Facility Information Summar	у		
AER Reporting Year	2015		
Licence Register Number	P0606-03		
Name of site	Great Islan	d Generating Station	
Site Location	Campile, Ne	ew Ross, Co. Wexford	
NACE Code		4010	
Class/Classes of Activity	Production a	nd Supply of Electricity	
National Grid Reference (6E, 6 N)	E268	3907 N114574	
A description of the activities/processes at the site for the reporting year. This should include information such as production increases or decreases on site, any infrastructural changes, environmental performance which was measured during the reporting year and an overview of compliance with your licence listing all exceedances of licence limits (where applicable) and what they relate to e.g. air. water, noise.	commissioning phase, which 2015 and the CCGT plant beg were very low at 146 hours, w was 4132 hours. Decommissi approved by The Agency and The decommissioning works underground pipework, remo- subject to final sign off from Great Island reported two inco	an commercial operation. Running hou vhile the total running time for the new oning of the HFO plant began in Octob is due to finish in March of 2016. Include complete removal of Heavy Fu wal of all chemicals, cleaning of all che fhe Agency in 2016. idents to The Agency in 2015; an excee nstrument interference. The second in	roduction and the CCGT was in the The HFO plant ceased production in April urs for the HFO plant this year consequently w CCGT plant, including commissioning phase er 2015 according to a Decommissioning Plan el Oil from site, survey and repair of all mical tanks and pipework. These works are edance of SO2 that was later agreed to be a cident was a breach of our CW temperature

Declaration: All the data and information presented in this report has been checked and certified as being accurate. The quality of the information is assured to meet licence requirements.

Additional Information Yes

Continuous monitoring 5 Does your site carry out continuous emissions to water/sewer monitoring?

If yes please summarise your continuous monitoring data below in Table W4 and compare it to its relevant Emission Limit Value (ELV)

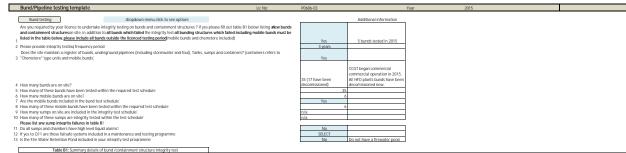

6	Did continuous monitoring equipment experience downtime? If yes please record downtime in table W4 below	No	
7	Do you have a proactive service contract for each piece of continuous monitoring equipment on		
	site?	No	Some equipment maintained in house
	Did abatement system bypass occur during the reporting year? If yes please complete table W5		
0	below	No	
	Table W4: Summary of average emissions -continuous monitoring

 Instructions to construct on evaluations to construct on evaluations

 16 Are channel/Struction for evaluation of the construction of the integrity and available volume
 Instructions

Yes Yes Yes

Pipeline/underground structure testing

Ho plant underground structures were CCTV surveyed in 2014 which identified various fractures and failures in pipework. All failures were rehabilitated by third party contractor in 2015. Are you required by your licence to undertake integrity testing on underground structures e.g. pipelines or sumps etc.? If yes please fill out table 2 below listing 1 all underground structures and pipelines on situatability field the integrity test andall which have not been tested withing the integrity test period as specified 2 Please provide integrity testing means water traitmess testing for process and foul pipelines (as required under your liceno

prover more more the provide the state of the state of the provide and the provide the state of the state	jour n
