75	IVA
Pearl Mussel Report	N/A	N/A
		Very small volumes of leachate discharge annually by tanker –
		a total of 30,242 m <sup>3</sup> in 2014.
Toxicity/Leachate	No	
Management		This is equivalent to 6.56% of a single day's daily mean influent
		and equivalent to <u>0.018% of the annual total influent flow</u> .
Toxicity of Final	No	Aquatic Toxicity complies well with Effluent ELV of 5 TU.
Effluent Report		rigadio romally compiles well with Emident EEV of 5 To.

#### **5.1 Priority Substances Assessment**

The Priority Substances Assessment report is included in Appendix 6.6. A summary of the findings of this report is included below.

**Table 5.1 - Priority Substance Assessment Summary** 

	Licensee self- assessment checks to determine whether all relevant information is included in the Assessment.							
Does the assessment use the Desk Top Study Method or Screening Analysis to determine if the discharge contains the parameters in Appendix 1 of the EPA guidance	Screening Analysis							
Does the assessment include a review of Trade inputs to the works?	No Licences are issued or reviewed to restrict priority substances							
Does the assessment include a review of other inputs to the works?	Yes. 4 Main Influent Lines screened by testing							
Does the report include an assessment of the significance of the results where a listed material is present in the discharge? (e.g. impact on the relevant EQS standard for the receiving water)	Yes							
Does the assessment identify that priority substances may be impacting the receiving water?	No							
Does the Improvement Programme for the agglomeration include the elimination / reduction of all priority substances identified as having an impact on receiving water quality?	No							

#### 5.2 Drinking Water Abstraction Point Risk Assessment.

No Assessment required by the Licence.

#### 5.3 Shellfish Impact Assessment Report.

No Assessment required by the Licence.

#### 5.4 Toxicity / Leachate Management

The Toxicity / Leachate Management Assessment report is included in Appendix 6.7. A summary of the findings of this report is included below.

**Table 5.4 - Toxicity / Leachate Management Report Summary** 

Is a Toxicity / Leachate Management Report required in the 2014 AER (or outstanding from previous AER)	Yes
What % of the total influent for the year is leachate?	0.018% of annual load (volume)
Does leachate addition exceed 4% (volume) of the influent load at any time?	No
Maximum leachate loading rate (based on 100 m³)	0.022% of daily load (volume)
Does the leachate study identify any constituents of the material that present an environmental risk?	No
List leachate constituent identified and impact (insert a row for each constituent)	N/A
Has the WWTP suitability to treat the leachate been assessed?	Yes
What are the results of the assessment	Suitable
Has the study identified the max and operational loadings (mass, volume and rate of addition) for leachate to the WWTP?	N/A
Is there a monitoring programme for the priority substances identified above?	Yes
Have trigger and action levels for the concentration of identified leachate constituents been established to prevent impact on the receiving water?	Yes
Does the Improvement Programme for the agglomeration include any procedural and/or infrastructural works to reduce the impacts of leachate acceptance on the operation of the wwtp?	No

#### 5.5 Toxicity of the Final Effluent Report

The Toxicity / Leachate Management Assessment report is included in Appendix 6.8. A summary of the findings of this report is included below.

Table 5.5 - Toxicity of the Final Effluent Assessment Summary

Is a Toxicity report required? (Condition 4)	Yes
Has the study been carried out against 4 species in 3 trophic levels?	No (2)
Does the report identify that the discharge is toxic to any of the species in the study?	No
List species impacted	N/A
Does the Improvement Programme for the agglomeration include any procedural and/or	
infrastructural works to reduce the toxicity of the final discharge?	No

A copy of the detailed assessment is included in Appendix 6.8 to the AER.

Toxicity test results show effluent aquatic toxicity complies well with the licence limit of 5 TU.

#### **5.6 Pearl Mussel Measures Report**

No Assessment required by the Licence.

#### **5.7 Habitats Impact Assessment Report**

No Assessment required by the Licence.

Guidance to completing the PRTR workbook

#### **AER Returns Workbook**

Environmental Protection Agency	AER RELUTIIS VVOIKDOOK  Version 1.1.18
REFERENCE YEAR	
HEI EITERVE I EFFI	per i
1. FACILITY IDENTIFICATION	
Parent Company Name	Irish Water
	Ringsend Waste Water Treatment Plant
PRTR Identification Number	
Licence Number	D0034-01
Classes of Activity	
	class name
	Refer to PRTR class activities below
Address 1	
Address 2	
Address 3	
Address 4	
	Dublin
Country	
	-6.19681343949 53.3390944464
River Basin District	
NACE Code	
Main Economic Activity	
AER Returns Contact Name	
AER Returns Contact Email Address	nhorgan@water.ie
	Environmental Compliance Specialist
AER Returns Contact Telephone Number	
AER Returns Contact Mobile Phone Number	
AER Returns Contact Fax Number	
Production Volume	0.0
Production Volume Units	
Number of Installations	
Number of Operating Hours in Year	
Number of Employees	
User Feedback/Comments	Total Annual flow (m3/annum): EP1 - 148,413,944m3 (2013), 165,638,393m3 (2014) up 12%. Fugitive - 892,730m3 (2013),
	2,549,327m3 (2014) up 186%. These flow figures, coupled with increases (or decreases) in the mean concentration figures, can
	explain the relative increases (or decreases) in the Total Mass Emissions for most parameters between 2013 and 2014.
Web Address	
Web Address	
2. PRTR CLASS ACTIVITIES	
Activity Number	Activity Name
5(f)	Urban waste-water treatment plants
5(1)	orban water a damon, pane
3. SOLVENTS REGULATIONS (S.I. No. 543 of 20	02)
Is it applicable?	r <sup>i</sup>
Have you been granted an exemption ?	
If applicable which activity class applies (as per	
Schedule 2 of the regulations) ?	
Is the reduction scheme compliance route being	
used ?	
4. WASTE IMPORTED/ACCEPTED ONTO SITE	Guidance on waste imported/accepted onto site
Do you import/accept waste onto your site for on-	
site treatment (either recovery or disposal	
antivities)	

4.1 RELEASES TO AIR | PRTR# : D0034 | Facility Name : Ringsend Waste Water Treatment Plant | Filename : D0034\_2014.xism | Return Year : 2014 | 23/02/2015 07:26

#### SECTION A: SECTOR SPECIFIC PRTR POLLUTANTS

#### SECTION B: REMAINING PRTR POLLUTANTS

	RELEASES TO AIR				Please enter all quantities in this section in KGs			
	POLLUTANT			METHOD	QUANTITY			
			Method Used					
No. Annex II	Name	M/C/E	Method Code	Designation or Description	Emission Point 1	T (Total) KG/Year	A (Accidental) KG/Year	F (Fugitive) KG/Year
					0.0		0.0	0.0

<sup>\*</sup> Select a row by double-clicking on the Pollutant Name (Column B) then click the delete button

#### SECTION C: REMAINING POLLUTANT EMISSIONS (As required in your Licence)

	RELEASES TO AIR	Please enter all quantities in this section in KGs								
	POLLUTANT		QUANTITY							
		Method Used								
Pollutant No.	Name	M/C/E Method Code Designation or Description	Emission Point 1 T (Total) KG/Year A (Accidental) KG/Year F (Fugitive) KG/Year							
			00 00 00 00							

<sup>\*</sup> Select a row by double-clicking on the Pollutant Name (Column B) then click the delete button

#### Additional Data Requested from Landfill operators

flared or utilised on their facilities to accompany the fig	use cases, landmi operators are requested to provide summary data on landmi gas (Metnane) juries for total methane generated. Operators should only report file! Net methane (CH4) sction A: Sector specific PRTR pollutants above. Please complete the table below:					
Landfill:	Ringsend Waste Water Treatment Plant					
Please enter summary data on the quantities of methane flared and / or utilised			Meti	hod Used		
	T (Total) kg/Year	M/C/E	Method Code	Designation or Description	Facility Total Capacity m3 per hour	
Total estimated methane generation (as per site model)	0.0				N/A	
Methane flared						(Total Flaring Capacity)
Methane utilised in engine/s					0.0	(Total Utilising Capacity)
Net methane emission (as reported in Section A					A1/A	

4.2 RELEASES TO WATERS Link to previous years emissions data | PRTR#: D0034 | Facility Name : Ringsend Waste Water Treatment Plant | Flename : D0034\_2014.xism | Return Year : 2014 | 23/02/2015 07:30

Table 7.6.1: Screening of Effluent

Table 7.6.2: Impact on Receiving Waters

Table 7.6.3: Screening of Influent

Table 7.6.4: Screening of Influent Lines to Ringsend WWTP

#### Ringsend Influent and Effluent Priority Substances Screening, 2014.

To comply with condition **4.11.1** of Licence D0034-01, 2 sub-samples of the Ringsend composite influent and effluent were analysed during 2014 for a comprehensive suite of parameters from the :

- PRTR test suite
- EPA's 54 parameter test suite (Appendix 1, EPA Guidance on the Screening for Priority Substances for Waste Water Discharge Licences) which was issued on 17/01/11.

#### **Summary of Effluent Screening Results:**

Effluent Sample Reference 941042 taken 27/11/14.

**See Table 7.6.1.** Many of the parameters tested for the PRTR suite in this effluent sample were reported as below the detection limit.

Parameters from the EPA's Guidance document detected in this effluent sample included low (<u>sub-microgram per litre</u>) concentrations of the herbicides Mecoprop and Diazinon, microgram per litre concentrations of the metals Arsenic, Zinc, Mercury, Molybdenum, Cobalt, Tin, Barium, Nickel, Selenium, Chromium, Copper and Lead (see highlighted parameters in **Table 7.6.1**).

The PAH's Acenaphthene and Pyrene survived the treatment process at sub-microgram per litre concentrations.

Low concentrations of Trichloromethane and Toluene were also detected.

Results for general parameters and additional tests were in the normal range for effluent sewage.

Table 7.6.1.

EPA Appendix 1 – Ringsend Effluent Sample 941042 - 2014 Screening.

#### Assessment of the Significance of the Discharge SW1 on Receiving Water Quality.

A summary of effluent screening results is presented below with a limited assessment of the significance of the discharge on receiving water. Note that the effluent results are at the licensed point of discharge (SW1) and that a mixing zone boundary has not been defined in WWDL D0034-01.

Effluent from SW1 receives a significant dilution within the undefined near field mixing zone before receiving water standards are applicable.

Chromium (Total), Copper and Zinc were the only metals screened in the effluent sample that exceeded the EQS's set for the receiving waters. Diazinon was close to the annual average (AA) EQS. A minimum dilution factor of 2-3 in the near field mixing zone allows for compliance with the EQS's for specific pollutants which are set as an annual average (AA).

This assessment does not indicate a significant impact from the specific pollutants listed on the receiving waters outside the near field of the SW1 discharge point.

Table 7.6.2 Assessment of the Significance of the Discharge SW1 on Receiving Water Environmental Quality Standards for Specific Pollutants (Table 10, S.I 272 of 2009).

Specific Pollutant	AA-EQS	Effluent
Parameter	(μ <b>g/I</b> )	941042
		27/11/14
		SW1
Arsenic	20	3.1
Chromium VI	0.6	6*
Copper	5	13.0
Cyanide	10	< 9
Diazinon	0.01	0.008
Dimethoate	0.8	< 0.020
Fluoride	1,500	500
Glyphosate	-	< 2.00
Linuron	0.7	< 0.05
Mancozeb	2	-
Monochlorobenzene	25	< 1.0
Phenols	8	< 1.0
Toluene	10	0.18
Xylenes	10	< 0.30
Zinc	40	57.0

<sup>\*=</sup> Total Chromium which is > Chromium VI

#### Ringsend Influent Screening, 2014

To comply with condition **4.11.2 of Licence D0034-01**, a sub-sample of the Ringsend composite influent was analysed during 2014 (on the same date -27/11/14 - as the effluent sample reported above) for agglomeration regulation purposes. Investigation of the sources of any dangerous substances detected in monitoring of the influent was carried out by monitoring the 4 incoming lines to the plant on the same date (27/11/14). Samples were tested for:

- PRTR test suite
- EPA's 54 parameter test suite (Appendix 1, EPA Guidance on the Screening for Priority

Substances for Waste Water Discharge Licences) issued on 17/01/11.

#### **Summary of Influent Screening Results:**

#### 2014 - Influent Sample Reference 941041 of 27/11/14.

See **Table 7.6.3.** Many of the parameters tested for the PRTR suite in this influent sample were reported as below the detection limit.

Parameters from the EPA's Guidance document detected in this influent sample included low (microgram and sub-microgram per litre) levels of Xylenes, Ethyl Benzene and Toluene, 2 of the 7 PAH's listed (Naphthalene and Fluoranthene) and a further 4 unlisted PAH's (Acenaphthene, Fluorene, Phenanthrene and Pyrene). Mecoprop, Phenols (14.5 ug/l) and the metals Arsenic, Copper, Zinc, Mercury, Selenium, Barium, Cobalt and Nickel were detected (see highlighted parameters in **Table 7.6.3**).

Results for general parameters and additional tests were in the normal range for influent sewage.

Table 7.6.3

EPA Appendix 1 – Ringsend Influent Sample 941041 – 2014 PRTR Screening.

#### **Summary of Influent Lines Screening Results:**

#### 2014 - Influent Lines - Sample References 941135, 941136, 941137 and 941043 of 27/11/2014.

To isolate the source of parameters detected in the Influent, samples were taken from the 4 main influent feeder lines on 27/11/2014 as follows:

941135: Dun Laoghaire - West Pier

941136: Dodder Valley Sewer - UCD FM-10

941137: North Dublin Drainage System - Sutton Sump

941043: Ringsend - Main Lift Pumping Station

See **Table 7.6.4.** These samples were tested for the PRTR test suite. Many of the parameters in the influent feeder line samples were reported as below the detection limit.

Parameters detected in the 4 feeder lines have been compared with those detected in the influent sample taken on the same date (see **Table 7.6.3** above).

#### 941135: Dun Laoghaire - West Pier

Parameters detected in this sample included Tri-chloromethane (2.2  $\mu$ g/l), Toluene (0.18  $\mu$ g/l), Phenols (4.4  $\mu$ g/l) and metals Arsenic (1.7  $\mu$ g/l), Copper (14.0  $\mu$ g/l), Zinc (18  $\mu$ g/l), Selenium (3.41  $\mu$ g/l) and Barium (28.6  $\mu$ g/l). See highlighted parameters in **Table 7.6.4.** 

#### 941136: Dodder Valley Sewer - UCD FM-10

Parameters detected in this sample included Tri-chloromethane (3.3 ug/l), Xylenes (0.41  $\mu$ g/l), Toluene (0.31  $\mu$ g/l), Di(ethyl-hexyl)phthalate (23.8  $\mu$ g/l), Diazinon (0.005  $\mu$ g/l), Phenols (61.2  $\mu$ g/l) and metals Copper (17  $\mu$ g/l), Zinc (26  $\mu$ g/l), Selenium (1.36  $\mu$ g/l), Barium (16.2  $\mu$ g/l) and Nickel (3.50  $\mu$ g/l). See highlighted parameters in Table 7.6.4).

#### 941137: North Dublin Drainage System - Sutton Sump

Parameters detected in this sample included Tri-chloromethane (7  $\mu$ g/I), Toluene (0.53  $\mu$ g/I) Phenols (30.3  $\mu$ g/I) and metals Copper (26  $\mu$ g/I), Zinc (92  $\mu$ g/I), Selenium (2.33  $\mu$ g/I), Barium (36.3  $\mu$ g/I) and Nickel (4.5  $\mu$ g/I). See highlighted parameters in **Table 7.6.4.** 

#### 941043: Ringsend – Main Lift Pumping Station

Parameters detected in this sample included Dichloromethane (15.1  $\mu$ g/I), Xylenes (0.41  $\mu$ g/I), Ethyl Benzene (0.16  $\mu$ g/I), Toluene (1.38  $\mu$ g/I), Naphthalene (0.855  $\mu$ g/I), Acenaphthene (0.182  $\mu$ g/I),

Fluorene (0.181  $\mu$ g/l), Phenanthrene (0.236  $\mu$ g/l), Di-ethylphthalate (2.4  $\mu$ g/l), herbicide Malathion (0.006  $\mu$ g/l), Phenols (15.9  $\mu$ g/l) and metals Arsenic (1.9  $\mu$ g/l), Copper (17  $\mu$ g/l), Zinc (25  $\mu$ g/l), Barium (23.7  $\mu$ g/l), and Nickel (3.9  $\mu$ g/l). See highlighted parameters in **Table 7.6.4** 

#### **Measures to Reduce Detected Priority Substances**

Ongoing reviews of trade effluent licenses and consents will be carried out in the catchments upstream of the 4 influent lines to the Ringsend WWTP to reduce detected priority substances.

Table 7.6.4.

EPA Appendix 1 – Ringsend Influent Inflows - 2014 PRTR Screening.

EPA Parameters Screened for in 4 Waste Water Influent Lines to the Ringsend WWTP

No.	Compound	941135	941136	941137	941043

#### UISCE ÉIREANN : IRISE WATER

#### Part 2 South Dublin County Council Functional Area

#### Section 1. Executive Summary and Introduction to the 2014 AER

#### 1.1 Summary report on 2014

This Annual Environmental Report has been prepared for D0034-01, Ringsend, for the South Dublin County Council Functional Area in County Dublin in accordance with the requirements of the wastewater discharge licence for the agglomeration.

There are no specified assessments required in the 2014 AER.

The Greater Dublin Area Agglomeration comprises the geographical area of Dublin City Council and sections of the functional areas of

- Fingal County Council
- South Dublin County Council
- Dun Laoghaire Rathdown County Council
- Meath County Council.

The Greater Dublin Area Agglomeration is served by a single water treatment plant (WWTP) which is located at Ringsend in the functional area of Dublin City Council.

The agglomeration is served by a wastewater treatment plant with a mean Design PE of 1.64 million.

The treatment process includes the following:-

- Preliminary treatment (including screening / grit removal), OFG removal
- Primary treatment
- Sludge treatment
- Secondary treatment SBR
- Tertiary treatment UV treatment during the bathing season.

The following improvement works were undertaken during 2014:-

- Quarryvale PS (Phase 2 Upgrade) Upgrade of pump station. Replacement of 2 pumps, general equipment upgrading, new odour control unit installed, improved security fencing and access gate provided.
- Dodder Valley Trunk Sewer (DVS) Diverted combined sewers from Butterfield Avenue at Kilvere Estate and Rathfarnham Shopping Centre to the DVS.

An Annual Statement of Measures is included in Appendix 6.1.

# Part 2 South Dublin County Council Functional Area Section 2. Monitoring Reports Summary

#### 2.1 Summary report on monthly influent monitoring

There is no influent monitoring required to be carried out in the South Dublin portion of the Ringsend agglomeration.

**Table 2.1 - Influent Monitoring Summary** 

	BOD (mg/l)	COD (mg/l)	SS (mg/l)	TP (mg/l)	TN (mg/l)	Hydraulic Loading (m³/d)	Organic Loading (PE/day)
Number of Samples	n/a	n/a	n/a	n/a	n/a		
Annual Max.	n/a	n/a	n/a	n/a	n/a	n/a	n/a
Annual Mean	n/a	n/a	n/a	n/a	n/a	n/a	n/a

#### Significance of results

None.

#### 2.2 Discharges from the agglomeration

No monitoring of discharges is required to be carried out for the South Dublin portion of the Ringsend Licence.

**Table 2.2 - Effluent Monitoring Summary** 

	cBOD	COD	TSS	Ammonia	Ortho-P	Comment
	(mg/l)	(mg/l)	(mg/l)	(mg/l)	(mg/l)	
WWDL ELV (Schedule A)	n/a	n/a	n/a	n/a	n/a	
ELV with Condition 2 Interpretation included	n/a	n/a	n/a	n/a	n/a	
Number of sample results	n/a	n/a	n/a	n/a	n/a	
Number of sample results above WWDL ELV	n/a	n/a	n/a	n/a	n/a	
Number of sample results above ELV with Condition 2 Interpretation included	n/a	n/a	n/a	n/a	n/a	
Annual Mean (for parameters where a mean ELV applies)	n/a	n/a	n/a	n/a	n/a	
Overall Compliance (Pass/Fail)	n/a	n/a	n/a	n/a	n/a	

Significance of results

None.

#### 2.3 Ambient monitoring summary

There is no ambient monitoring required to be carried out for the South Dublin portion of the Ringsend agglomeration.

**Table 2.3 - Ambient Monitoring Report Summary** 

Ambient Monitoring Point from WWDL (or as agreed with EPA)	Irish Grid Reference	EPA Feature Coding Tool code	Current EQS Status	Does assessment of the ambient monitoring results indicate that the discharge is impacting on water quality?
n/a	n/a	n/a	n/a	n/a
n/a	n/a	n/a	n/a	n/a

#### Significance of results

None.

#### 2.4 Data collection and reporting requirements under the Urban Waste Water Treatment Directive

This is not required for the South Dublin portion of the Ringsend agglomeration.

#### 2.5 Pollutant Release and Transfer Register (PRTR) - 2014

This is not required for the South Dublin portion of the Ringsend agglomeration.

#### **Section 3 Operational Reports Summary**

#### 3.1 Treatment Efficiency Report

There is no requirement under the Licence to prepare and submit a Treatment Efficiency Report associated with the South Dublin portion of the Ringsend agglomeration.

**Table 3.1 - Treatment Efficiency Report Summary** 

	cBOD (kg/yr)	COD (kg/yr)	SS (kg/yr)	Total P (kg/yr)	Total N (kg/yr)	Comment
Influent mass loading (kg/year)	n/a	n/a	n/a	n/a	n/a	
Effluent mass emission (kg/year)	n/a	n/a	n/a	n/a	n/a	
% Efficiency (% reduction of influent load)	n/a	n/a	n/a	n/a	n/a	

#### 3.2 Treatment Capacity Report

This is not required for the South Dublin portion of the Ringsend agglomeration.

**Table 3.2 - Treatment Capacity Report Summary** 

Hydraulic Capacity – Design / As Constructed (dry weather flow) (m³/year)	n/a
Hydraulic Capacity – Design / As Constructed (peak flow) (m³/year)	n/a
Hydraulic Capacity – Current loading (m³/year)	n/a
Hydraulic Capacity – Remaining (m³/year)	n/a
Organic Capacity - Design / As Constructed (PE)	n/a
Organic Capacity - Current loading (PE)	n/a
Organic Capacity – Remaining (PE)	n/a
Will the capacity be exceeded in the next three years? (Yes / No)	n/a

#### 3.3 Extent of Agglomeration Summary Report

In this section Irish Water is required to report on the amount of urban waste water generated within the agglomeration. It does not include any waste water collected and treated in a private system and discharged to water under a Section 4 Licence issued under the Water Pollution Acts 1977 (as amended):

**Table 3.3 - Extent of Agglomeration Summary Report** 

	% of p.e. load
	generated in the
	agglomeration
Load generated in the agglomeration that is collected in the sewer network	100%
Load collected in the agglomeration that enters treatment plant	100%
Load collected in the sewer network but discharged without treatment	ND

**Load generated in the agglomeration that is collected in the sewer network** is the total load generated and collected in the municipal network within the boundary of the agglomeration.

**Load collected in the agglomerations that enters treatment plant** is that portion of the previous figure which enters the waste water treatment plant

**Load collected but discharged without treatment** is that portion of the first figure which is discharged without treatment.

#### 3.4 Complaints Summary

A summary of complaints of an environmental nature is included below.

**Table 3.4 - Complaints Summary Table:** 

Number	Date & Time	Nature of Complaint	Cause of Complaint	Actions taken to resolve issue	Closed (Y/N)
1	12 <sup>th</sup> May	Overflow of sewerage	DVS sewer pipe	Pipe bung removed	Y
	2014	into residential property	was bunged at	by *Murphy	
		causing damage	new Belfield	International	
			siphon house		
			during		
			construction by		
			contractor*.		
			Heavy rainfall		
			overwhelmed		
			temporary		
			measure in place		
			causing serious		
			overflow &		
			property		
			damage.		

#### 3.5 Reported Incidents Summary

A summary of reported incidents is included below.

Table 3.5.1 - Summary of Incidents

Incident Type (e.g. non- compliance, emission, spillage, EO activation)	Incident Description	Cause	No. of Incidents	Corrective Action	Authorities Contacted	Reported to EPA	Closed (Y/N)
Overflow from Siphon House on DVS	L2 – limited, contamination of residences, short duration	Pipe damage by contractor	1	Pipe repaired by Murphy International	SDCC/DCC/D LRCC, Fire services	N	Y
Overflow to SW & then to Dodder	Minor L1 - Rathfarnham – FS blockage	Blocked foul sewer	1	Overflow between foul & SW raised by 200mm	SDCC	N	Y
Effluent seeped to Liffey through ground	L2 – limited, ground contamination	Rising main pipe fracture at Lucan Spa DPS	1	Pipe damage repaired by SDCC	SDCC	N	Y
Overflow to stream activation	Minor L1 – Main choke – Griffeen Valley	Blocked foul sewer	1	Foul sewer dragged & jetted	SDCC	N	Y
Overflow to Camac Stream	Minor L1 – Woodford Downs main choke	Blocked sewer – flat gradient	1	Foul sewer jetted & area cleaned up	SDCC	N	Y
Overflow to Luas car park	Minor, L1 – Cheererstown Luas station car park	Blocked sewer - choke	1	Foul sewer jetted & area cleaned up	SDCC	N	Y
Overflow to surface water drain	Minor L1 – Dromcarra Grove - main choke	Blocked sewer	1	Foul sewer jetted	SDCC	N	Υ
Overflow to surface water drain	Minor L1 – Kilvere Estate - main choke	Blocked sewer	1	Foul sewer jetted. Minor manhole repairs to be carried out to prevent blockage	SDCC	N	Y

Note 1: For shellfish waters notify the Marine Institute (MI) Sea Fisheries Protection Authority (SFPA) Food Safety Authority (FSAI) and An Bord Iascaigh Mhara (BIM). This should also include any other authorities that should be contacted arising from the findings of any Licence Specific Reports also e.g. Drinking Water Abstraction Impact Risk Assessment, Fresh Water Pearl Mussel Impact Assessments etc.

**Table 3.5.2 - Summary of Overall Incidents** 

Number of Incidents in 2014	8
Number of Incidents reported to the EPA via EDEN in 2014	0
Explanation of any discrepancies between the two numbers above	Refer below **

<sup>\*\*</sup>Table 3.5 above summaries the list of incidents that, in the normal course of events, would be reported to the EPA. The incident list was not uploaded to EDEN due to system access problems. It should be noted that several incidents were deemed reportable due to these being categorised as 'chokes' in the foul sewer system.

#### 3.6 Sludge / Other inputs to the WWTP

This is not required for the South Dublin portion of the Ringsend agglomeration.

**Table 3.6 - Other Inputs** 

Input type	m³/year	PE/year	% of load to WWTP	Is there a leachate/sludge acceptance procedure for the WWTP?	Is there a dedicated leachate/sludge acceptance facility for the WWTP? (Y/N)
Domestic /Septic Tank Sludge	n/a	n/a	n/a	n/a	n/a
Industrial / Commercial Sludge	n/a	n/a	n/a	n/a	n/a
Landfill Leachate (delivered by tanker)	n/a	n/a	n/a	n/a	n/a
Landfill Leachate (delivered by sewer network)	n/a	n/a	n/a	n/a	n/a
Waste sludges imported from nearby LA small WWTPs	n/a	n/a	n/a	n/a	n/a

#### Notes:

- 1. Other Inputs include; septic tank sludge, industrial /commercial sludge, landfill leachate and any other sludge that is collected and added to the treatment plant.
- 2. <u>Sludge that is added to a dedicated sludge reception facility at a waste water treatment plant not included in Table 3.6.</u> Only include sludge which is added to the waste water treatment process stream. Enter zero where there are no inputs

#### Section 4. Infrastructural Assessments and Programme of Improvements

#### 4.1 Storm water overflow identification and inspection report

The storm water overflows (SWO) and emergency overflows (EO) that are maintained by South Dublin County Council on behalf of Irish Water are listed in Appendix 6.2 of this report.

One such overflow is located at Patrick Doyle Road. This overflow resides in the administrative area of Dun Laoghaire Rathdown County Council (DLRCC) and is included in the area of the agglomeration of that Local Authority.

Storm water overflows have been assessed as to their compliance with regard to the criteria contained in section 4 of the DoEHLG guidance document 'Procedures and Criteria in relation to Storm Water Overflows' viz. a viz. -

- 1. Causes significant visual or aesthetic impact and public complaints
- 2. Causes deterioration in water quality in the receiving water
- 3. Gives rise to failure in meeting the requirements of national regulations on foot of EU Directives (Bathing Waters, etc.)
- 4. Dry weather operation.

The Milltown CSO located at Patrick Doyle Road (which is denoted by the reference DLRCC\_B5\_R\_05 in licence application and located 316783E, 230085N) has been noted to cause aesthetic impact following an overflow. This CSO is deemed to be not in compliance with the criteria as set out above.

All other overflows meet the criteria.

Table 4.1.1 - SWO Identification and Inspection Summary Report

WWDL Name / Code for Storm Water Overflow	Irish Grid Ref.	Included in Schedule A4 of the WWDL	Signif- icance of the overflow (High / Medium / Low)	Compliance with DoEHLG Criteria	No. of times activated in 2014 (No. of events)	Total volume discharged in 2014 (m3)	Total volume discharged in 2014 (P.E.)	Estimated or Measured data
n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a

Table 4.1.2 - SWO Identification and Inspection Summary Report

How much sewage was discharged via SWOs in the agglomeration in the year (m³/yr)?	n/a
How much sewage was discharged via SWOs in the agglomeration in the	n/a
year (p.e.)?	
What % of the total volume of sewage generated in the agglomeration was	n/a
discharged via SWOs in the agglomeration in 2014?	
Is each SWO identified as non-compliant with <u>DoEHLG Guidance</u> included in	n/a
the Programme of Improvements?	
The SWO assessment includes the requirements of Schedule A3 & C3	n/a
Have the EPA been advised of any additional SWOs / changes to Schedule C3	n/a
and A4 under Condition 1.7?	

# **4.2** Report on progress made and proposals being developed to meet the improvement programme requirements.

There are no special Improvement Programmes for the South Dublin South portion of the Ringsend agglomeration detailed in Schedules A3 and C of the licence.

The South Dublin improvement programme of upgrading and replacing equipment in 2014 was primarily confined to Phase 2 works at Quarryvale Pumping Station:

<b>Pumping Station</b>	Description of Works	Benefits
Quarryvale PS (Phase 2	Upgrade of pump station.	Modernise equipment,
Upgrade) – Completed	Replacement of 2 pumps,	more efficient pumping,
early 2014	general equipment	improved working
	upgrading, new odour	environment improved
	control unit installed,	site and plant security.
	improved security fencing	
	and access gate provided.	

An updated improvement programme is included in Appendix 6.3

South Dublin County Council, on behalf of Irish Water is implementing misconnection survey work to identify misconnections between the surface and foul drainage systems.

**Table 4.2.1 - Specified Improvement Programme Summary** 

Specified Improvement Programmes (under Schedule A and C of WWDL)	Licence Schedule (A or C)	Licence Completion Date	Date Expired? (N/NA/Y)	Status of Works ((i) Not Started; (ii) At planning stage; (iii) Work ongoing on- site; (iv) Commissioning Phase; (v) Completed; (vi) Delayed)	% Construction Work Completed	Timeframe for Completing the Work	Comments
n/a	n/a	n/a	n/a	n/a	n/a	n/a	n/a

A summary of the status of any improvements identified by under Condition 5.2 is included below.

**Table 4.2.2 - Improvement Programme Summary** 

Improvement Identifier	Improvement Description	Improvement Source	Progress (% completed)	Expected Completion Date
n/a	n/a	n/a	n/a	n/a
n/a	n/a	n/a	n/a	n/a
n/a	n/a	n/a	n/a	n/a
n/a	n/a	n/a	n/a	n/a

Improvements identified above also include measures taken to prevent environmental damage anticipated following events or accidents/incidents associated with discharges or overflows from the waste water works and as such are considered to fulfil any Statement of Measures requirements (see Appendix 6.1).

#### Table 4.2.3 - Sewer Integrity Risk Assessment Tool Summary

The sewer network in South Dublin portion of the Ringsend agglomeration is sub-divided and managed as two catchments within the Agglomeration.

These catchments are the Dodder Valley Sewer (DVS) and the 9B sewer.

The details of the Sewer Integrity Risk Assessment are contained in Appendix 6.4 of this report and the following table summaries the outcome of that risk assessment as calculated by the EPA guidance document assessment tool.

The Improvement Programme should include an assessment of the integrity of the existing wastewater works for the following:	Risk Assessment Rating (High, Medium, Low)	Risk Assessment Score	Comment
Hydraulic Risk Assessment Score	MEDIUM RISK	73	
Environmental Risk Assessment Score	MEDIUM RISK	385	
Structural Risk Assessment Score	HIGH RISK	130	
Operation & Maintenance Risk Assessment Score	LOW RISK	60	
Overall Risk Score for the agglomeration	HIGH RISK	648	

#### **Section 5. Licence Specific Reports**

#### **Licence Specific Reports Summary Table**

Licence Specific Report	Required in 2014 AER or outstanding from previous AER	Included in 2014 AER	Reference to relevant section of AER
Priority Substances Assessment	No	No	
Drinking Water Abstraction Point Risk Assessment	No	No	
Habitats Impact Assessment	No	No	
Shellfish Impact Assessment	No	No	
Pearl Mussel Report	No	No	
Toxicity/Leachate Management	No	No	
Toxicity of Final Effluent Report	No	No	

#### **Licence Specific Reports Summary of Findings**

Licence Specific Report	Recommendations in Report	Summary of Recommendations in Report
Priority Substances Assessment	None	Not applicable
Drinking Water Abstraction Point Risk Assessment	Not required	Not applicable
Habitats Impact Assessment	Not required	Not applicable
Shellfish Impact Assessment	Not required	Not applicable
Pearl Mussel Report	Not required	Not applicable
Toxicity/Leachate Management	Not required	Not applicable
Toxicity of Final Effluent Report	Not required	Not applicable

#### **5.1 Priority Substances Assessment**

Not required under this portion of the Ringsend licence.

**Table 5.1 - Priority Substance Assessment Summary** 

	Licensee self- assessment checks to determine whether all
	relevant information is included
	in the Assessment.
Does the assessment use the Desk Top Study Method or Screening	
Analysis to determine if the discharge contains the parameters in	n/a
Appendix 1 of the EPA guidance	·
Does the assessment include a review of Trade inputs to the works?	n/a
Does the assessment include a review of other inputs to the works?	n/a
Does the report include an assessment of the significance of the results	
where a listed material is present in the discharge? (e.g. impact on the	n/a
relevant EQS standard for the receiving water)	
Does the assessment identify that priority substances may be impacting	n/a
the receiving water?	11/4
Does the Improvement Programme for the agglomeration include the	
elimination / reduction of all priority substances identified as having an	n/a
impact on receiving water quality?	

#### 5.2 Drinking Water Abstraction Point Risk Assessment.

Not required under this portion of the Ringsend licence.

#### 5.3 Shellfish Impact Assessment Report.

Not required under this portion of the Ringsend licence.

#### 5.4 Toxicity / Leachate Management

Not required under this portion of the Ringsend licence.

#### 5.5 Toxicity of the Final Effluent Report

Not required under this portion of the Ringsend licence.

#### **5.6 Pearl Mussel Measures Report**

Not required under this portion of the Ringsend licence.

#### **5.7 Habitats Impact Assessment Report**

Not required under this portion of the Ringsend licence.

#### **Section 6. Appendix**

Appendix 6.1 – Annual Statement of Measures

Appendix 6.2 – Storm Water Overflow Identification Report

Appendix 6.3 – Improvement Programme

Appendix 6.4 – Sewer Integrity Risk Assessment

#### Appendix 6.1

#### **Annual Statement of Measures**

The general nature of measures identified include:

- Preventative maintenance at local pumping stations which support reduced adverse WWTP impact and failure
- Enhanced local pumping station capacity complemented by reduced number of system chokes which
  will contribute to minimization of effluent spills by a range of measures which include replacement of
  key pumps by chopper type pumps to cope with the variety of material arriving at pumping station
  facilities
- Regular inspection of storage tanks will identify potential risk of leakage from same.

# Appendix 6.2

## Appendix 6.3

#### **Improvement Programme**

#### **Updated Improvement Programme 2014**

Pump Station	Description of Works	Benefits
Quarryvale PS (Phase 2 Upgrade) - Completed	Upgrade of pump station. Replacement of 2 pumps, general equipment upgrading, new odour control unit installed, improved security fencing and access gate provided.	Modernise equipment, more efficient pumping, improved working environment, improved site and plant security.
Dodder Valley Trunk Sewer (DVS)-Completed	Diverted combined sewers from Butterfield Avenue at Kilvere Estate and Rathfarnham Shopping Centre to the DVS.	To prevent surcharge at manholes on Butterfield Ave. during heavy rain.
FOG (Fats, Oil & Grease) Programme - On going	Licensing all Food Outlets i.e. restaurants, take-away food- outlets, canteens, etc	To prevent blockages and overflows in the foul sewerage network.

#### **Planned Improvement Works in 2015**

Pumping Station	Description of Works	Benefits
Lucan Low Level PS – in progress	Replacement of Pumps (Screw Type Impeller Pump).	Help prevent clogging at Lucan Low Level. Original Pump 2 installed 1992.
Newcastle PS –Pump ordered - in progress	Installation of Pump 5 (Screw Type Impeller Pump).	Help prevent pump clogging at Newcastle
Whitehall Road PS – Unit ordered - in progress.	Installation of Odour Control Unit	Reduce/Eliminate Odour coming from wet-well reaching nearby residential properties.
Tobbermaclug PS – SCADA upgrade – System ordered - in progress	New HMI to be installed to replace desktop PC.	Enhance telemetry reliability

#### **APPENDIX 6.4**

## **Sewer Integrity Risk Assessment**

- (i) 9B incl Strawberry Beds and Palmerston Catchment
- (ii) DVS incl Walkinstown Kimmage Templeogue Catchment

## (i) <u>9B incl Strawberry Beds and Palmerston Catchment</u>

	Section 2.1 Hydraulic Risk Assessment							
Query	Description	Prompt	Risk Score	Short Commentary by the Local Authority	Comment or Action to be Taken			
2.1	Has a Hydraulic Performance Assessment been undertaken for the Sewer Network (e.g., Computer Model or other Engineering Design or Design Review)	Yes	0		If the answer is <b>No</b> assess the need and cost benefit of developing a computer model or engineering design assessment of the Sewer Network and complete Query 2.12. If the answer is <b>Yes</b> proceed to Queries 2.1.1 to 2.1.4 inclusive			
2.1.1	If Answer to Query 2.1 is Yes, what % of the Network is covered by the hydraulic assessment ?	100%	0		The % coverage of the Network by the Hydraulic Assessment can be estimated by the area assessed against the area served by the Network. ENTER "N/A" IF COMPUTER MODEL or DESIGN DOES NOT EXIST. DO NOT LEAVE BLANK OR ENTER "0".			
2.1.2	How many years has it been since the <b>completion</b> of the hydraulic assessment ?	5 to 10	3		Select N/A response if no design assessment or design exists.			
2.1.3	Are the outcomes of the Hydraulic Assessment being implemented ?	No	5		Select N/A response if no design assessment or design exists.			
2.1.4	How many years has it been since the outcomes of the hydraulic assessment have been implemented ?	Never	5		Select N/A response if no hydraulic performance assessment or design exists. For onging works select "less than 5".			
2.2	Has a Dynamic Computer Model been used to Assess the Hydraulic Performance of the Sewer Network ?	Yes	0		Computer Model means a Hydroworks/Infoworks Model, Micro-Drainage Model or equivalent.			
2.3	Has a Manhole Survey been undertaken in accordance with WRc Documentation "Model Contract Document for Manhole Location Surveys and the Production of Record Maps" ?	No	10		If the answer is No assess the need and cost benefit of undertaking a Manhole Survey and complete Query 2.12. If the answer is Yes proceed to Query 2.2.1			
2.3.1	If yes, how many years has it been since the survey was undertaken or updated?	more than 10	0		Select N/A if no Manhole Survey has been undertaken. Enter N/A value for Confidence Grade if Prompt Box is "N/A"			
2.4	Has a Flow Survey been undertaken in accordance with WRc Documentation "A Guide to Short Term Flow Surveys of Sewer Systems" and "Contract Documents for Short Term Sewer Flows" ?	Yes	0		If the answer is No assess the need and cost benefit of undertaking a Flow Monitoring Survey and complete Query 2.12			
2.5	What was this Flow Survey Information Used for ?							

2.5.1	To Determine the extent of Problematic Sewer Catchments	Yes	0		Select N/A if no Flow Survey has been undertaken.		
2.5.2	To Verify a Computer or Mathematical Model of the Network	Yes	0		Select N/A if no Flow Survey has been undertaken.		
2.6	Have Performance Criteria been developed to determine the short, medium or long term capacity of the sewer network ?	Yes	0		If the answer is <b>No</b> assess the Future Needs of the Sewer Network and complete Query 2.12. If the answer is <b>Yes</b> proceed to Query 2.5		
2.7	How many flood events resulting from surcharge in the network have occurred in the past 3 years?	more than 6	10		Flood events in this context means water/sewage backing up from the Network causing flooding of properties or causing disruption of traffic		
2.8	Are there deficiencies in performance criteria within the sewer network ?	Yes	20		If the answer is <b>No</b> , Proceed to Query 2.10 and complete Query 2.12.  If the answer is <b>Yes</b> proceed to Query 2.9		
2.9	Have the causes of these deficiencies in the Performance Criteria been identified and rectified ?	No	10		If the answer is No, consider further examination of the hydraulic model (if available) and complete Query 2.12.  If the answer is Yes proceed to Query 2.10		
2.10	Gan the Hydraulic Assessment (defined in Query 2.1 above) be used to determine the benefit of reducing the contributory impermeable Areas or extent of surface water contributions	Yes	0		If the answer is <b>No</b> , consider further development of the Hydraulic Assessment (or model if available) and complete Query 2.12. If the answer is <b>Yes</b> proceed to Query 2.11		
2.11	Has an Impermeable Area Survey been carried out for the agglomeration or parts of the agglomeration ?	No	10		If the answer is No, consider the need and cost benefit of undertaking an Impermeable Survey for parts of the agglomeration which are under hydraulic pressure and complete Query 2.12.		
	Total Risk Assessme	nt Score (RAS)	73				
2.12	Prepare Assessment of Needs & Sewer Upgrade In the AER Attach Assessment of Needs and Rehabilitation Implementation Plan as separate documents						
2.13	In the AER provide Summary of Proposed Works or Direction to be taken to improve hydraulic efficiency						

## Part 2 South Dublin County Council Functional Area

	Section 3.1 Environmental Risk Assessment							
Query	Description	Prompt	Risk Score	Short Commentary by the Local Authority	Comment or Action to be Taken			
3.1	What Environmental or Discharge Quality Data is available with regard to the sewer network ?	largely anecdotal	20		Select N/A if no discharges, secondary discharges or overflows from network; if discharges do exist complete Query 3.12			
3.1.1	Do trade effluents discharge to the sewer network?	Yes	20		If the answer is <b>No</b> , proceed to Query 3.1.2. If the answer is <b>Yes</b> , Proceed to Query 3.2			
3.1.2	Are there Storm Water Overflows within the network ?	Yes	20		If the answer is No. proceed to Query 3.1.3. If the answer is Yes, Proceed to Query 3.3			
3.1.3	Are there Secondary Discharges within the network (excluding Emergency Overflows at Pump Stations)?	No	0		If the answer is No, proceed to Query 3.1.4.			
3.1.4	is there any evidence that exfiltration is occurring from the network ?	Unknown	20		If the answer is No. does all wastewater enter a wastewater treatment plant (insert summary details in the AER/?  If Yes, Proceed to Query 3.6			
3.2	If Answer to Guery 3.1.1 is "Yes", what % of trade, effluents have a licence to Discharge to the Public Sewer?	>90%	#VALUE!		Select N/A if answer to Query 3.1.1 is No. If not all trade effleunts are licenced, Local Authority should consider issuing and controlling such discharges under the appropriate Legislation.			
3.2.1	Are all licenced trade Discharges compliant with their relevant licence and associated conditions	Yes	0		Answer N/A if none of the trade effluents are licenced.  Answer No if this information is unknown. If the answer is <b>Unknown</b> or <b>No</b> , consider issuing a direction to the relevant Licencee.  If the answer is <b>Yes</b> , no further action is needed.			
3.2.2	If Answer to Query 3.2.1 is "No", state what % of Trade  Discharges are NOT compilant with their relevant,  licence and associated conditions (where that non- compilance led to enforcement action)	0 - 10%	0		Select N/A if answer to Query 3.2.1 is Yes. If N/A is selected as answer to Query 3.2.2			
3.3	In accordance with the DoEHLG paper "Procedures & Criteria in relation to Storm Water Overflows", what % of storm water overflows in the system have been classified for their significance?	<25%	50		If the answer is <b>No</b> , consider a review of each discharge within the sewer network complete and Query 3.11. If the answer is <b>Yes</b> , proceed to Query 3. 6			
3.4	Have samples from any Secondary Discharges within the system been analysed ?	Yes	0		Select N/A if no secondary discharges in system. If the answer to Query 3.4 is No, consider examining the quality of each secondary discharge within the sewer network complete Query 3.11. If the answer is Yes, proceed to Query			
3.5	What percentage of discharges from the system are known to cause environmental pollution of the receiving waters?	11 - 20%	#VALUE!		If the answer is greater than 50% then detail, in the AER, the Improvement Programme necessary to reduce this percentage.			
3.6	In relation to possible exfiitration has a risk analysis of ground water contamination or poliution been, undertaken 2	No	20		is No, consider undertaking ground water risk analysis and complete Query 3.12			
3.6.1	If Answer to Query 3.6 is "Yes", have any groundwater aquifers been identified in the area of the Network and/or Discharge Points?	N/A	0		Select N/A if no risk analysis of groundwater contamination has been undertaken.			
3.6.2	If Answer to Query 3.6.1 is "Yes", state the classification of groundwater aquifer identified in the area?	N/A	0		Select N/A if no risk analysis of groundwater contamination has been undertaken.			
3.6.3	in relation to Query 3.6.1, is the aguifer used as a source for Public, Private or Group Water Supply Schemes?	N/A	0		Select N/A if no risk analysis of groundwater contamination has been undertaken.			
3.7	Has an Impact Assessment of each Storm Water  Overflow been undertaken in accordance with the  DoEHLG paper "Procedures & Criteria in relation to  Storm Water Overflows" including setting performance  criteria?	No	40		If the answer is No, consider assessing the risk category of the receiving waters.  If the answer is Yes, proceed to Query 3.5 and provide summary details of the assessment in the AER.			
3.5	What percentage of storm water overflows comply with the performance criteria referred to in Query 3.7?	0 - 10%	55		Select N/A if answer to Query 3.7 is No or if there are no SWOs in system. (Risk Score is locked at 0 if no SWOs in system is stated in Agglomeration Details)			
3.9	Have the causes of these Capacity Deficiencies (storm water overflows & Secondary Discharges) been identified ?	Yes	0		no SWOs in system. If the answer to Query 3.9 is No, consider further examination of the environmental model			
	Total Risk Assessment Score (RAS) #VALUE!							
3.10	Prepare Assessment of Needs & Sewer Upgrade Implementation Plan	In the AER Attack	h Assessment	of Needs and Reh	abilitation Implementation Plan as separate documents			
3.11	Provide Summary Details (in the AER) of records upstream details can be	and downstream of included as part of						

24 | Irish Water

	Section 4.1 Structural Risk Assessment							
Query	Description	Prompt	Risk Score	Short Commentary by the Local Authority	Comment or Action to be Taken			
4.1	Has a CCTV Survey been undertaken in accordance with WRc Documentation "Model Contract Document for Sewer Condition Inspections" and "Manual of Sewer Condition Classification" ?	No	10		If the answer is <b>No</b> assess the need and benefit of undertaking CCTV Survey. If <b>Yes</b> Proceed to Query 4.2			
4.1.1	How many years has it been since the completion of the OCTV Survey?	N/A	0		If no CCTV has been undertaken, select "N/A" response			
4.2	What was this CCTV Survey Information Used for?	N/A	10		Select N/A if answer to Query 4.1 is NO.			
4.3	Has the CCTV Survey been used to Assess the Structural Condition of the Sewer Network or targeted sections of the Sewer Network?	Yes	0		If no CCTV has been undertaken, select "No" response.  If the answer is No assess the need and benefit of undertaking an assessment of the Structural Condition of the Sewer Network.  If the answer is Yes proceed to Q			
4.4	Have Performance Criteria been developed to determine the short, medium or long term structural condition of the sewer network ?	Yes	0		If the answer is No, enter "unknown" in response to Queries 4.4.1 to 4.4.5; consider assessing the Future Needs of the Sewer Network. If the answer is Yes proceed to Queries 4			
4.4.1	What % of the Total Sewer Length contains Collapsed or Imminent Collapse of Sewers (Grade 5)	unknown	30		Insert Percentage of Overall Network Length; if a sewer length contains a Grade 5 collapse, include the total length of that sewer in calcuating the %. If information is not available type "Unknown" into Prompt Box			
4.4.2	What % of Total Sewer Length contains Sewers Likely to Collapse (Grade 4)	unknown	25		Insert Percentage of Overall Network Length; if a sewer length contains a Grade 4 condition, include the total length of that sewer in calcuating the %. If information is not available type "Unknown" into Prompt Box			
4.4.3	What % of Total Sewer Length contains sewers with Further Possible Deterioration (Grade 3)	unknown	10		Insert Percentage of Overall Network Length; if a sewer length contains a Grade 3 deterioration, include the total length of that sewer in calcuating the %. If Information is not available type "Unknown" into Prompt Box			
4.4.4	What % of Total Sewer Length contains sewers with Minimal Collapse (Grade 2)	unknown	5		Insert Percentage of Overall Network Length; if a sewer length contains a Grade 2 feature, include the total length of that sewer in calcuating the %. If Information is not available type "Unknown" into Prompt Box			
4.4.5	What % of Total Sewer Length contains sewers of Acceptable Structural Condition (Grade 1)	unknown	5		Insert Percentage of Overali Network Length. If Information is not available type "Unknown" into Prompt Box			
If al	1% lengths are known, Check Total Length = 100%		75		If answers to Queries 4.4.1, 4.4.2 or 4.4.3 are above a set level, the RAS for Query 4 is automitically set at the maximum of 140.			
4.5	What % of the deficiencies, as detailed in items 4.4.1. 4.4.2 and 4.4.3, have been rectified ?	N/A	35		Select N/A if answer to Query 4.4 is <b>No.</b> if the answer is <b>No.</b> Proceed to Query 4.6 if the answer is <b>Yes</b> , what monitoring is in place to ensure continued acceptance of structural condition?  Proceed to Query 4.7			
4.6	Have the causes of the Structural Deficiencies (Grades 3, 4 and 5) been identified or is there a Preventative Maintenance Programme in place?	Yes	0		If the answer is No, consider further examination of the sewer network, the structural loading conditions, gradients and possible H <sub>2</sub> S Formation. If Yes completed Query 4.7			
	Total Risk As	sessment Score (RAS)	130					

4.7	Prepare Assessment of Needs & Sewer Rehabilitation Implementation Plan	In the AER Attach Assessment of Needs and Rehabilitation Implementation Plan as separate documents

## Part 2 South Dublin County Council Functional Area

	Section 5.1 O&M Risk Assessment								
Query	Description	Prompt	Risk Score	Short Commentary by the Local Authority	Comment or Action to be Taken				
5.1	Are complaints of an environmental nature recorded and held in a central database?	Yes	0		Consider setting up Central Database for Complaints				
5.2	Is there an emergency response procedure in place?	Yes	0		Consider setting up target response times for dealing with Complaints				
5.3	What has been the highest frequency of flooding in the network due to hydraulic inadequacy, over the past 5 years?	Once/yr	4		Refers to flooding from the Network only, not natural flooding from rivers/streams/high tides. Select the highest number of events in any 12 month period.				
5.4	What has been the highest frequency of flooding in the network due to operational causes over the past 5 years?	More than 5 times/yr	20		Refers to flooding from the Network only, not natural flooding from rivers/streams/high tides. Select the highest number of events in any 12 month period.				
5.5	What has been the highest frequency of surcharging of critical sewers in the network, over the past 5 years?	More than 5 times/yr	20		Select the highest number of events in any 12 month period.				
5.6	What has been the highest frequency of reportable incidents in the network, over the past 5 years?	Once/yr	2		Select the highest number of events in any 12 month period.				
5.7	What has been the highest frequency of reportable incidents due to discharges, for whatever reason, from Pumping Station Emergency Overflows in the network, over the past 5 years?	Once/yr	2		Select the highest number of events at any given Pumping Station in any 12 month period.				
5.8	What has been the highest frequency of blockages In sewers in the network over the past 5 years?	0.05 - 0.1/km/yr	12		Select the highest number of events per km of sewer network in any 12 month period.				
5.9	What has been the highest frequency of collapses In sewers in the network over the past 5 years?	Опсе/ут	4		Select the highest number of events in any 12 month period.				
5.10	What has been the highest frequency of bursts in rising mains in the network over the past 5 years?	None	0	-	Select the highest number of events in any 12 month period.				
	Total Risk Ass	essment Score (RAS)	64

## (ii) DVS incl Walkinstown Kimmage Templeogue Catchment

	Section	2.1 Hydrau	lic Risk A	ssessment	
Query	Description	Prompt	Risk Score	Short Commentary by the Local Authority	Comment or Action to be Taken
2.1	Has a Hydraulic Performance Assessment been undertaken for the Sewer Network (e.g., Computer Model or other Engineering Design or Design Review)	Yes	0		If the answer is <b>No</b> assess the need and cost benefit of developing a computer model or engineering design assessment of the Sewer Network and complete Query 2.12. If the answer is <b>Yes</b> proceed to Queries 2.1.1 to 2.1.4 inclusive
2.1.1	If Answer to Query 2.1 is Yes, what % of the Network is covered by the hydraulic assessment ?	100%	0		The % coverage of the Network by the Hydraulic Assessment can be estimated by the area assessed against the area served by the Network. ENTER "N/A" IF COMPUTER MODEL or DESIGN DOES NOT EXIST. DO NOT LEAVE BLANK OR ENTER "0".
2.1.2	How many years has it been since the completion of the hydraulic assessment ?	5 to 10	3		Select N/A response if no design assessment or design exists.
2.1.3	Are the outcomes of the Hydraulic Assessment being implemented ?	No	5		Select N/A response if no design assessment or design exists.
2.1.4	How many years has it been since the <b>outcomes</b> of the hydraulic assessment have been implemented ?	Never	5		Select N/A response if no hydraulic performance assessment or design exists. For onging works select "less than 5".
2.2	Has a Dynamic Computer Model been used to Assess the Hydraulic Performance of the Sewer Network ?	Yes	0		Computer Model means a Hydroworks/Infoworks Model, Micro-Drainage Model or equivalent.
2.3	Has a Manhole Survey been undertaken in, accordance with WRc Documentation "Model Contract Document for Manhole Location Surveys and the Production of Record Maps" 7	No	10		If the answer is <b>No</b> assess the need and cost benefit of undertaking a Manhole Survey and complete Query 2.12. If the answer is <b>Yes</b> proceed to Query 2.2.1
2.3.1	If yes, how many years has it been since the survey was undertaken or updated?	more than 10	0		Select N/A if no Manhole Survey has been undertaken. Enter N/A value for Confidence Grade if Prompt Box is "N/A"
2.4	Has a Flow Survey been undertaken in accordance with WRc Documentation "A Guide to Short Term Flow Surveys of Sewer Systems" and "Contract Documents for Short Term Sewer Flows" ?	Yes	0		If the answer is No assess the need and cost benefit of undertaking a Flow Monitoring Survey and complete Query 2.12. If answer is Yes Proceed to Query 2.5

_							
2.5	What was this Flow Survey Information Used for ?						
2.5.1	To Determine the extent of Problematic Sewer Catchments	Yes	0		Select N/A if no Flow Survey has been undertaken.		
2.5.2	To Verify a Computer or Mathematical Model of the Network	Yes	0		Select N/A if no Flow Survey has been undertaken.		
2.6	Have Performance Criteria been developed to determine the short, medium or long term capacity of the sewer network ?	Yes	0		If the answer is <b>No</b> assess the Future Needs of the Sewer Network and complete Query 2.12. If the answer is <b>Yes</b> proceed to Query 2.8		
2.7	How many flood events resulting from surcharge in the network have occurred in the past 3 years?	more than 6	10		Flood events in this context means water/sewage backing up from the Network causing flooding of properties or causing disruption of traffic		
2.8	Are there deficiencies in performance criteria within the sewer network ?	Yes	20		If the answer is <b>No</b> , Proceed to Query 2.10 and complete Query 2.12.  If the answer is <b>Yes</b> proceed to Query 2.9		
2.9	Have the causes of these deficiencies in the Performance Criteria been identified and rectified ?	No	10		If the answer is <b>No</b> , consider further examination of the hydraulic model (if available) and complete Query 2.12.  If the answer is <b>Yes</b> proceed to Query 2.10		
2.10	Gan the Hydraulic Assessment (defined in Query 2.1 above) be used to determine the benefit of reducing the contributory innormeable Areas or extent of gurface water contributions	Yes	0		If the answer is No, consider further development of the Hydraulic Assessment (or model if available) and complete Query 2.12. If the answer is Yes proceed to Query 2.11		
2.11	Has an Impermeable Area Survey been carried out for the agglomeration or parts of the agglomeration ?	No	10		if the answer is No, consider the need and cost benefit of undertaking an Impermeable Survey for parts of the agglomeration which are under hydraulic pressure and complete Query 2.12.		
	Total Risk Assessme	ent Score (RAS)	73				
2.12	Prepare Assessment of Needs & Sewer Upgrade Implementation Plan	In the AER Attach Assessment of Needs and Rehabilitation Implementation Plan as separate documents					
2.13	In the AER provide Summary of Proposed Works or Direction to be taken to improve hydraulic efficiency						

## Part 2 South Dublin County Council Functional Area

	Section 3.1 Environmental Risk Assessment							
Query	Description	Prompt	Risk Score	Short Commentary by the Local Authority	Comment or Action to be Taken			
3.1	What Environmental or Discharge Quality Data is available with regard to the sewer network ?	largely anecdotal	20		Select N/A if no discharges, secondary discharges or overflows from network; if discharges do exist complete Query 3.12			
3.1.1	Do trade effluents discharge to the sewer network?	Yes	20		If the answer is <b>No</b> , proceed to Query 3.1.2. If the answer is <b>Yes</b> , Proceed to Query 3.2			
3.1.2	Are there Storm Water Overflows within the network ?	Yes	20		If the answer is No, proceed to Query 3.1.3. If the answer is Yes, Proceed to Query 3.3			
3.1.3	Are there Secondary Discharges within the network (excluding Emergency Overflows at Pump Stations)?	No	0		If the answer is No, proceed to Query 3.1.4.			
3.1.4	Is there any evidence that exfiltration is occurring from the network ?	Unknown	20		If the answer is No. does all wastewater enter a wastewater treatment plant (insert summary details in the AER)?  If Yes, Proceed to Query 3.6			
3.2	If Answer to Query 3.1.1 is "Yes", what % of trade, effluents have a licence to Discharge to the Public.  Sewer ?	>90%	#VALUE!		Select N/A if answer to Query 3.1.1 is No. if not all trade efficients are licenced, Local Authority should consider issuing and controlling such discharges under the appropriate Legistation.			
3.2.1	Are all licenced trade Discharges compilant with their relevant licence and associated conditions	Yes	0		Answer N/A if none of the trade effluents are licenced.  Answer No if this information is unknown. If the answer is Unknown or No, consider issuing a direction to the relevant Licence.  If the answer is Yes, no further action is needed.			
3.2.2	If Answer to Query 3.2.1 is "No", state what % of Trade <u>Discharges are NOT compilant with their relevant</u> , <u>licence and associated conditions (where that non-compilance led to enforcement action)</u>	0 - 10%	0		Select N/A if answer to Query 3.2.1 is Yes. If N/A is selected as answer to Query 3.2.2			
3.3	in accordance with the DoEHLG paper "Procedures & Griteria in relation to Storm Water Overflows", what % of storm water overflows in the system have been classified for their significance?	<25%	50		If the answer is <b>No</b> , consider a review of each discharge within the sewer network complete and Query 3.11.  If the answer is <b>Yes</b> , proceed to Query 3. 6			
3.4	Have samples from any Secondary Discharges within, the system been analysed ?	Yes	0		Select N/A if no secondary discharges in system. If the answer to Query 3.4 is No, consider examining the quality of each secondary discharge within the sewer network complete Query 3.11. If the answer is Yes, proceed to Query			
3.5	What percentage of discharges from the system are known to cause environmental pollution of the receiving waters ?	11 - 20%	#VALUE!		If the answer is greater than 50% then detail, in the AER, the Improvement Programme necessary to reduce this percentage.			
3.6	In relation to possible exfiltration has a risk analysis of ground water contamination or pollution been undertaken ?	No	20		Is No, consider undertaking ground water risk analysis and complete Query 3.12			
3.6.1	If Answer to Query 3.6 is "Yes", have any groundwater aquifers been identified in the area of the Network and/or Discharge Points?	N/A	0		Select N/A if no risk analysis of groundwater contamination has been undertaken.			
3.6.2	If Answer to Query 3.6.1 is "Yes", state the classification of groundwater aquifer identified in the area?	N/A	0		Select N/A if no risk analysis of groundwater contamination has been undertaken.			
3.6.3	In relation to Query 3.6.1, is the aguifer used as a source for Public, Private or Group Water Supply Schemes?	N/A	0		Select N/A if no risk analysis of groundwater contamination has been undertaken.			
3.7	Has an impact Assessment of each Storm Water.  Overflow been undertaken in accordance with the DOEHLS paper "Procedures & Criteria in relation to Storm Water Overflows" including setting performance criteria?	No	40		If the answer is <b>No</b> , consider assessing the risk category of the receiving waters. If the answer is <b>Yes</b> , proceed to Query 3.5 and provide summary details of the assessment in the AER.			
3.5	What percentage of storm water overflows comply with the performance criteria referred to in Query 3.7?	0 - 10%	55		Select N/A if answer to Query 3.7 is No or if there are no SWOs in system. (Risk Score is locked at 0 if no SWOs in system is stated in Aggiomeration Details)			
3.9	Have the causes of these Capacity Deficiencies (storm water overflows & Secondary Discharges) been identified ?	Yes	0		no SWOs in system. If the answer to Query 3.9 is <b>No</b> , consider further examination of the environmental model			
3.10	Total Risk Assessment Score (RAS) #VALUE!  Prepare Assessment of Needs & Sewer Upgrade. Implementation Plan as separate documents In the AER Attach Assessment of Needs and Rehabilitation Implementation Plan as separate documents							
3.11	Implementation Plan  Provide Summary Details (in the AER) of records upstream and downstream of licenced discharges with regard to Environmental Performance of the network. These

#### Section 1. Executive Summary and Introduction to the 2014 AER

#### 1.1 Summary report on 2014

This Annual Environmental Report has been prepared for D0034-01, Ringsend, in County Dublin in accordance with the requirements of the wastewater discharge licence for the agglomeration. This Annual Environmental Report specifically relates to the Fingal County Council administrative area of the Ringsend agglomeration.

The Greater Dublin Area Agglomeration includes all of the geographical area of Dublin City Council and parts of Fingal County Council functional area, South Dublin County Council functional area, Dun Laoghaire Rathdown County Council functional area and Meath County Council functional area. The agglomeration is served by one waste water treatment plant (WWTP) at Ringsend (Ringsend Treatment Works) close to Dublin City centre.

The following improvement works were undertaken during 2014:-

- Regular sump cleaning,
- Routine maintenance, provision and monitoring of telemetry system, ongoing staff training, and
- Pump station improvements ongoing electrical panel reviews, control panel upgrades, chain replacements, alarm review.

An Annual Statement of Measures is included in Appendix 6.1.

#### **Section 2. Monitoring Reports Summary**

#### 2.1 Summary report on monthly influent monitoring

No influent monitoring was carried out in the Fingal portion of the agglomeration.

#### 2.2 Discharges from the agglomeration

No monitoring of secondary discharges was carried out or is required.

#### 2.3 Ambient monitoring summary

There is no ambient monitoring to be carried out in the Fingal County Council administrative area.

#### 2.4 Data collection and reporting requirements under the Urban Waste Water Treatment Directive

No samples of the secondary discharges were required.

#### 2.5 Pollutant Release and Transfer Register (PRTR) - report for previous year

No PRTR is required for the Fingal portion of the agglomeration.

#### **Section 3 Operational Reports Summary**

#### 3.1 Treatment Efficiency Report

This is not required for the Fingal County Council portion of the agglomeration.

#### 3.2 Treatment Capacity Report

This is not required for the Fingal County Council portion of the agglomeration.

#### 3.3 Extent of Agglomeration Summary Report

In this section Irish Water is required to report on the amount of urban waste water generated within the agglomeration. It does not include any waste water collected and treated in a private system and discharged to water under a Section 4 Licence issued under the Water Pollution Acts 1977 (as amended):

**Table 3.3 - Extent of Agglomeration Summary Report** 

	% of p.e. load generated in the agglomeration
Load generated in the agglomeration that is collected in the sewer network	100%
Load collected in the agglomeration that enters treatment plant	99.9%
Load collected in the sewer network but discharged without treatment	

**Load generated in the agglomeration that is collected in the sewer network** is the total load generated and collected in the municipal network within the boundary of the agglomeration.

**Load collected in the agglomerations that enters treatment plant** is that portion of the previous figure which enters the waste water treatment plant

**Load collected but discharged without treatment** is that portion of the first figure which is discharged without treatment.

## 3.4 Complaints Summary

A summary of complaints of an environmental nature is included below.

**Table 3.4 - Complaints Summary Table:** 

Number	Date and time	Nature	Cause	Actions taken to Resolve	Closed
73,889	02/01/2014	INV Sewage Flooding	Sewage Overflow at Castleknock Cottages	Jetter cleared choke Washed down and disinfected the road	RCLOSE
7,3890	02/01/2014	INV Sewage Flooding	Sewage Overflow Main St Castleknock	Jetter cleared blockage	RCLOSE
73,920	02/01/2014	INV Sewage Flooding	Sewage Overflow Porterstown Village	Main choke at Porterstown Village requiring jetter and a crew for clean-up.	RCLOSE

Table 4.1.2 - SWO Identification and Inspection Summary Report

How much sewage was discharged via SWOs in the agglomeration in the year (m3/yr)?	Unknown
How much sewage was discharged via SWOs in the agglomeration in the year (p.e.)?	Unknown
What % of the total volume of sewage generated in the agglomeration was discharged via SWOs in the agglomeration in 2014?	Unknown
Is each SWO identified as non-compliant with <u>DoEHLG Guidance</u> included in the Programme of Improvements?	Not yet assessed
The SWO assessment includes the requirements of Schedule A3 & C3	Not yet assessed
Have the EPA been advised of any additional SWOs / changes to Schedule C3 and A4 under Condition 1.7?	N/A

# 4.2 Report on progress made and proposals being developed to meet the improvement programme requirements.

The Improvement Programme is included in Appendix 6.2.

The Improvement Programme report included in Appendix 6.2 addresses the **Specified Improvement Programmes** as detailed in Schedules A3 and C of the WWDL. It should detail other improvements identified through assessments required under the licence

**Table 4.2.1 - Specified Improvement Programme Summary** 

Specified Improvement Programmes (under Schedule A and C of WWDL)	Licence Schedule (A or C)	Licence Completion Date	Date Expired? (N/NA/Y)	Status of Works ((i) Not Started; (ii) At planning stage; (iii) Work ongoing on- site; (iv) Commissioning Phase; (v) Completed; (vi) Delayed;)	% Construction Work Completed	Timeframe for Completing the Work	Comments
Discharge S4Fingal to the Irish Sea to be discontinued	А	31/12/2011	Y	Completed	100%		
Discharge to cease: S5Fingal to the Irish Sea	A	27/10/2010	Y	At planning stage	0%	Unknown	Approved to move to the planning stage under the Portmarnock Drainage Scheme

There are no improvements identified under Condition 5.2.

#### Table 4.2.3 - Sewer Integrity Risk Assessment Tool Summary

Due to the nature of the agglomeration, two different Sewer Integrity Risk Assessment Tools have been completed.

#### 4.2.3 (a) North Fringe Sewer Catchment

The Improvement Programme should include an assessment of the integrity of the existing wastewater works for the following:	Risk Assessment Rating (High, Medium, Low)	Risk Assessment Score	Comment
Hydraulic Risk Assessment Score	High	130	
Environmental Risk Assessment Score	Low	180	
Structural Risk Assessment Score	High	150	
Operation & Maintenance Risk Assessment Score	Medium	132	
Overall Risk Score for the agglomeration	High	592	

#### 4.2.3 (b) 9C Catchment

The Improvement Programme should include an assessment of the integrity of the existing wastewater works for the following:	Risk Assessment Rating (High, Medium, Low)	Risk Assessment Score	Comment
Hydraulic Risk Assessment Score	Medium	57	
Environmental Risk Assessment Score	Low	50	
Structural Risk Assessment Score	Medium	65	
Operation & Maintenance Risk Assessment Score	Medium	108	
Overall Risk Score for the agglomeration	Low	280	

See Appendix 6.3 for Sewer Integrity Toot Output for the North Fringe Sewer Catchment and the 9C Catchment.

## **Licence Specific Reports Summary Table**

Licence Specific Report	Required in 2014 AER or outstanding from previous AER	Included in 2014 AER	Reference to relevant section of AER
Priority Substances Assessment	No	No	N/A
Drinking Water Abstraction Point Risk Assessment	No	No	N/A
Habitats Impact Assessment	No	No	N/A
Shellfish Impact Assessment	No	No	N/A
Pearl Mussel Report	No	No	N/A
Toxicity/Leachate Management	No	No	N/A
Toxicity of Final Effluent Report	No	No	N/A

## **Licence Specific Reports Summary of Findings**

Licence Specific Report	Recommendations in Report	Summary of Recommendations in Report
Priority Substances Assessment	N/A	N/A
Drinking Water Abstraction Point Risk Assessment	N/A	N/A
Habitats Impact Assessment	N/A	N/A
Shellfish Impact Assessment	N/A	N/A
Pearl Mussel Report	N/A	N/A
Toxicity/Leachate Management	N/A	N/A
Toxicity of Final Effluent Report	N/A	N/A

## **Section 6. Appendix**

Appendix 6.1 - Annual Statement of Measures

Appendix 6.2 – Specified Improvement Programme

Appendix 6.3 – Sewer Integrity Tool Outputs

## Appendix 6.1

## **Annual Statement of Measures**

Mitigation measure to be taken	Action	Date for completion
Regular sump cleaning		On going
Routine maintenance, provision and monitoring of telemetry system, ongoing staff training.		On going
Santry Foul Pumping Station Upgrade	ANB with IW	unknown
Paldayla Villaga DC Storm Dump	ANB with IW	unknown
Baldoyle Village PS Storm Pump	AND WILLITY	unknown
Portmarnock Strand PS catchment – rehabilitation of network	ANB being	
to minimise storm water infiltration.	prepared	
Rehabilitation of Mulhuddart Penstocks	ANB being	
	prepared	
Pump station improvements ongoing - electrical panel		Ongoing
reviews, control panel upgrades, chain replacements, alarm review.		

## Appendix 6.2

## **Specified Improvement Programme**

#### 7.5.1 Specified Improvement Programme

Specified Improvement Programmes (under Schedule A and C of WWDL)	Work Area	Licence Schedule (A or C)	Licence Completion Date	Has the date passed (Y/N)	Progress (Not Started, At tender stage, Ongoing Work on Site, Commissioni ng Phase, Completed)	% of site work completed	Comments
Discharge S4Fingal to the Irish Sea to be discontinued	Discharge to cease	A	31/12/2011	Y	Not started	0%	IW are seeking that the Doldrum bay discharge is to be considered as a secondary discharge within the Ringsend agglomeration discharging to coastal waters (not sensitive waters) with a greater than 70% reduction in BOD, IW will prepare and present a case to the EPA in this regard as part of a license review.
Discharge to cease: S5Fingal to the Irish Sea	Discharge to cease	A	27/10/2010	Y	Completed	100%	

## 7.5.2 Programme of Improvements

There are no improvements identified under Clause 5.2

## Appendix 6.3

## **Sewer Integrity Tool Output**

## Appendix 6.6 (a) – Sewer Integrity Tool Output: North Fringe Sewer Catchment

	Section 2.1 Hydraulic Risk Assessment								
Query	Description	Prompt	Risk Score	Short Commentary by the Local Authority	Comment or Action to be Taken				
2.1	Has a Hydraulic Performance Assessment been undertaken for the Sewer Network (e.g., Computer Model or other Engineering Design or Design Review)	Yes	0		If the answer is <b>No</b> assess the need and cost benefit of developing a computer model or engineering design assessment of the Sewer Network and complete Query 2.12. If the answer is <b>Yes</b> proceed to Queries 2.1.1 to 2.1.4 inclusive				
2.1.1	If Answer to Query 2.1 is Yes, what % of the Network is covered by the hydraulic assessment ?	20%	20		The % coverage of the Network by the Hydraulic Assessment can be estimated by the area assessed against the area served by the Network. ENTER "N/A" IF COMPUTER MODEL or DESIGN DOES NOT EXIST. DO NOT LEAVE BLANK OR ENTER "0".				
2.1.2	How many years has it been since the completion of the hydraulic assessment?	more than 10	5		Select N/A response if no design assessment or design exists.				
2.1.3	Are the outcomes of the Hydraulic Assessment being implemented ?	Yes	0		Select N/A response if no design assessment or design exists.				
2.1.4	How many years has it been since the outcomes of the hydraulic assessment have been implemented ?	more than 10	5		Select N/A response if no hydraulic performance assessment or design exists. For onging works select "less than 5".				
2.2	Has a Dynamic Computer Model been used to Assess the Hydraulic Performance of the Sewer Network ?	Yes	0		Computer Model means a Hydroworks/Infoworks Model, Micro-Drainage Model or equivalent.				
2.3	Has a Manhole Survey been undertaken in, accordance with WRc Documentation "Model Contract Document for Manhole Location Surveys and the Production of Record Maps" 2	No	10		If the answer is No assess the need and cost benefit of undertaking a Manhole Survey and complete Query 2.12. If the answer is Yes proceed to Query 2.2.1				
2.3.1	If yes, how many years has it been since the survey was undertaken or updated?	more than 10	0		Select N/A if no Manhole Survey has been undertaken. Enter N/A value for Confidence Grade if Prompt Box is "N/A"				
2.4	Has a Flow Survey been undertaken in accordance with WRc Documentation "A Guide to Short Term Flow Surveys of Sewer Systems" and "Contract Documents for Short Term Sewer Flows" ?	No	20		If the answer is No assess the need and cost benefit of undertaking a Flow Monitoring Survey and complete Query 2.12. If answer is Yes Proceed to Query 2.5				
2.5	What was this Flow Survey Information Used for ?								
2.5.1	To Determine the extent of Problematic Sewer Catchments	Yes	0		Select N/A if no Flow Survey has been undertaken.				
2.5.2	To Verify a Computer or Mathematical Model of the Network	N/A	0		Select N/A if no Flow Survey has been undertaken.				
2.6	Have Performance Criteria been developed to determine the short, medium or long term capacity of the sewer network ?	No	10		If the answer is <b>No</b> assess the Future Needs of the Sewer Network and complete Query 2.12. If the answer is <b>Yes</b> proceed to Query 2.8				
2.7	How many flood events resulting from surcharge in the network have occurred in the past 3 years?	more than 6	10		Flood events in this context means water/sewage backing up from the Network causing flooding of properties or causing disruption of traffic				
2.8	Are there deficiencies in performance criteria within the sewer network ?	Yes	20		If the answer is <b>No</b> , Proceed to Query 2.10 and complete Query 2.12.  If the answer is <b>Yes</b> proceed to Query 2.9				
2.9	Have the causes of these deficiencies in the Performance Criteria been identified and rectified ?	No	10		If the answer is No, consider further examination of the hydraulic model (if available) and complete Query 2.12.  If the answer is Yes proceed to Query 2.10				
2.10	Can the Hydraulic Assessment (defined in Query 2.1 above) be used to determine the benefit of reducing the contributory impermeable Areas or extent of surface water contributions	No	10		If the answer is No, consider further development of the Hydraulic Assessment (or model if available) and complete Query 2.12. If the answer is Yes proceed to Query 2.11				
2.11	Has an Impermeable Area Survey been carried out for the agglomeration or parts of the agglomeration ?	No	10		If the answer is No, consider the need and cost benefit of undertaking an Impermeable Survey for parts of the agglomeration which are under hydraulic pressure and complete Query 2.12.				
Total Risk Assessment Score (RAS) 130									
2.12	Prepare Assessment of Needs & Sewer Upgrade Implementation Plan	In the AER	Attach Assess		Rehabilitation Implementation Plan as separate ments

	Prepare Assessment of Needs & Sewer Upgrade Implementation Plan as separate documents							

	Section 4.1 Structural Risk Assessment							
Query	Description	Prompt	Risk Score	Short Commentary by the Local Authority	Comment or Action to be Taken			
4.1	Has a CCTV Survey been undertaken in accordance with WRc Documentation "Model Contract Document for Sewer Condition Inspections" and "Manual of Sewer Condition Classification" ?	No	10		If the answer is <b>No</b> assess the need and benefit of undertaking CCTV Survey. If <b>Yes</b> Proceed to Query 4.2			
4.1.1	How many years has it been since the completion of the CCTV Survey?	N/A	0		If no CCTV has been undertaken, select "N/A" response			
4.2	What was this CCTV Survey Information Used for?	N/A	10		Select N/A if answer to Query 4.1 is NO.			
4.3	Has the CCTV Survey been used to Assess the Structural Condition of the Sewer Network or targeted sections of the Sewer Network?	No	5		If no CCTV has been undertaken, select "No" response.  If the answer is No assess the need and benefit of undertaking an assessment of the Structural Condition of the Sewer Network.  If the answer is Yes proceed to Q			
4.4	Have Performance Criteria been developed to determine the short, medium or long term structural condition of the sewer network ?	No	5		If the answer is No, enter "unknown" in response to Queries 4.4.1 to 4.4.5; consider assessing the Future Needs of the Sewer Network. If the answer is Yes proceed to Queries 4			
4.4.1	What % of the Total Sewer Length contains Collapsed or Imminent Collapse of Sewers (Grade 5)	unknown	30		Insert Percentage of Overall Network Length; if a sewer length contains a Grade 5 collapse, include the total length of that sewer in calcuating the %. If Information is not available type "Unknown" into Prompt Box			
4.4.2	What % of Total Sewer Length contains Sewers Likely to Collapse (Grade 4)	unknown	25		Insert Percentage of Overall Network Length; if a sewer length contains a Grade 4 condition, include the total length of that sewer in calcuating the %. If Information is not available type "Unknown" into Prompt Box			
4.4.3	What % of Total Sewer Length contains sewers with Further Possible Deterioration (Grade 3)	unknown	10		Insert Percentage of Overall Network Length; if a sewer length contains a Grade 3 deterioration, include the total length of that sewer in calcuating the %. If information is not available type "Unknown" into Prompt Box			
4.4.4	What % of Total Sewer Length contains sewers with Minimal Collapse (Grade 2)	unknown	5		Insert Percentage of Overall Network Length; if a sewer length contains a Grade 2 feature, include the total length of that sewer in calcuating the %. If information is not available type "Unknown" into Prompt Box			
4.4.5	What % of Total Sewer Length contains sewers of Acceptable Structural Condition (Grade 1)	unknown	5		Insert Percentage of Overall Network Length. If Information is not available type "Unknown" into Prompt Box			
If all	% lengths are known, Check Total Length = 100%		75		If answers to Queries 4.4.1, 4.4.2 or 4.4.3 are above a set level, the RAS for Query 4 is automitically set at the maximum of 140.			
4.5	What % of the deficiencies, as detailed in items 4.4.1. 4.4.2 and 4.4.3, have been rectified ?	N/A	35		Select N/A if answer to Query 4.4 is No. If the answer is No. Proceed to Query 4.6 If the answer is Yes, what monitoring is in place to ensure continued acceptance of structural condition? Proceed to Query 4.7			
4.6	Have the causes of the Structural Deficiencies (Grades 3, 4 and 5) been identified or is there a Preventative Maintenance Programme in place?	No	10		If the answer is No, consider further examination of the sewer network, the structural loading conditions, gradients and possible H <sub>2</sub> S Formation. If Yes completed Query 4.7			
	Total Risk As	sessment Score (RAS)	150					

_		
4.7	Prepare Assessment of Needs & Sewer Rehabilitation Implementation Plan	In the AER Attach Assessment of Needs and Rehabilitation Implementation Plan as separate documents

	Section 5.1 O&M Risk Assessment							
Query	Description	Prompt	Risk Score	Short Commentary by the Local Authority	Comment or Action to be Taken			
5.1	Are complaints of an environmental nature recorded and held in a central database?	Yes	0		Consider setting up Central Database for Complaints			
5.2	Is there an emergency response procedure in place?	No	20		Consider setting up target response times for dealing with Complaints			
5.3	What has been the highest frequency of flooding.  In the network due to hydraulic inadequacy, over the past 5 years?	More than 5 times/yr	20		Refers to flooding from the Network only, not natural flooding from rivers/streams/high tides. Select the highest number of events in any 12 month period.			
5.4	What has been the highest frequency of flooding in the network due to operational causes over the past 5 years?	erational causes over the Twice/yr 8 flooding from		Refers to flooding from the Network only, not natural flooding from rivers/streams/high tides. Select the highest number of events in any 12 month period.				
5.5	What has been the highest frequency of surcharging of critical sewers in the network, over the past 5 years?	More than 5 times/yr	20		Select the highest number of events in any 12 month period.			
5.6	What has been the highest frequency of reportable incidents in the network, over the past 5 years?	More than 5 times/yr	20		Select the highest number of events in any 12 month period.			
5.7	What has been the highest frequency of reportable incidents due to discharges, for whatever reason, from Pumping Station Emergency Overflows in the network, over the past 5 years?	More than 5 times/yr	20		Select the highest number of events at any given Pumping Station in any 12 month period.			
5.8	What has been the highest frequency of blockages in sewers in the network over the past 5 years?	unknown	20		Select the highest number of events per km of sewer network in any 12 month period.			
5.9	What has been the highest frequency of collapses In sewers in the network over the past 5 years?	None	0		Select the highest number of events in any 12 month period.			
5.10	What has been the highest frequency of bursts in rising mains in the network over the past 5 years?	Once/yr	4		Select the highest number of events in any 12 month period.

Section 6.1 Summary of Risk Assessment Scores							
Element	Risk Assessment Score	Risk Category	% Risk Score	Maximum Risk Score			
Section 2.1 Hydraulic Risk Assessment	130	High Risk	87%	150			
Section 3.1 Environmental Risk Assessment	180	Low Risk	36%	500			
Section 4.1 Structural Risk Assessment	150	High Risk	100%	150			
Section 5.1 O&M Risk Assessment	132	Medium Risk	66%	200			
Total RAS for Network	592	High Risk	59%	1000			

If the total RAS is greater than 750, or if any of the individual RASs are greater than 75% of the Maximum Available Score, the Risk category for the Network is graded "High Risk"

Appendix 6.6 (b) – Sewer Integrity Tool Output: 9C Catchment

	Section 2.1 Hydraulic Risk Assessment								
Query	Description	Prompt	Risk Score	Short Commentary by the Local Authority	Comment or Action to be Taken				
2.1	Has a Hydraulic Performance Assessment been undertaken for the Sewer Network (e.g., Computer Model or other Engineering Design or Design Review)	Yes	0		If the answer is <b>No</b> assess the need and cost benefit of developing a computer model or engineering design assessment of the Sewer Network and complete Query 2.12. If the answer is <b>Yes</b> proceed to Queries 2.1.1 to 2.1.4 inclusive				
2.1.1	If Answer to Query 2.1 is Yes, what % of the Network is covered by the hydraulic assessment ?	80%	5		The % coverage of the Network by the Hydraulic Assessment can be estimated by the area assessed against the area served by the Network ENTER "N/A" IF COMPUTER MODEL or DESIGN DOES NOT EXIST. DO NOT LEAVE BLANK OR ENTER "0".				
2.1.2	How many years has it been since the completion of the hydraulic assessment ?	5 to 10	3		Select N/A response if no design assessment or design exists.				
2.1.3	Are the outcomes of the Hydraulic Assessment being implemented ?	Yes	0		Select N/A response if no design assessment or design exists.				
2.1.4	How many years has it been since the <b>outcomes</b> of the hydraulic assessment have been implemented ?	Never	5		Select N/A response if no hydraulic performance assessment or design exists. For ongling works select "less than 5".				
2.2	Has a Dynamic Computer Model been used to Assess the Hydraulic Performance of the Sewer Network ?	Yes	0		Computer Model means a Hydroworks/Infoworks Model, Micro-Drainage Model or equivalent.				
2.3	Has a Manhole Survey been undertaken in accordance with WRc Documentation "Model Contract Document for Manhole Location Surveys and the Production of Record Maps" 2	Yes	0		If the answer is <b>No</b> assess the need and cost benefit of undertaking a Manhole Survey and complete Query 2.12. If the answer is <b>Yes</b> proceed to Query 2.2.1				
2.3.1	If yes, how many years has it been since the survey was undertaken or updated?	5 to 10	7		Select N/A if no Manhole Survey has been undertaken. Enter N/A value for Confidence Grade if Prompt Box is "N/A"				
2.4	Has a Flow Survey been undertaken in accordance with WRc Documentation "A Guide to Short Term Flow Surveys of Sewer Systems" and "Contract Documents for Short Term Sewer Flows" ?	Yes	0		If the answer is <b>No</b> assess the need and cost benefit of undertaking a Flow Monitoring Survey and complete Query 2.12. If answer is <b>Yes</b> Proceed to Query 2.5				
2.5	What was this Flow Survey Information Used for ?								
2.5.1	To Determine the extent of Problematic Sewer Catchments	Yes	0		Select N/A if no Flow Survey has been undertaken.				
2.5.2	To Verify a Computer or Mathematical Model of the Network	Yes	0		Select N/A if no Flow Survey has been undertaken.				
2.6	Have Performance Criteria been developed to determine the short, medium or long term capacity of the sewer network ?	Yes	0		if the answer is <b>No</b> assess the Future Needs of the Sewer Network and complete Query 2.12. If the answer is <b>Yes</b> proceed to Query 2.5				
2.7	How many flood events resulting from surcharge in the network have occurred in the past 3 years?	3 to 6	7		Flood events in this context means water/sewage backing up from the Network causing flooding of properties or causing disruption of traffic				
2.8	Are there deficiencies in performance criteria within the sewer network ?	Yes	20		If the answer is <b>No</b> , Proceed to Query 2.10 and complete Query 2.12.  If the answer is <b>Yes</b> proceed to Query 2.9				
2.9	Have the causes of these deficiencies in the Performance Criteria been identified and rectified ?	Yes	0		If the answer is No, consider further examination of the hydraulic model (if available) and complete Query 2.12.  If the answer is Yes proceed to Query 2.10				
2.10	Can the Hydraulic Assessment (defined in Query 2.1 above) be used to determine the benefit of reducing the contributory impermeable Areas or extent of surface water contributions	Yes	0		If the answer is No, consider further development of the Hydraulic Assessment (or model if available) and complete Query 2.12. If the answer is Yes proceed to Query 2.11				
2.11	Has an Impermeable Area Survey been carried out for the agglomeration or parts of the agglomeration ?	No	10		if the answer is <b>No</b> , consider the need and cost benefit of undertaking an Impermeable Survey to parts of the agglomeration which are under hydraulic pressure and complete Query 2.12.

	Section 3.	.1 Environme	ntal Risk	Assessment		
Query	Description	Prompt	Risk Score	Short Commentary by the Local Authority	Comment or Action to be Taken	
3.1	What Environmental or Discharge Quality Data is available with regard to the sewer network?	electronic or paper records exist but are > 10 years old.	0		Select N/A if no discharges, secondary discharges or overflows from network; if discharges do exist complete Query 3.12	
3.1.1	Do trade effluents discharge to the sewer network?	Yes	20		If the answer is <b>No</b> , proceed to Query 3.1.2. If the answer is <b>Yes</b> , Proceed to Query 3.2	
3.1.2	Are there Storm Water Overflows within the network ?	No	0		If the answer is No, proceed to Query 3.1.3. If the answer is Yes, Proceed to Query 3.3	
3.1.3	Are there Secondary Discharges within the network (excluding Emergency Overflows at Pump Stations)?	No	0		If the answer is No, proceed to Query 3.1.4.	
3.1.4	Is there any evidence that exfiltration is occurring from the network ?	No	0		If the answer is No. does all wastewater enter a wastewater treatment plant (insert summary details in the AER)?  If Yes, Proceed to Query 3.6	
3.2	If Answer to Query 3.1.1 is "Yes", what % of trade effluents have a licence to Discharge to the Public Sewer ?	>90%	0		Select N/A if answer to Query 3.1.1 is No. If not all trade efficients are licenced, Local Authority should consider issuing and controlling such discharges under the appropriate Legislation.	
3.2.1	Are all licenced trade Discharges compliant with their relevant licence and associated conditions	Yes	0		Answer N/A if none of the trade effluents are licenced.  Answer No if this information is unknown. If the answer is Unknown or No, consider issuing a direction to the relevant Licencee.  If the answer is Yes, no further action is needed.	
3.2.2	If Answer to Query 3.2.1 is "No", state what % of Trade <u>Discharges are NOT compilant with their relevant,</u> <u>licence and associated conditions (where that non-compilance led to enforcement action)</u>	0 - 10%	0		Select N/A if answer to Query 3.2.1 is Yes. If N/A is selected as answer to Query 3.2.2	
3.3	in accordance with the DoEHLG paper "Procedures & Criteria in relation to Storm Water Overflows", what % of storm water overflows in the system have been classified for their significance?	75 - 100%	10		If the answer is <b>No</b> , consider a review of each discharge within the sewer network complete and Query 3.11.  If the answer is <b>Yes</b> , proceed to Query 3. 6	
3.4	Have samples from any Secondary Discharges within, the system been analysed ?	N/A	0		Select N/A if no secondary discharges in system. If the answer to Query 3.4 is No, consider examining the quality of each secondary discharge within the sewer network complete Query 3.11. If the answer is Yes, proceed to Query	
3.5	What percentage of discharges from the system are known to cause environmental pollution of the receiving waters?	None	0		If the answer is greater than 50% then detail, in the AER, the Improvement Programme necessary to reduce this percentage.	
3.6	In relation to possible extilitration has a risk analysis of ground water contamination or pollution been, undertaken ?	No	20		is No, consider undertaking ground water risk analysis and complete Query 3.12	
3.6.1	If Answer to Query 3.6 is "Yes", have any groundwater aquifers been identified in the area of the Network.  and/or Discharge Points?	N/A	0		Select N/A if no risk analysis of groundwater contamination has been undertaken.	
3.6.2	If Answer to Query 3.6.1 is "Yes", state the classification of groundwater aquifer identified in the area?	N/A	0		Select N/A if no risk analysis of groundwater contamination has been undertaken.	
3.6.3	In relation to Query 3.6.1, is the aguifer used as a source for Public, Private or Group Water Supply Schemes?	No	0		Select N/A if no risk analysis of groundwater contamination has been undertaken.	
3.7	Has an Impact Assessment of each Storm Water, Overflow been undertaken in accordance with the DoEHLG paper "Procedures & Criteria in relation to Storm Water Overflows" including setting performance criteria?	Yes	0		If the answer is No, consider assessing the risk category of the receiving waters. If the answer is Yes, proceed to Query 3.5 and provide summary details of the assessment in the AER.	
3.5	What percentage of storm water overflows comply with the performance criteria referred to in Query 3.72	N/A	0		Select N/A if answer to Query 3.7 is No or if there are no SWOs in system. (Risk Score is locked at 0 if no SWOs in system is stated in Agglomeration Details)	
3.9	Have the causes of these Capacity Deficiencies (storm water overflows & Secondary Discharges) been identified ?	Yes	0		no SWOs in system. If the answer to Query 3.9 is No, consider further examination of the environmental model	
3.10	Total Risk Assess  Prepare Assessment of Needs & Sewer Upgrade  Implementation Plan		h Assessment	of Needs and Reh	nabilitation Implementation Plan as separate documents	
3.11	Provide Summary Details (in the AER) of records upstream and downstream of licenced discharges with regard to Environmental Performance of the network. These details can be included as part of the AER submitted for the agglomeration.					

	Section 4.1 Structural Risk Assessment								
Query	Description	Prompt	Risk Score	Short Commentary by the Local Authority	Comment or Action to be Taken				
4.1	Has a CCTV Survey been undertaken in accordance with WRc Documentation "Model Contract Document for Sewer Condition Inspections" and "Manual of Sewer Condition Classification" ?	Yes	0		If the answer is <b>No</b> assess the need and benefit of undertaking CCTV Survey.  If <b>Yes</b> Proceed to Query 4.2				
4.1.1	How many years has it been since the completion of the CCTV Survey?	less than 5	0		If no CCTV has been undertaken, select "N/A" response				
4.2	What was this CCTV Survey Information Used for?	Determine full extent of Sewer Rehab Works to be undertaken within Network	0		Select N/A if answer to Query 4.1 is NO.				
4.3	Has the CCTV Survey been used to Assess the Structural Condition of the Sewer Network or targeted sections of the Sewer Network?	Yes	0		If no CCTV has been undertaken, select "No" response. If the answer is No assess the need and benefit of undertaking an assessment of the Structural Condition of the Sewer Network. If the answer is Yes proceed to Q				
4.4	Have Performance Criteria been developed to determine the short, medium or long term structural condition of the sewer network?	Yes	0		If the answer is No, enter "unknown" in response to Queries 4.4.1 to 4.4.5; consider assessing the Future Needs of the Sewer Network. If the answer is Yes proceed to Queries 4				
4.4.1	What % of the Total Sewer Length contains Collapsed or Imminent Collapse of Sewers (Grade 5)	4%	8	0	Insert Percentage of Overali Network Length; if a sewer length contains a Grade 5 collapse, include the total length of that sewer in calcuating the %. If information is not available type "Unknown" into Prompt Box				
4.4.2	What % of Total Sewer Length contains Sewers Likely to Collapse (Grade 4)	14%	17		Insert Percentage of Overali Network Length; if a sewer length contains a Grade 4 condition, include the total length of that sewer in calcuating the %. If information is not available type "Unknown" into Prompt Box				
4.4.3	What % of Total Sewer Length contains sewers with Further Possible Deterioration (Grade 3)	2%	1		Insert Percentage of Overali Network Length; if a sewer length contains a Grade 3 deterioration, include the tota length of that sewer in calcuating the %. If information is not available type "Unknown" into Prompt Box				
4.4.4	What % of Total Sewer Length contains sewers with Minimal Collapse (Grade 2)	4%	5		Insert Percentage of Overall Network Length; if a sewer length contains a Grade 2 feature, include the total length of that sewer in calcuating the %. If information is not available type "Unknown" into Prompt Box				
4.4.5	What % of Total Sewer Length contains sewers of Acceptable Structural Condition (Grade 1)	76%	0		Insert Percentage of Overall Network Length. If Information is not available type "Unknown" into Prompt Box				
If al	I % lengths are known, Check Total Length = 100%	100%	30		If answers to Queries 4.4.1, 4.4.2 or 4.4.3 are above a set level, the RAS for Query 4 is automitically set at the maximum of 140.				
4.5	What % of the deficiencies, as detailed in Items 4.4.1, 4.4.2 and 4.4.3, have been rectified ?	0 - 10%	35		Select N/A if answer to Query 4.4 is <b>No.</b> If the answer is <b>No.</b> Proceed to Query 4.6 If the answer is <b>Yes,</b> what monitoring is in place to ensure continued acceptance of structural condition?  Proceed to Query 4.7				
4.6	Have the causes of the Structural Deficiencies (Grades 3, 4 and 5) been identified or is there a Preventative Maintenance Programme in place?	Yes	0		If the answer is <b>No</b> , consider further examination of the sewer network, the structural loading conditions, gradients and possible H <sub>2</sub> S Formation. If Yes completed Query 4.7				
	Total Risk As	sessment Score (RAS)	65						
4.7	4.7 Prepare Assessment of Needs & Sewer. In the AER Attach Assessment of Needs and Rehabilitation Implementation Plan as separate documents								

4.7	Prepare Assessment of Needs & Sewer	In the AER Attach Assessment of Needs and Rehabilitation Implementation Plan as separate documents
4.7	Rehabilitation Implementation Plan	If the AER Added Assessment of Needes and Remainland Imperioritation Plan as separate documents

	Section 5.1 O&M Risk Assessment							
Query	Description	Prompt	Risk Score	Short Commentary by the Local Authority	Comment or Action to be Taken			
5.1	Are complaints of an environmental nature recorded and held in a central database?	Yes	0		Consider setting up Central Database for Complaints			
5.2	Is there an emergency response procedure in place?	No	20		Consider setting up target response times for dealing with Complaints			
5.3	What has been the highest frequency of flooding. In the network due to hydraulic inadequacy, over the past 5 years?	Once/yr	4		Refers to flooding from the Network only, not natural flooding from rivers/streams/high tides. Select the highest number of events in any 12 month period.			
5.4	What has been the highest frequency of flooding in the network due to operational causes over the past 5 years?	Once/yr	4		Refers to flooding from the Network only, not natural flooding from rivers/streams/high tides. Select the highest number of events in any 12 month period.			
5.5	What has been the highest frequency of surcharging of critical sewers in the network, over the past 5 years?	More than 5 times/yr	20		Select the highest number of events in any 12 month period.			
5.6	What has been the highest frequency of reportable incidents in the network, over the past 5 years?	More than 5 times/yr	20		Select the highest number of events in any 12 month period.			
5.7	What has been the highest frequency of reportable incidents due to discharges, for whatever reason, from Pumping Station Emergency Overflows in the network, over the past 5 years?	More than 5 times/yr	20		Select the highest number of events at any given Pumping Station in any 12 month period.			
5.8	What has been the highest frequency of blockages in sewers in the network over the past 5 years?	unknown	20		Select the highest number of events per km of sewer network in any 12 month period.			
5.9	What has been the highest frequency of collapses In sewers in the network over the past 5 years?	None	0		Select the highest number of events in any 12 month period.			
5.10	What has been the highest frequency of bursts in rising mains in the network over the past 5 years?	None	0		Select the highest number of events in any 12 month period.

### Section 1. Executive Summary and Introduction to the 2014 AER

#### 1.1 Summary report on 2014

This Annual Environmental Report has been prepared for Discharge Licence D0034-01, in accordance with the requirements of the wastewater discharge licence for the part of the Ringsend agglomeration within the boundary of Dun Laoghaire Rathdown.

Specified assessments are included as an appendix to the AER as follows:

#### Storm water overflow assessment

The Greater Dublin Area Agglomeration includes all the geographical area of Dublin City Council and parts of Fingal County Council functional Area, South Dublin County Council functional area and Dun Laoghaire Rathdown County Council area. This AER relates to area with the agglomeration licensed under D0034-01 that is within the boundaries of Dun Laoghaire for the period 1<sup>st</sup> January 2014 to 31<sup>st</sup> December 2014. The catchment is largely combined and incorporates 9 pump stations and 28 CSO's. As Dublin City Council operates Ringsend Treatment Works on behalf of Irish Water, this AER relates to the drainage network, storm water overflows and pump stations. The majority of incidents in the catchments occurred at the West Pier Pump Station overflows and were caused by medium to heavy rain events. The pump station is operating to its design capacity.

There were no major capital or operational changes undertaken in 2014 and none are planned for 2015.

Three operational projects (listed in Appendix 6.3) were undertaken in 2014 and will continue to completion in 2015.

No new operational projects are programmed, as yet, to take place in 2015.

An Annual Statement of Measures is included in Appendix 6.1.

#### **Section 2. Monitoring Reports Summary**

#### 2.1 Summary report on monthly influent monitoring

Not a requirement for this aspect of the Ringsend licence.

#### 2.2 Discharges from the agglomeration

Not a requirement for this aspect of the Ringsend licence.

#### 2.3 Ambient monitoring summary

Not a requirement for this aspect of the Ringsend licence.

**2.4** Data collection and reporting requirements under the Urban Waste Water Treatment Directive Not a requirement for this aspect of the Ringsend licence.

#### 2.5 Pollutant Release and Transfer Register (PRTR) - 2014

Not a requirement for this aspect of the Ringsend licence.

#### **Section 3 Operational Reports Summary**

#### 3.1 Treatment Efficiency Report

Not a requirement for this aspect of the Ringsend licence.

#### 3.2 Treatment Capacity Report

Not a requirement for this aspect of the Ringsend licence.

#### 3.3 Extent of Agglomeration Summary Report

In this section Irish Water is required to report on the amount of urban waste water generated within the agglomeration. It does not include any waste water collected and treated in a private system and discharged to water under a Section 4 Licence issued under the Water Pollution Acts 1977 (as amended):

**Table 3.3 - Extent of Agglomeration Summary Report** 

	% of p.e. load generated in the agglomeration
Load generated in the agglomeration that is collected in the sewer network	100
Load collected in the agglomeration that enters treatment plant	100
Load collected in the sewer network but discharged without treatment	0

**Load generated in the agglomeration that is collected in the sewer network** is the total load generated and collected in the municipal network within the boundary of the agglomeration.

**Load collected in the agglomerations that enters treatment plant** is that portion of the previous figure which enters the waste water treatment plant

**Load collected but discharged without treatment** is that portion of the first figure which is discharged without treatment.

#### 3.4 Complaints Summary

A summary of complaints of an environmental nature is included below.

**Table 3.4 - Complaints Summary Table:** 

Number	Date &	Nature of	Cause of	Actions taken to	Closed
	Time	Complaint	Complaint	resolve issue	(Y/N)
1	13/11/14	Sewage debris on the beach at Seapoint	Overflow from the short sea overflow at the West Pier Pump Station	The debris was removed by DLR Staff.	Y
1	9/3/14	IW sewer surcharging via private drain.	Sewer in question is need of repair to allow normal flow.	Design for the repair has been carried out and the repair will be carried out in early 2015.	N

# 3.5 Reported Incidents Summary

A summary of reported incidents is included below.

**Table 3.5.1 - Summary of Incidents** 

Incident Type (e.g. Non- compliance, Emission, spillage, Emergency Overflow Activation)	Incident Description	Cause	No. of incidents	Corrective Action	Authorities Contacted Note 1	Reported to EPA (Yes/No)	Closed (Y/N)
Emergency Overflow Activation	Operation of both Short Long Sea Overflows at the West Pier Pump Station	Very Heavy Rain	17	None	None	Yes	Yes
Emergency Overflow Activation	Operation of the Long Sea Overflow only at the West Pier Pump Station	Heavy Rain	13	None	None	Yes	Yes

**Table 3.5.2 - Summary of Overall Incidents** 

Number of Incidents in 2014	110 No in total. 30 at the West Pier 80 in the various SWO and CSOs. See Table in Section 4.1 for further details.
Number of Incidents reported to the EPA via EDEN in 2014	6 No. All West Pier Pump Station incidents reported.
Explanation of any discrepancies between the two numbers above	Not all incidents at the West Pier were reported in 2014 until clarification was received about what was to be reported. Also the figure of 110 is a composite of the number of overflows estimated and measured to have occurred.

# 3.6 Sludge / Other inputs to the WWTP

'Other inputs' to the waste water treatment plant are summarised in Table 3.6 below.

**Table 3.6 - Other Inputs** 

Input type	m3/year	PE/year	% of load to WWTP	Is there a leachate/sludge acceptance procedure for the WWTP?	Is there a dedicated leachate/sludge acceptance facility for the WWTP? (Y/N)
Domestic /Septic Tank Sludge	0	0	0		
Industrial / Commercial Sludge	0	0	0		
Landfill Leachate (delivered by tanker)	0	0	0		
Landfill Leachate (delivered by sewer network)	0	0	0	N	N
Other (specify)	0	0	0

The information above is based on a mixture of monitoring and experience operations staff and as such is a best estimate of current conditions.

Table 4.1.2 - SWO Identification and Inspection Summary Report

,,,,,,,, .	
How much sewage was discharged via SWOs in the agglomeration in the year (m³/yr)?	110000
How much sewage was discharged via SWOs in the agglomeration in the year (p.e.)?	55250
What % of the total volume of sewage generated in the agglomeration was discharged via SWOs in the agglomeration in 2014?	<1%
Is each SWO identified as non-compliant with <u>DoEHLG Guidance</u> included in the Programme of Improvements?	No
The SWO assessment includes the requirements of Schedule A3 & C3	No discharges to be discontinued under A3.
Have the EPA been advised of any additional SWOs / changes to Schedule C3 and A4 under Condition 1.7?	EPA will be informed of the addition of a new overflow at Windsor Terrace DLRCC/B5/R/028 via Technical Amendment.

# 4.2 Report on progress made and proposals being developed to meet the improvement programme requirements.

The Improvement Programme is included in Appendix 6.3.

The Improvement Programme Report included in Appendix 6.3 addresses the **Specified Improvement Programmes** as detailed in Schedules A3 and C of the WWDL.

**Table 4.2.1 - Specified Improvement Programme Summary** 

Specified Improvement Programmes (under Schedule A and C of WWDL)	Licence Schedule (A or C)	Licence Complet ion Date	Date Expired? Dun Laoghaire Sewerage Scheme Phase 1	Contract 2a - Attenuation Tank	Removal of deficiencies in capacity	95	May 2015	
Dun Laoghaire Sewerage Scheme Phase 1	Contract 2c - Burton Hall Avenue Foul Sewer Upgrade	Removal of deficiencies in capacity	95	May 2015	
Dun Laoghaire Sewerage Scheme	Phase 1 Contract 2e - Moreen Environs Foul Sewer Upgrade, Phase 4	Removal of deficiencies in capacity	0		At planning stage.

Improvement Identifier	Improvement Description	Improvement Source	Progress (% completed)	Expected Completion Date	Comments
Dun Laoghaire Sewerage Scheme Phase 1	Contract 2 - Network Upgrade Sandyford/Still organ Improvement- Tunnel	Removal of deficiencies in capacity	0		At planning stage.
Dun Laoghaire Sewerage Scheme Phase 1	2D Foul Sewer Upgrade as part of Leopardstown Roundabout Upgrade	Removal of deficiencies in capacity	0		At planning stage.
Dun Laoghaire Sewerage Scheme Phase 1	Contract 4 - Surface Water Separation	Removal of deficiencies in capacity			At planning stage.
Condition 5.2	Sewer Integrity Tool Used	Sewer Integrity Tool (Condition 5.2).	100		Completed.
Condition 4 & 5.2	SWO assessment	SWO assessment (Condition 4 & 5.2).	100		Based on Measured and estimated spill numbers and local knowledge of Drainage Staff.

Improvements identified above also include measures taken to prevent environmental damage anticipated following events or accidents/incidents associated with discharges or overflows from the waste water works and as such are considered to fulfil any Statement of Measures requirements. Refer to Appendix 6.1 which summarises the Annual statement of Measures.

#### Table 4.2.3 - Sewer Integrity Risk Assessment Tool Summary

#### **Sewer Integrity Tool for West Pier East Catchment**

DLRCC, on behalf of IW, has taken the Sewer Integrity Tool (SIT) format developed by Dublin City Council in the 2012 AER for the Dublin City Centre catchment and applied it to the West Pier East Catchment. The spreadsheet is in Appendix 6.4.

The Improvement Programme should include an assessment of the integrity of the existing wastewater works for the following:	Risk Assessment Rating (High, Medium, Low)	Risk Assessment Score	Comment
Hydraulic Risk Assessment Score	Medium Risk	67	
Environmental Risk Assessment Score	Low Risk	158	
Structural Risk Assessment Score	High Risk	140	High score here because the condition of the network is not known. So high risk assumed.
Operation & Maintenance Risk Assessment Score	Low Risk	74	
Overall Risk Score for the agglomeration	Low Risk	439	

### **Section 5.Licence Specific Reports**

**Licence Specific Reports Summary Table** 

Licence Specific Report	Required in 2014 AER or outstanding from previous AER	Included in 2014 AER	Reference to relevant section of AER
Priority Substances Assessment	No	No	
Drinking Water Abstraction Point Risk Assessment	No	No	
Habitats Impact Assessment	No	No	
Shellfish Impact Assessment	No	No	
Pearl Mussel Report	No	No	
Toxicity/Leachate Management	No	No	
Toxicity of Final Effluent Report	Yes	No	

#### **5.1 Priority Substances Assessment**

Not a requirement for this aspect of the Ringsend licence.

#### 5.2 Drinking Water Abstraction Point Risk Assessment.

Not a requirement for this aspect of the Ringsend licence.

#### 5.3 Shellfish Impact Assessment Report.

Not a requirement for this aspect of the Ringsend licence.

### 5.4 Toxicity / Leachate Management

Not a requirement for this aspect of the Ringsend licence.

#### 5.5 Toxicity of the Final Effluent Report

Not a requirement for this aspect of the Ringsend licence.

#### **5.6 Pearl Mussel Measures Report**

Not a requirement for this aspect of the Ringsend licence.

#### **5.7 Habitats Impact Assessment Report**

Not a requirement for this aspect of the Ringsend licence.

# **Section 6. Appendix**

Appendix 6.1 Annual Statement of Measures

Appendix 6.2 Storm Water Overflow Identification and Inspection Report

Appendix 6.3 Programme of Improvements

Appendix 6.4 Sewer Integrity Tool Output

#### **Annual Statement of Measures**

The potential sources of environmental damage are discharges from the surface water overflows and the emergency overflows from the pump stations in the network. Pump stations are visited every day by Drainage inspectors who are also notified by text message when an emergency overflow is activated and respond as a soon as is practicable to remove the cause of the overflow.

An assessment of the surface water overflows in the agglomeration that are in DLR is included in the AER (see Section 4.1 and Appendix 6.2).

No additional measures have been taken in 2014 in relation to prevention of environmental damage. The need for measures to prevent environmental damage is reviewed on an annual basis.

#### **Storm Water Overflow Identification and Inspection Report**

A very comprehensive stormwater overflow identification report was submitted with the AER for 2011. Works to the SWOs carried out were listed in the subsequent AERs. In 2014, four of the CSOs were monitored, namely Maretimo Gardens, DLRCC/B5/R25, The Beeches Monkstown Valley DLRCC/B5/R27, Millmount Grove DLRCC/B5/R/013 and the new overflow at Windsor Terrace DLRCC/B5/R28. Works were carried out at the CSO at Maretimo Gardens in 2013 which have resulted in a dramatic reduction in spills. In fact, there were no spills in 2014. Based on the observations of very experienced staff members and some monitoring, only 2 of the overflows do not meet all the DoEHLG Guidance criteria, Landscape Rd DLRCC/B5/R/009 and Seafort Parade DLRCC/B5/R/017. Both CSOs operate due to insufficient capacity in the network downstream of their locations. Until a drainage study is carried out very little can be done to limit the number of spills or indeed their impacts.

# **Programme of Improvements**

#### A. Continue in Construction

#### **Waste Water**

Dun Laoghaire Sewerage Scheme Phase 1	Contract 4 - Surface Water Separation	A. Continue in Construction
Dun Laoghaire Sewerage Scheme Phase 1	Contract 2a - Attenuation Tank	A. Continue in Construction

	Ringsend Catchment - Hydra			
Query	Description	Prompt	Risk Score	Short Commentary by the Local Authority
2.1	Has a Hydraulic Performance Assessment been undertaken for the Sewer Network (e.g., Computer Model or other Engineering Design or Design Review)	Yes	0	Done at strategic level in GDSDS
2.1.1	What % of the Network is covered by the hydraulic assessment?	100%	0	100% of the area modelled. Only 225mm and bigger pipes modelled
2.1.2	How many years has it been since the completion of the hydraulic assessment?	More than 10	5	GDSDS
2.1.3	Are the outcomes of the Hydraulic Assessment being implemented?	YES	0	Some outcomes being implemented
2.1.4	How many years has it been since the outcomes of the hydraulic assessment have been implemented?	More than 10	5	
2.2	Has a Computer Model been used to Assess the Hydraulic Performance of the Sewer Network?	YES	0	The Dun Laoghaire Sewerage Scheme Phase II will use the existing model and further develop it to assess the hydraulic performance of the sewer network.
2.3	Has a Manhole Survey been undertaken in accordance with WRc Documentation "Model Contract Document for Manhole Location Surveys and the Production of Record Maps"?	YES	0	
2.3.1	How many years has it been since the survey was undertaken or updated?	5 to 10	7	Manhole surveys are ongoing
2.4	Has a Flow Survey been undertaken in accordance with WRc Documentation "A Guide to Short Term Flow Surveys Systems" and "Contract Documents for Short Term Sewer Flows"?	YES	0	Under the GDSDS

2.5	What was this Flow Survey Information Used for?			
2.5.1	To Determine the extent of Problematic Sewer Catchments	YES	0	
2.5.2	To Verify a Computer or Mathematical Model of the Network	YES	0	
2.6	Have Performance Criteria been developed to determine the short, medium or long term capacity of the sewer network?	No	10	
2.7	How many flood events resulting from surcharge in the network have occurred in the past 3 years?	MORE THAN 6	10	
2.8	Are there deficiencies within the sewer network?	YES	20	
2.9	Have the causes of these deficiencies in the Performance Criteria been identified and rectified?	NO	10	
2.10	Can the Hydraulic Assessment (defined in Query 2.1 above) be used to determine the benefit of reducing the contributory impermeable Areas or extent of surface water contributions	YES	0	
2.11	Has an Impermeable Area Survey been carried out for the agglomeration or parts of the agglomeration?	YES	0	
	Total Risk Assessment Score		67	

	Ringsend Catchment - Environ	mental Risk Assessment	t	
Query	Description	Prompt	Risk Score	Short Commentary by the Local Authority
3.1	What Environmental or Discharge Quality Data is available with regard to the sewer network?	Electronic database	0	Bathing water samples are taken at Seapoint Blackrock and the Forty Foot.
3.1.1	Do trade effluents discharge to the sewer network?	YES	20	FOG only in this catchment
3.1.2	Are there Storm Water Overflows within the network?	YES	20	Combined sewer overflows
3.1.3	Are there Secondary Discharges within the network (excluding Emergency Overflows at Pump Station)?	NO	0	
3.1.4	Is there any evidence that exfiltration is occurring from the network?	YES	20	GDSDS made estimates.
3.2	What % of known trade effluents have a licence to discharge to the Public Sewer?	61%-70%	8	FOG and ordinary trade
3.2.1	Are all licensed trade Discharges compliant with their relevant licence and associated conditions	NO	10	
3.2.2	What % trade effluent licences are not compliant with their relevant licence and associated conditions (where that non-compliance led to enforcement action)	5%	5	FOG

3.3	In accordance with the DoEHLG paper "Procedures & Criteria in relation to Storm Water Overflows", what % of storm water overflows in the system have been classified for their significance?	100	0	Only one CSO in the catchment at Windsor Terrace. Only operates
3.4	Have samples from any Secondary Discharges within the system been analysed?	N/A	0	under heavy rain.  No Secondary discharges in the catchment
3.5	What percentage of discharges from the system are known to cause environmental pollution of the receiving waters?	100%	20	All discharges except the primary one cause temporary environmental pollution when they discharge – however it is not significant
3.6	In relation to possible exfiltration has a risk analysis of ground water contamination or pollution been undertaken?	No	20	Some basic analysis was done with the GDSDS
3.6.1	Have any groundwater aquifers been identified in the area of the Network and or Discharge Points	NA	0	
3.6.2	State the classification of groundwater aquifer identified in the area	NA	0	
3.6.3	In relation to Query 3.6.1is the aquifer used as a source for Public, Private or Group Water Supply Schemes	NA	0	
3.7	Has an Impact Assessment of each Storm Water Overflow been undertaken in accordance with the DoEHLG paper "Procedures & Criteria in relation to Storm Water Overflows" including setting performance criteria?	No	40	
3.8	What percentage of storm water overflows comply with the performance criteria referred to in Query 3.7?	N/A	0	Performance criteria not set
3.9	Have the causes of these Capacity Deficiencies (storm water overflows & Secondary Discharges) been identified?	No	15	The Dun Laoghaire Sewerage Scheme Phase II will assess this
	Total Risk Assessment Score		168	

Query	Description	Prompt	Risk	Short
Query		T Compt	Score	Commentary by the Local Authority
4.1	Has a CCTV Survey been undertaken in accordance with WRc Documentation "Model Contract Document for Sewer Conditions Inspections" and "Manual of Sewer Condition Classification"?	YES	0	Strategic level completed. Detailed surveys to be carried out under The Dun Laoghaire Sewerage Scheme Phase II
4.1.1	How many years has it been since the completion of the CCTV Survey	More than 10	10	CCTVs are carried out for operational purposes on an as needed basis
4.2	What was this CCTV Survey Information Used for?	Minimal survey tom determine the extent of problem sewers	5	Building the GDSDS model. Investigations for removal of blockages, flood relief schemes
4.3	Has the CCTV Survey been used to Assess the Structural Condition of the Sewer Network or targeted sections of the Sewer Network?	YES	0	
4.4	Have Performance criteria been developed to determine the short, medium or long term structural condition of the sewer network?	NO	5	
4.4.1	What known % of the Sewer Length contains Collapsed or sewers in imminent danger of collapse (grade 5)	UNKNOWN	30	
4.4.2	What known % of Total Sewer Length contains Sewers Likely to Collapse (Grade 4)	UNKNOWN	25	
4.4.3	What known % of Total Sewer Length contains sewers with Further Possible Deterioration (Grade 3)	UNKNOWN	10	
4.4.4	What known % of total Sewer Length contains sewers with Minimal Collapse (Grade 2)	UNKNOWN	5	
4.4.5	What known % total Sewer Length contains sewers of Acceptable Structural Condition (Grade 1)	UNKNOWN	5	
	If all % lengths are known, Check Total Length = 100%		75	
4.5	What % of the deficiencies, as detailed in Items 4.4.1, 4.4.2 and 4.4.3, have been rectified?	UNKNOWN	35	

4.6	Have the causes of the Structural Deficiencies (Grade 3,4 and 5) been identified	YES	10	
	Total Risk Assessment Score		140	

Ringsend Catchment - O&M Risk Assessment						
Query	Description	Prompt	Risk Score	Short Commentary by the Local Authority		
5.1	Are complaints of an environmental nature recorded and held in a central database?	YES	0	Uploaded to EDEN as required		
5.2	Is there an emergency response procedure in place?	YES	0			
5.3	What has been the highest number of flooding events in the network due to hydraulic inadequacy, over the past 5 years?	More than 5 times/year	20			
5.4	What has been the highest number of flooding events in the network in any one year due to operational causes over the past 5 years	Once/yr	4			
5.5	What has been the highest number of known surcharging of sewers causing flooding to property or causing environmental pollution in the last 5 years	More than 5 times/year	20			
5.6	What has been the highest frequency of reportable incidents in the network over the past 5 years	Once /yr	2			
5.7	What has been the highest number of reportable incidents in any one year due to discharges for whatever reason from Pumping Station emergency Overflows in the network, over the past 5 years	More than 5 times/year	20	West Pier PS		
5.8	What has been the number of blockages in sewers in the network over the last year	0 - 0.01/km/yr	4	Estimate		
5.9	What has been the highest number of collapses in sewers in the network over the past 5 years?	Once /yr	4			
5.10	What has been the highest number of bursts in rising mains in the network over the past 5 years	NONE	0			
	Total Risk Assessment Score (RAS)		74			

#### **Section 6.1 Summary of Risk Assessment Scores**

Element	RAS	Risk Category	%Risk	Max Risk
			Score	Score
Section 2.1 Hydraulic Risk Assessment	67	Medium Risk	45	150
Section 3.1 Environmental Risk Assessment	158	Low Risk	32	500
Section 4.1 Structural Risk Assessment	140	High Risk	93	150
Section 5.1 )&M Risk Assessment	74	Low Risk	37	200
Total RAS for Network	439	Low Risk	44	1000

If the total RAS is greater than 750, or if any of the individual RASs are greater than 75% of the Maximum Available Score, the risk category for the Network is graded "High Risk".
