

Facility Information Summary	
AER Reporting Year	2015
Licence Register Number	W0036-02
Name of site	Indaver Ireland Limited
Site Location	Tolka Quay Road
NACE Code	3821 and 3822
Class/Classes of Activity	3.11, 3.12, 3.13, 4.1, 4.13
National Grid Reference (6E, 6 N)	-6.20299, 53.3521
<p>A description of the activities/processes at the site for the reporting year. This should include information such as production increases or decreases on site, any infrastructural changes, environmental performance which was measured during the reporting year and an overview of compliance with your licence listing all exceedances of licence limits (where applicable) and what they relate to e.g. air, water, noise.</p>	
<p>In 2015, Indaver's waste transfer station provided temporary storage for incoming hazardous and non-hazardous waste, prior to onwards shipping from Ireland to mainly Europe for recovery, disposal and other treatment. There was an overall increase in waste volumes handled compared to 2014 due to increased activity at Indaver's Solvent Recovery Facility. There were no exceedances of licence limits for emissions to atmosphere, ambient air and groundwater. All surface water results were compliant with the licence except for the Quarter 4 Suspended Solids result which exceeded the ELV for the licence. This was notified as an incident. In terms of noise monitoring, activities at the Indaver facility did not give rise to noise levels that exceed the permitted noise limit and no tonal or impulsive noise from site activities was recorded. However, the noise monitoring locations are prone to interference from road traffic and from operations at other facilities. No environmental complaints were recorded. There were three environmental incidents in 2015 corresponding to three non-compliances received.</p>
