RE: KMK Metals Recycling Ltd. (KMK)
Waste licence ref: W0113-04

Technical amendment to the license is required.

Dear Sir/Madam,

I refer to Table A.2.2 EWC codes authorised for waste acceptance as in the present licence W0113-04.

KMK requests that the following waste types be included to this table;

The Environmental Protection
 Agency
 14 MAY 2014
 CORK

EWC Codes	Description
05 01 09*	Sludges from on-site effluent treatment containing dangerous substances
06 06 02*	Waste containing dangerous sulphides
10 08 08*	Salt slag from primary and secondary production
12 01 13	Welding wastes
16 11 03*	Other linings and refractories from metallurgical processes containing dangerous substances.

Please note that these codes were on the previous waste licences W0113-03, W0113-02 and W0113-01 and therefore KMK wishes to carry these forward into the licence W0113-04.

In addition some typos are noted on the table and therefore the following actions are required;

remove EWC Code 05 01 99* as this code does not exist.
re-reference 07 01 99* to 07 01 99 (non hazardous waste)
re-reference 07 04 10. to 07 04 10* (hazardous waste)
re-reference 07 05 10 to 07 05 10* (hazardous waste)
re-reference 16 10 04* to 16 10 04 (non hazardous waste)
Remove one of the references to 20 01 33* as it is listed twice in the table

If you have any questions, please do not hesitate to contact me.

Yours Sincerely,

Niall Nally

Senior Environmental Consultant
