Ewa,

Further to our discussion on Tuesday, I was only able to speak to the ecologist today. He should be able to complete the NIS within 4 weeks of receipt of the results of the tests on surface water samples. Samples will be collected from the rainwater run-off from the site and in the River Suir up and downstream of the discharge point. A boat is required to collect the samples in the river and Ormonde Organics is arranging this. I understand the samples will be collected either late next week or early the following weeks. Samples of the surface water run-off from the site will be collected during rainfall events over the next week. Once the test results are available I will confirm the submission date of the NIS. In relation to the other information requests we are preparing the responses and expect to submit this in the week starting 24<sup>th</sup> August.

Regards,

Jim O'Callaghan
