SELECT	cells that are highlighted blue contain a dropdown menu click to select one option from the list
guidance document link	cells that contain underlined text click to access relevant guidance documents for this section
Table heading *	table headings followed by a symbol have an associated footnote or instructions
Cells with red indicator in top right corner	cells that have a red indicator in the top right corner contain a comment box with further instructions or clarification

Please note an interpretation of results is still required. This should be entered in the additional information/comments boxes within the templates. Please size these boxes appropriately to fit your interpretation, if additional space is required please include an appendix to the AER template and merge it as part of the AER PDF document. The excel template should have all cells sized appropriately so that all text is readable before it is converted to PDF document.

Facility Information Summary

AER Reporting Year Licence Register Number Name of site Site Location NACE Code Class/Classes of Activity National Grid Reference (6E, 6 N)

A description of the activities/processes at the site for the reporting year. This should include information such as production increases or decreases on site, any infrastructural changes, environmental performance which was measured during the reporting year **and an overview of compliance with your licence** <u>listing all</u> <u>exceedances of licence limits (where</u> <u>applicable) and what they relate to e.g. air,</u> <u>water, noise.</u>

	Derryconnell Landfill & Civic Amenity Site
	Derryconnell, Schull, Co. Cork
	3821
	5(c), 5(d), & 50.1
	(49E, 53N)

Description of Activities on Site during 2014:

The Facility at Derryconnell consists of a closed Landfill and a Civic Amenity Site. Deposition of waste at the landfill ceased in August 2010 and the final capping works were completed by Q2 2011. The main activities at the site during 2014 were the extraction of gas and leachate from the closed landfill (extracted gas is flared onsite and leachate is pumped to an on-site lagoon prior to being transported for treatment to Bandon WWTP) and the acceptance and storage of waste at the Civic Amenity Site for off-site treatment/disposal/recycling.

Exceedances of Licence Limits during 2014:

Carbon Dioxide emssions exceeded the licence limit twice at perimeter monitoring location L6 and 3 times at perimeter monitoring location L7 during 2014.

Overview of Licence Compliance during 2014:

2 no. compliance investigation were ongoing during 2014 - one in relation to groundwater contamination and a second in relation to contaminated discharge to surface water. Both investigations were completed to the satisfaction of the EPA and are subject to ongoing monitoring and reporting in relation to both incidents.

Declaration:

All the data and information presented in this report has been checked and certified as being accurate. The quality of the information is assured to meet licence requirements.

Does your site have licensed emissions direct to surface water or direct to sever? If yes please complete table 1 W2 and W3 below for the current reporting year and answer further questions. If **you do** not have licenced emissions you only need to complete table W1 and or W2 for storm water analysis and visual inspections

Was it a requirement of your licence to carry out visual inspections on any surface water discharges or watercourses on or near your site? If yes please complete table W2 below summarising <u>only any evidence of</u> <u>contamination noted during visual inspections</u>

Table W1 Storm water monitoring

Noise monitoring summary report	Lic No:	W0089-02	Year
1 Was noise monitoring a licence requirement for the AER period? If yes please fill in table N1 noise summary below		Yes]
2 Was noise monitoring carried out using the EPA Guidance note, including completion of the "Checklist for noise measurement report" included in the guidance note as table 6?	<u>Noise</u> Guidance note NG4	Yes	

4 When was the noise reduction plan last updated?
 Have there been changes relevant to site noise emissions (e.g. plant or operational changes) since the last noise survey?

3 Does your site have a noise reduction plan

Table N1: Noi	se monitoring s	ummary									
Date of monitoring		Noise location (on site)	Noise sensitive location -NSL (if applicable)	LA _{eq}	LA ₉₀	LA ₁₀	LA _{max}	Tonal or Impulsive noise* (Y/N)	If tonal /impulsive noise was identified was 5dB penalty applied?	Comments (ex. main noise sources on site, & extraneous noise ex. road traffic)	Is <u>site</u> compliant with noise limits (day/evening/night)?
