## **1.0 Introduction**

Kerry County Council operates a civic amenity facility located in the townland of Flemingstown, Lispole adjacent to the N86 Dingle to Tralee road and approximately 5 km east of the town of Dingle, Co. Kerry. The site is accessed via the county road L-8052.

The principal activities at the facility include the recycling or reclamation of inorganic materials including mixed dry recyclables, C & D rubble, metals, glass, steel and aluminium cans, car batteries, dry cell batteries, fluorescent tubes, domestic hazardous waste, cardboard, plastic bottles, textiles, wood, WEEE and newspapers. Small quantities of organic waste (food and garden) are also collected.

Mixed municipal waste is also accepted on site and compacted into 30 cubic meter closed containers for subsequent transfer and disposal at North Kerry Landfill in Muingnamine, Tralee.

This Annual Environment Report is prepared in accordance with Condition 11.8 and Schedule F of Waste Licence W0225-01 issued by the Environmental Protection Agency (EPA).

## **2.0 Reporting Period**

The reporting period for this Annual Environmental Report is 1<sup>st</sup> January – 31<sup>st</sup> December 2014.

## **3.0 Waste Activities carried out at the Facility**

Waste disposal activities carried out at Dingle Civic Amenity Site are in accordance with Part 1 of Waste Licence W0225-01 which outlines the waste disposal activities licensed in accordance with the Third Schedule of the Waste Management Acts 1996 to 2005.

Licensed activities include:

**Class 12** Repackaging prior to submission to any activity referred to in a preceding paragraph of this Schedule.

**Class 13** Storage prior to submission to any activity referred to in a preceding paragraph of this Schedule, other than temporary storage, pending collection, on the premises where the waste concerned is produced.

Waste recovery activities carried out at Dingle Civic Amenity Site are in accordance with Part 1 of Waste Licence W0225-01 which outlines the waste recovery activities licensed in accordance with the Fourth Schedule of the Waste Management Acts 1996 to 2005. Licensed activities include:

**Class 2** Recycling or reclamation of organic substances which are not used as solvents (including composting and other biological transformation processes).

**Class 3** Recycling or reclamation of metals and metal compounds.

**Class 4** Recycling or reclamation of other inorganic materials.

**Class 13** Storage of waste intended for submission to any activity referred to in a preceding paragraph of this Schedule, other than temporary storage, pending collection, on the premises where such waste is produced.

#### **4.0 Quantity and Composition of Waste Received, Disposed and Recovered: 1<sup>st</sup> Jan – 31<sup>st</sup> Dec 2014**

Waste collected at Dingle Civic Amenity Site for disposal during the reporting year (2014) increased by 29% compared to the previous year (2013).

The weight of the waste accepted into Dingle Civic Amenity Site for disposal for the reporting period was 446.64 Tonnes. This comprises of the following breakdown:

<b><i>Waste for Disposal</i></b>	<b>Tonnes</b>		
	<b>2012</b>	<b>2013</b>	<b>2014</b>
Road Sweepings & Graveyard Waste	0.16	1.14	0.62
Flytipping	16.98	25.88	36.92
Public Domestic	226.64	319.90	409.1
<b>Total for Disposal</b>	<b>243.98</b>	<b>346.92</b>	<b>446.64</b>

**Table 1 Waste Stream Break down for reporting Period.**

It is expected that waste disposal rates at Dingle Civic Amenity Site will rise by approximately 10% for the next reporting period. However, the WEEE tonnage for 2015 should decrease due to a change in the manner in which WEEE is collected from shops. The proposed Household Waste Regulations which are due to come into effect in July 2015 will have an impact on the total waste being disposed at this facility however, we are awaiting clarification from the Department of the Environment in relation to this in order assess the impact of this on our services.

Appendix I gives a breakdown of waste by classification collected on site and sent for landfilling/recovery/recycling off site during the reporting period.

#### **5.0 Summary of Procedures Developed by the Licensee**

The following procedures were developed during the reporting period:

- Revised Operational Procedures for Facility Manager
- Revised Health & Safety Procedures

## **6.0 Review of Nuisance Controls**

Regular inspections of the facility and its environs are carried out by the facility manager and appropriate bait is used to control mice and rats on site. During 2014 no issues arose with vermin at the facility.

The nuisance controls which are currently in place are appropriate for the operation of this facility.

## **7.0 Emissions from the Facility**

### **a) Foul Water Emissions**

A Wastewater Treatment Unit and reed bed is installed at the facility to treat all foul waters from the site. The Wastewater Treatment Unit was serviced during 2014. Foul water is treated in the Wastewater Treatment Unit and reed bed before discharging to the surface water drain.

### **b) Surface Water Emissions**

Surface water runoff from the site roads and uncontaminated surfaces discharges to the surface water drain via a Class 1 full retention interceptor. Visual inspections indicated no issues with surface water emissions from the facility but occasional discolouration and sedimentation in the stream was noted upstream of the discharge point.

The surface water monitoring results are attached in Appendix II. No significant impact was noted to date.

### **c) Waste from Silt Traps and Interceptors**

No silt/sludge or wastewater was removed from the oil interceptor or foul waste water treatment unit during the reporting period.

## **8.0 Resource Consumption Summary**

The following is the energy consumption for Dingle Civic Amenity Site for the reporting period.

### 8.1 Diesel

The diesel usage for Dingle Civic Amenity Site for the reporting period 2014 was 19.12 litres.

### 8.2 Electricity

The electricity usage for the facility during the reporting period was 5,367 kilowatt hours.

Year	Average Electricity Usage kWh/day
2014	15
2013	20
2012	20
2011	25
2010	33
2009	32

Power is required for the office computer and lighting, weighbridge, waste compactors, storage heating, cardboard baler, wastewater treatment unit, CCTV cameras and public lighting on the site.

### 8.3 Water

Water supply to the site is via a connection to the mains water supply. Water usage for the facility during the reporting period was 84 cubic meters. Water is used on site for power washing yards, office toilets and sinks, public toilets and washing compactor area.

No surface water or ground water is abstracted.

### 9.0 Reported Incidents and Complaints

No incidences or complaints were reported in relation to the operation of the facility during the reporting period.

**10.0 Schedule of Environmental Objectives and Targets for the Forthcoming Year 2015**

Target Area	2015 - Objective	2015 – Expected Outcome to Indicate achievement of target
Odour Management	Continue to ensure that the waste facility does not cause a nuisance in terms of odour through good housekeeping practices on site	No odour complaints received due to onsite odour.
		No odour complaints received due to off site odour
Waste Storage Practices	Ensure good housekeeping on site to ensure that waste is stored corrected and collected in a timely fashion so not to cause nuisance to the surrounding areas and on site	No wind blown litter on site No overflowing bins on site Proper segregation of waste
Incident Prevention	Look at Fire Preventative and Emergency Response Procedure for the site	Revised procedures to be put in place mindful of EPA guidance document
Waste acceptance, Classification and records	Continue to record and document all waste types entering and leaving the site with monthly verifiable reports being produced	Monthly reports on waste streams produced and verified
Proposed Household Waste Regulations	Look at the proposed household waste regulations and implement the same on site in a timely manner	Draft Household Regs. implemented on site.

## 11.0 Noise Monitoring Report Summary

Location Reference	Date and Time	L <sub>Aeq</sub> dB	L <sub>A10</sub> dB	L <sub>A90</sub> dB	Tones	Description of Noise Sources
N1 (proxy) (nearest dwelling west of facility)	11:12-11:42	55	56	38	No	Road traffic noise from the N86 was the dominant noise source. Customers using the waste transfer station were also audible during lulls in the traffic.
	11:42-12:12	54	59	41		
	12:12-12:42	54	54	37		
N2 (nearest dwelling north of facility)	9:30-10:00	47	51	38	No	Birdsong and wind in nearby vegetation was the main noise source at this location due to the breeze. Background traffic noise from the N86 was faintly audible. The transfer station was not audible at this location.
	10:00-10:30	47	47	38		
	10:30-11:00	46	48	39		
N3 (nearest dwelling east of facility)	11:11-11:30	50	53	39	No	Birdsong and wind in nearby vegetation contributed to the ambient noise at this location. Dogs barking also contributed. Background traffic noise from the N86 was also audible. Tipping noise from the waste transfer station was audible occasionally.
	11:30-12:00	49	53	40		
	12:00-12:30	47	51	38		
N4 (nearest dwelling south of facility)	09:18-09:48	61	64	40	No	Unrelated road traffic noise from the N86, was the dominant noise source. A faint hum perhaps from the tipping shed was faintly audible during lulls in the traffic noise but the contribution of the waste transfer station was not considered significant. Birdsong, barking dogs, windborne noise and a nearby stream also contributed to the noise build up.
	09:48-10:48	60	61	40		
	10:18-10:48	59	60	39		

## **12.0 Ambient Monitoring Summary**

Dust monitoring was carried out during September/October 2014 in accordance with the licence conditions. The dust monitoring results were within the ELVs set down in the licence except for location D1.

There were no issues with dust during 2014 and no complaints were received in relation to dust at the facility.

## **13.0 Energy Efficiency Audit Report Summary**

An energy efficiency audit was carried out for Dingle Civic Amenity Site by Kerry County Councils Energy Office and the report is attached in Appendix III.

The main recommendations for energy savings are:

- 1) Change electricity meter to avail of night rate tariffs for storage heating purposes
- 2) Continue monitoring of Energy Performance Indicator (EPI) trend and daily consumption trend
- 3) All unneeded office equipment to be fully shut down at night where possible
- 4) Reduce site light run schedule by 1/2 hour per day where possible.

## **14.0 Development/Infrastructural Works Summary**

No development works were carried out in 2014.

## **15.0 Proposed Development/Infrastructural Works for coming Year**

The proposed Household Waste regulations will have an impact on the operation and site layout of the Dingle Civic Amenity Site, once the regulations are published, it is Kerry County Council's intension to assess the impact of these regulations and adapt the site where necessary to meet the new requirements. The Agency shall be informed of any changes to the site layout etc.

## 16.0 Report on Financial Provision

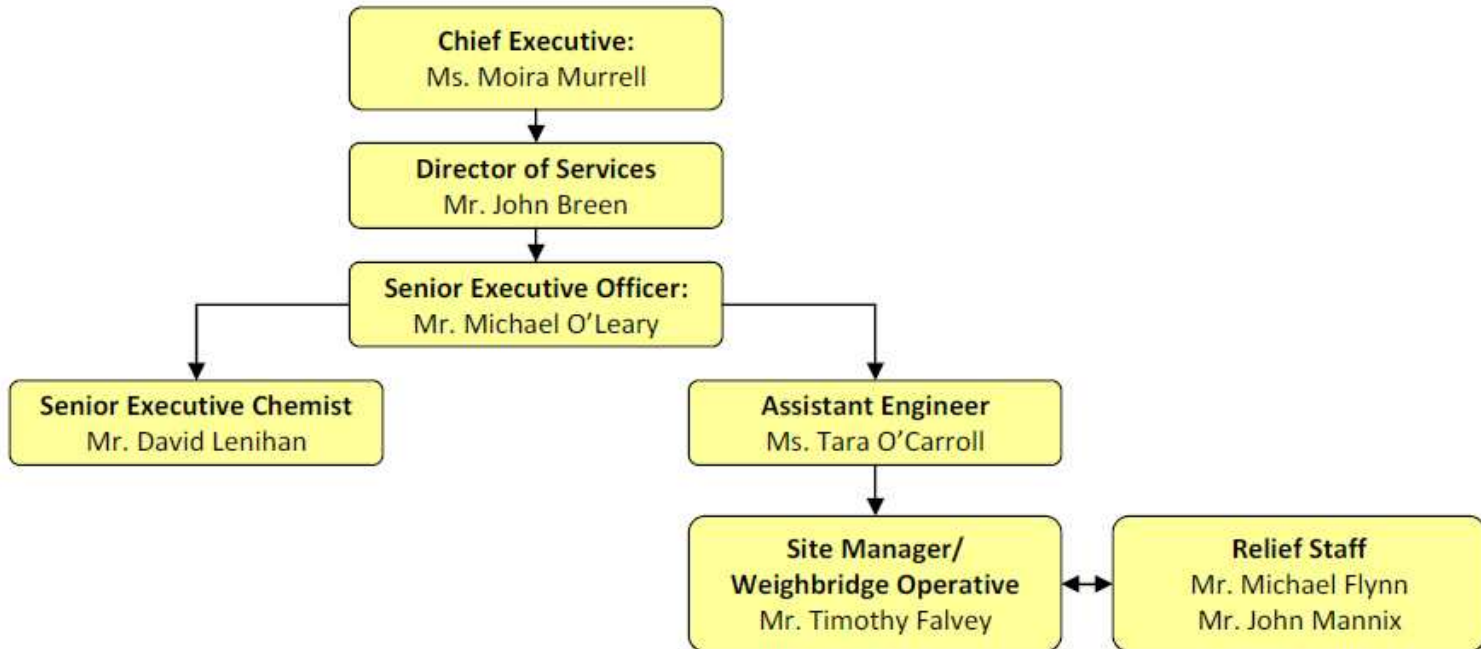

### a) Statement of Costs for Waste Operations at Facility

Accelem	Accelem(T)	Total Charge Euro
60030	Wages	28,221.77
60040	Salaries	5,052.15
60100	ER PRSI	4,215.87
60200	Overtime	3,980.07
60500	Annual Leave	3,080.53

80000	Advertising	-88.00
81000	Printing & Office Consumables	13.00
82100	Statutory Contributions to Other Bodies	2,757.60
99050	Refunds	12.00
	<b>Total Cost</b>	<b>45,184.18</b>

17.0 Management and Staffing Structure at Facility 2014

## **18.0 Programme of Public Information**

The following files are available for inspection on site by members of the public:

- AER of previous reporting years
- All correspondence with the Agency
- Surface Water Monitoring Results
- Incident/Complaints Register
- Tonnage of waste accepted on site
- Characterisation of waste accepted on site
- Operational Procedure Manual
- Waste Acceptance Procedure
- Information on Recycling Initiatives e.g. leaflets.
- Environmental Management System.

**Appendix I - Waste Collected at Dingle Civic Amenity Site and Recovered/Recycled offsite during reporting period**

## 1 INTRODUCTION

Kerry County Council operates a waste transfer station in Lispole, near Dingle. The facility operates within the conditions set out in the waster licence register number W0225-01. Under the terms of this licence the facility is required to carry out an annual environmental noise survey. The results of this survey are described below.

## 2 METHODOLOGY

### 2.1 MONITORING PERIODS

The survey was carried out in accordance with the EPA guidance document, EPA guidance note 4- Guidance Note for Noise: Licence Applications, Surveys and Assessments in relation to Scheduled Activities. In accordance with the guidance note the noise surveys were carried out over three monitoring periods during the normal daytime operating times. Monitoring was undertaken for 30 minutes at each location. Noise monitoring was undertaken by Peter Barry (AMIOA) of Malachy Walsh and Partners on the 08<sup>th</sup> January 2015.

### 2.2 MONITORING LOCATIONS

Monitoring was undertaken at the four nearest noise sensitive locations (B1, B2, B3 and B4). The locations are shown on Figure 1.

Figure1: NOISE MONITORING LOCATIONS

### 2.2.1 Photographs of Noise Monitoring Locations

Location N1 was relocated to the western boundary of the waste transfer station as the residents of N1 were not home. If the licence criteria can be achieved at this alternative location, then the original N1 is also in compliance.

### 2.3 SURVEY EQUIPMENT

The measurements were made using a Bruel & Kjaer type 2250 Light and a Larson Davis 820 Logging integrating Sound Level Meter. These are Type 1 instruments in accordance with IEC 651 regulations. The Time Weighting used was Fast and the Frequency Weighting was A-weighted as per IEC 651. The sound level meters (SLM) were mounted on a tripod at 1.5m above ground level and at least 2m away from any sound reflecting objects. A windshield was placed on the microphone to reduce any wind interference during measurements.

Factory calibration certificates for the noise level meter and acoustic calibrator, detailing equipment serial numbers, calibration traceability and re-calibration dates are attached as Appendix A.

## 2.4 MEASUREMENT PARAMETERS

In order to be able to interpret the noise levels correctly several parameters were measured. These include the;

- $L_{Aeq}$  Time-averaged A weighted noise level.
- $L_{A90}$  Noise level exceeded for 90 % of measurement period (steady underlying noise level).
- $L_{A10}$  Noise level exceeded for 10 % of measurement period.

A subjective analysis for the presence of tones and impulsive noise was also undertaken at each location.

## 2.5 METEOROLOGICAL CONDITIONS

Meteorological conditions were noted as dry, mild with light winds generally not exceeding 5 meters per second ( $ms^{-1}$ ). It is recommended that outdoor noise monitoring is not undertaken in adverse weather conditions as the wind or rain can elevate the readings. Ideally there should be no rain and wind speeds should generally not exceed  $5 ms^{-1}$ .

## 3 NOISE SOURCES

The main noise sources at this facility include:

- A tipping area where costumers tip rubbish from cars and trailers. The rubbish is deposited into a compaction area and is compacted and a container filled for removal off site.
- Customer's vehicles entering and existing the facility.
- Customers using the various recycling and waste skips and areas.

#### 4 RESULTS

**Table 1. Noise Monitoring Results**

Location Reference	Date and Time	L <sub>Aeq</sub> dB	L <sub>A10</sub> dB	L <sub>A90</sub> dB	Tones	Description of Noise Sources
N1 (proxy) (nearest dwelling west of facility)	11:12-11:42	55	56	38	No	Road traffic noise from the N86 was the dominant noise source. Customers using the waste transfer station were also audible during lulls in the traffic.
	11:42-12:12	54	59	41		
	12:12-12:42	54	54	37		
N2 (nearest dwelling north of facility)	9:30-10:00	47	51	38	No	Birdsong and wind in nearby vegetation was the main noise source at this location due to the breeze. Background traffic noise from the N86 was faintly audible. The transfer station was not audible at this location.
	10:00-10:30	47	47	38		
	10:30-11:00	46	48	39		
N3 (nearest dwelling east of facility)	11:11-11:30	50	53	39	No	Birdsong and wind in nearby vegetation contributed to the ambient noise at this location. Dogs barking also contributed. Background traffic noise from the N86 was also audible. Tipping noise from the waste transfer station was audible occasionally.
	11:30-12:00	49	53	40		
	12:00-12:30	47	51	38		
N4 (nearest dwelling south of facility)	09:18-09:48	61	64	40	No	Unrelated road traffic noise from the N86, was the dominant noise source. A faint hum perhaps from the tipping shed was faintly audible during lulls in the traffic noise but the contribution of the waste transfer station was not considered significant. Birdsong, barking dogs, windborne noise and a nearby stream also contributed to the noise build up.
	09:48-10:48	60	61	40		
	10:18-10:48	59	60	39		

## 5 CONCLUSION

At N1, N3 and N4 the most influential noise source was traffic on the N86. At N2, wind in the trees was the main noise source. The waste transfer station did not contribute significantly to the ambient noise levels at any location.

The  $L_{A90}$  or measured background noise level can be considered a truer reflection of the noise environment in the absence of traffic and ranged between 37dB and 41dB. Based on observations noted during the surveys and an analysis of the results it is determined that the Dingle Waste Transfer Station is not causing a noise nuisance to neighbours and operates within the noise limits set out in the waste licence.

No tones were noted at any location. At the boundary locations there were occasional impact noises from waste material being dropped into skips and bins, however this impulsive noise would not cause disturbance or annoyance at any off site location and does not warrant a penalty.

The Dingle Waste Transfer Station is operating within the waste licence noise emission criteria.

## Appendix 1

### Calibration Certificates

# Certificate of Calibration and Conformance

Certificate Number 2014-189699

Instrument Model PRM828, Serial Number 2952, was calibrated on 16 Apr 2014. The instrument meets factory specifications per Procedure D0001.8135.

**New Instrument**

**Date Calibrated: 16 Apr 2014**

**Calibration due:**

### Calibration Standards Used

MANUFACTURER	MODEL	SERIAL NUMBER	INTERVAL	CAL. DUE	TRACEABILITY NO.
Agilent Technologies	34401A	MY41044529	12 Months	4 Feb 2015	6396720
Larson Davis	LDSigGn/2209	0277 / 0109	12 Months	12 Mar 2015	2014-187602

Reference Standards are traceable to the National Institute of Standards and Technology (NIST)

### Calibration Environmental Conditions

Temperature: 23 ° Centigrade

Relative Humidity: 50 %

### Affirmations

This Certificate attests that this instrument has been calibrated under the stated conditions with Measurement and Test Equipment (M&TE) Standards traceable to the U.S. National Institute of Standards and Technology (NIST). All of the Measurement Standards have been calibrated to their manufacturers' specified accuracy / uncertainty. Evidence of traceability and accuracy is on file at Provo Engineering & Manufacturing Center. An acceptable accuracy ratio between the Standard(s) and the item calibrated has been maintained. This instrument meets or exceeds the manufacturer's published specification unless noted.

The collective uncertainty of the Measurement Standard used does not exceed 25% of the applicable tolerance for each characteristic calibrated unless otherwise noted.

The results documented in this certificate relate only to the item(s) calibrated or tested. A one year calibration is recommended, however calibration interval assignment and adjustment are the responsibility of the end user. This certificate may not be reproduced, except in full, without the written approval of the issuer.

Signed: *Ron Harris*  
Technician: Ron Harris

# Certificate of Calibration and Conformance

Certificate Number 2014-189710

Instrument Model 820, Serial Number 1915, was calibrated on 16 Apr 2014. The instrument meets factory specifications per Procedure D0001.8160, ANSI S1.4 1983, IEC 651-Type 1 1979, and IEC 804-Type 1 1985.

**New Instrument**

## Certificate of Calibration

Issued to Malachy Walsh & Partners  
Reen Point  
Blennerville  
Tralee, Co Kerry

Attention of Peter Barry

<b>Certificate Number</b>	<b>E130118</b>
<b>Item Calibrated</b>	Bruel & Kjaer Type 2250 "Light" Sound Level Meter and 4950 Microphone
<b>Serial Number</b>	2654709 and 2657422 (microphone)
<b>Client ID Number</b>	-----
<b>Order Number</b>	MWP130108
<b>Date Received</b>	09 Jan 2013
<b>NML Procedure Number</b>	AP-NM-09

**Method** The above sound level meter was allowed to stabilise for a suitable period in laboratory conditions. The verification checks performed are those outlined in BS7580:Pt 1 (1997), *Specification for the verification of sound level meters*. This British Standard specifies a procedure for the periodic verification of conformance of a sound level meter or integrating-averaging meter to IEC60651 (1994) and IEC60804 (2000), respectively. Prior to calibration the instrument was tested, and its overall sensitivity adjusted in accordance with Clause 5.4 of BS 7580: Pt 1 using its associated sound level calibrator.

**Calibration Standards** Norsonic 1504A Calibration System incorporating:  
SR DS360 Signal Generator, No. 0735, [Cal. Due Date: 17 Jul 2013]  
Agilent 34401A Digital Multimeter, No. 0736 [Cal Due Date: 11 Jul 2013 ]  
B&K 4134 Measuring Microphone, No. 0743 [Cal Due Date: 17 Apr 2014]  
B&K 4228 Pistonphone, No. 0740 [Cal. Due Date: 08 Aug 2014]  
B&K 4226 Acoustical Calibrator, No. 0150, [Cal. Due Date: 30 Oct 2013]

**Calibrated by**   
Oliver Power

**Approved by**   
Paul Hetherington

**Date of Calibration** 16 Jan 2013

**Date of Issue** 16 Jan 2013

This certificate is consistent with Calibration and Measurement Capabilities (CMC's) that are included in Appendix C of the Mutual Recognition Arrangement (MRA) drawn up by the International Committee for Weights and Measures. Under the MRA, all participating institutes recognize the validity of each other's calibration certificates and measurement reports for quantities, ranges and measurement uncertainties specified in Appendix C (for details see [www.bipm.org](http://www.bipm.org))

Date of Calibration 14 Apr 2014

Date of Issue 22 Apr 2014

This certificate is consistent with Calibration and Measurement Capabilities (CMC's) that are included in Appendix C of the Mutual Recognition Arrangement (MRA) drawn up by the International Committee for Weights and Measures. Under the MRA, all participating institutes recognize the validity of each other's calibration certificates and measurement reports for quantities, ranges and measurement uncertainties specified in Appendix C (for details see [www.bipm.org](http://www.bipm.org))

## Appendix 2

### Glossary of Noise Related Terms

**Ambient Noise**

Totally encompassing sound in a given situation at a given time usually composed of a sound from many sources near and far.

**Background noise level**

The A-weighted sound pressure level of the residual noise at the assessment position that is exceeded for 90% of a given time interval, T measured using time weighting F, and quoted to the nearest whole number of decibels.

**EPA****Day:**

0800 hrs to 2200 hrs

**Night:**

2200 hrs to 0800 hrs

**Decibel (dB)**

The unit of sound pressure level, calculated as a logarithm of the intensity of sound. 0 dB is the threshold of hearing, 140 dB is the threshold of pain. A change of 1 dB is detectable only under laboratory conditions. A change of 10 dB corresponds approximately to halving or doubling the loudness of sound.

**dB(A)**

Decibels measured on a sound level meter incorporating a frequency weighting (A weighting) which differentiates between sound of different frequency (pitch) in a similar way to the human ear. Measurements in dB(A) broadly agree with peoples assessment of loudness.

**Hertz (Hz)**

Unit of frequency (pitch) of a sound

**Impulsive Noise**

A noise which is of short duration (typically less than one second), the sound pressure level of which is significantly higher than the background

**1/3 Octave band analysis**

Frequency analysis of sound such that the frequency spectrum is sub divided into bands of one third of an octave each. An octave is taken to be the frequency interval, the upper limit of which is twice the lower limit (in Hertz).

**LAeq**

Equivalent Continuous A-weighted Sound Level. The continuous steady noise level, which would have the same total A-weighted acoustic energy as the real fluctuating noise measured over the same period of time.

**L(A)<sub>10</sub>**

The noise level that is equalled or exceeded for 10% of the measurement period

**L(A)<sub>90</sub>**

The noise level that is equalled or exceeded for 90% of the measurement period

**Noise**

Unwanted sound. Any sound which has the potential to cause disturbance, discomfort or psychological stress to a subject exposed to it, or any sound which has the potential to cause actual physiological harm to a subject exposed to it or physical damage to any structure exposed to it, is known as noise

**Noise Sensitive Receptor**

A noise sensitive receptor is regarded as any dwelling house, hotel or hostel, health building, educational establishment, places of worship or entertainment, or any other facility or area of high amenity which for its proper enjoyment requires the absence of noise at nuisance levels

**Rating level  $L_{A,Tf}$** 

The specific noise level plus any adjustment for the characteristic features of the noise

**Residual Noise**

The ambient noise remaining at a given position in a given situation when the specific noise source is suppressed to a degree such that it does not contribute to the ambient noise

**Sound Power**

The energy output from a source. It is measured in Watts (W)

**Specific Noise Source**

The noise source under investigation for assessing the likelihood of complaints

**Tone**

A noise with a narrow frequency composition
