26th January 2016

Licence Ref. No: W0184-1

Dear Brian,

I refer to our request dated 27th of November 2015 in regard to our proposal to install an odour abatement system (consisting of a Regenerative Thermal Oxidiser) at our facility in Portlaoise.

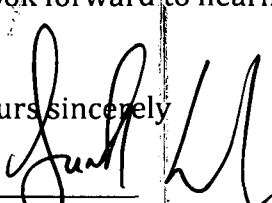

We would very much welcome a decision from the Agency in regard to this proposal as soon as is possible. In the interim period, and as you are aware for our correspondence dated 8th and 19th January 2016, we are implementing a range of measures to ensure we prevent odour nuisance arising from the facility. These include a substantial reduction in our processing output where we are only part processing some waste oil intake for temporary storage on site pending installation of the abatement system. However we estimate that we only have sufficient storage for approximately 5 months. We will require installation of the proposed abatement system as a permanent solution, to allow the facility to return to normal processing capacity. Installation and commissioning of the abatement system is anticipated to take 5 months from the time Agency approval is received.

If the Agency has any queries or clarifications in relation to our proposal or would like to discuss the matter further please do not hesitate to contact me so as to ensure the process can be progressed as expediently as possible.

I would reiterate that this matter is the utmost priority for the facility and our management team.

I look forward to hearing from the Agency so we can urgently progress the matter.

Yours sincerely

Gareth Kelly
Director
