Re: **Notice in accordance with Article 14(2)(b)( ii) of the Waste Management (Licensing) Regulations**

**Waste Licence Application by CLASHFORD RECOVERY FACILITY LTD for the continued operation of its existing Waste Recovery Facility on lands at Naul townland, Naul, Co. Meath (National Grid Reference 285633E 253005N)**

Dear Ms Babiarczyk,

I refer to our telephone conversation of 10/11/2015 with respect to the above licence application. As discussed we have engaged both a hydrogeologist and ecologist in relation to preparation of the Natura Impact Statement. In particular your request for further information requires a Hydrogeological and Hydrological Risk Assessment to be undertaken.

The objective of the resulting Hydrogeological and Hydrological Risk Assessment is to address the following matters raised by the EPA as part of the AA screening determination:

- Monitoring results submitted by the applicant for surface water run-off discharge from the site show that this discharge is contaminated with parameters such as ammoniacal nitrogen, arsenic, calcium, chloride, chromium, lead and others.
- There is uncertainty about whether the contaminated run-off has potential to reach and impact the European Sites.

As part of this assessment it is proposed to carry out a further round of water monitoring.

The appointed hydrogeologist has indicated that they will need until the end of January to early February 2016 to complete their studies. As such we would be grateful if you could confirm that this extension of time is acceptable to the EPA.

Please do not hesitate to contact us if you wish to discuss this matter.

Yours Sincerely,

For J Sheils Planning & Environmental Ltd,

John Sheils MSCS MRICS
