Facility Information Summary	
AER Reporting Year	2014
Licence Register Number	W0229-01
Name of site	Advanced Environmental Solutions (AES) Ireland Ltd.
Site Location	Ballygillane Big, Ballyknockan, St. Helens, Kilrane, Rosslare
NACE Code	3821
Class/Classes of Activity	3,13, 3.11, 3.12, 4.13, 4.2, 4.3, 4.4
National Grid Reference (6E, 6 N)	-6.34359, 52.2398
A description of the activities/processes at the site for the reporting year. This should include information such as production increases or decreases on site, any infrastructural changes, environmental performance which was measured during the reporting year <b>and an overview of compliance with your licence listing all exceedances of licence limits (where applicable) and what they relate to e.g. air, water, noise.</b>	Waste activities did not change significantly since the last reporting year (2013). Waste is accepted to site as per Schedule A2. of W0229-01. Waste activities at the site include temporary storage of wastes, sorting of waste to ensure correct segregation, and baling of recyclables (e.g. cardboard). There were no major infrastructure changes to the facility during 2014. All waste processing occurs indoors. There was 6 No. exceedence of licence limits for dust monitoring and 1 No. exceedence of licence limits for noise during 2014. There are no specified emission limits for surface waters in Waste Licence (W0229-01) as there is no direct discharge from the site in to the nearest surface water feature.

**Declaration:**

All the data and information presented in this report has been checked and certified as being accurate. The quality of the information is assured to meet licence requirements.

Answer all questions and complete all tables where relevant

- 1 Does your site have licensed air emissions? If yes please complete table A1 and A2 below for the current reporting year and answer further questions. If **you do not have** licensed emissions and **do not complete a solvent management plan** (table A4 and A5) you do not need to complete the tables

Additional information	
No	

**Periodic/Non-Continuous Monitoring**

- 2 Are there any results in breach of licence requirements? If yes please provide brief details in the comment section of TableA1 below

Yes	Exceedance of dust levels specified in licence.
-----	---

- 3 Was all monitoring carried out in accordance with EPA guidance note AG2 and using the basic air monitoring checklist? [Basic air monitoring checklist](#) [AGN2](#)

Yes	Monitoring was in accordance with standard VDI 2119.

\* please note exceedance of a relevant Groundwater threshold value (GTV) at a representative monitoring point does not indicate non compliance, an exceedance triggers further investigation to confirm whether the criteria for poor groundwater chemical status are being met.

\*\*Depending on location of the site and proximity to other sensitive receptors alternative Receptor based Water Quality standards should be used in addition to the GTV e.g. if the site is close to surface water compare to Surface Water Environmental Quality Standards (SWEQS). If the site is close to a drinking water supply compare results to the Drinking Water Standards (DWS)

		Commentary	
1	ELRA initial agreement status	Required but not submitted	ELRA currently being completed and will be submitted to the Agency for approval in 2015
2	ELRA review status		Not applicable
3	Amount of Financial Provision cover required as determined by the latest ELRA	Not determined	Not determined
4	Financial Provision for ELRA status	Required but not submitted	AES is a wholly owned subsidiary of Bord na Mona Group and operates under Bord na Mona Resource Recovery Ltd. As such AES and Bord na Mona are currently investigating the ELRA requirements for all of our waste facilities and we expect to have an ELRA and DMP prepared for the facility within the next 6 months for submission and approval by the Agency.
5	Financial Provision for ELRA - amount of cover	Not determined	The environmental liabilities are those considered to be restricted to the confines of the facility, therefore, any costs incurred in addressing same will be limited to removal and safe disposal of waste remaining on-site following an emergency event (e.g. fire or spillage) or the decommissioning and closure of the site. Such environmental liabilities cover should account for the cost of the clean up and removal of the maximum amount of waste that may be stored on site at any given time. AES and Bord na Mona (parent company) have arranged insurance to cover the liability arising from damage to property and injury to parties as a result of sudden and unforeseen environmental impairment. AES have insurance cover for "Business Interruption" and have adequate reserves for the cost of removing the maximum amount of waste that may be stored on-site at any given time and to ensure that said material is transported to an authorised and capable facility. In the unlikely event of full decommissioning, financial reserves are available to allow a formal surrender of the licence ensuring that the inherent environmental safeguard associated with this regulatory process is activated.
6	Financial Provision for ELRA - type	Other please specify	Bord na Mona is investigating the possibility of having a Parent Company Guarantee arrangement in place.
7	Financial provision for ELRA expiry date	No expiration specified.	No expiration specified.

AES trucks entering/exiting site with chains rattling. Lorry engines idling within the AES yard. Background: Intermittent passing traffic on local road, partially visible (average 66 vehicles) - dominant. Occasional birdsong.	Yes

\*Please ensure that a tonal analysis has been carried out as per guidance note N64. These records must be maintained onsite for future inspection

If noise limits exceeded as a result of noise attributed to site activities, please choose the corrective action from the following options?

nothing\*\*

\*\* please explain the reason for not taking action/resolution of noise issues? Noise exceedances at Location N1 on 22/08/14 were attributed to activities occurring at off-site locations from third party activities.

**Additional Data Requested from Landfill operators**

For the purposes of the National Inventory on Greenhouse Gases, landfill operators are requested to provide summary data on landfill gas (Methane) flared or utilised on their facilities to accompany the figures for total methane generated. Operators should only report their Net methane (CH4) emission to the environment under T(total) KG/yr for Section A: Sector specific PRTR pollutants above. Please complete the table below:
