1

Facility Information Summary	1		
AER Reporting Year	2014		
Licence Register Number	W011-02		
Name of site	Ballymur	tagh Landfill	
Site Location	Tinnahinch, A	voca, Co. Wicklow	
NACE Code		IESE	
Class/Classes of Activity	Disposal & Recovery	of Non-Hazardous Waste	
National Grid Reference (6E, 6 N)	-6.2286	5,52.87457	
A description of the activities/processes at the site for the reporting year. This should include information such as production increases or decreases on site, any infrastructural changes, environmental performance which was measured during the reporting year and an overview of compliance with your licence listing all exceedances of licence limits (where applicable) and what they relate to e.g. air, water, noise.	Ballymurtagh is a close	d landfill (12 years) and now only	operates a Recycling facility at the site.

## Declaration:

All the data and information presented in this report has been checked and certified as being accurate. The quality of the information is assured to meet licence requirements.

Signature Robert Kelly 2014

Group/Facility manager (or nominated, suitably qualified and experienced deputy)

Groundwater/Soil monitoring template	Lic No:	W011-02		Year 2014
			Comments	
1 Are you required to carry out groundwater monitoring as prequirements?	art of your licence	yes		Please provide an interpretation of groundwater monitoring data in the
2 Are you required to carry out soil monitoring as part of you		no		interpretation box below or if you require additional space please
Do you extract groundwater for use on site? If yes please s section	pecify use in comment	no		include a groundwater/contaminated land monitoring results interpretaion as an additional section in this AER
Do monitoring results show that groundwater generic assessment criteria such as GTVs or IGVs are exceeded or 1 there an upward trend in results for a substance? If yes, pl complete the Groundwater Monitoring Guideline Templature Report (link in cell G8) and submit separately through ALDI licensee return AND answer questions 5-12 belong.	ease Groundwater	yes		
5 Is the contamination related to operations at the facility (e historic)	ither current and/or	no		
6 Have actions been taken to address contamination issues? remediation strategies proposed/undertaken for the site	If yes please summarise	no		
7 Please specify the proposed time frame for the remediatio		N/A		
8 Is there a licence condition to carry out/update ELRA for the		yes		]
9 Has any type of risk assesment been carried out for the site		yes		1
10 Has a Conceptual Site Model been developed for the site?		no		1
11 Have potential receptors been identified on and off site?		yes		<u> </u>
12 Is there evidence that contamination is migrating offsite?		yes	Acid Mine Drainage	Please enter interpretation of data here
