# 1. Introduction.

1.1 This Annual Environmental Report (AER) has been prepared by Wood Environmental Management Ltd (WEML) on behalf of Ray Whelan Ltd as required by condition 11.6 and Schedule F of Waste Licence 158-1 issued by the Environmental Protection Agency on 23<sup>rd</sup> May 2003.

# 2. Reporting Period.

2.1 This Annual Environmental Report (AER) covers the period 1<sup>st</sup> January to 31<sup>st</sup> December 2015 inclusive.

# 3. Waste Activities Carried out at the Facility.

- 3.1 Ray Whelan Ltd operate an authorised waste skip hire, wheelie bin collection and recycling business from premises at Cappanaboe, Co Laois.
- 3.2 Waste Licence 158-1 issued by the EPA on 23<sup>rd</sup> May 2003 permits Ray Whelan Ltd to carry out the following waste activities at the facility, in accordance with the Waste Management Act, 1996;
  - Third Schedule of the Waste Management Act, 1996;
  - Class 11. Blending or mixture prior to submission to any activity referred to in
    a preceding paragraph of this Schedule:

    This activity is limited to the bulking and transfer of waste for disposal off-site.
  - Class 13. Storage prior to submission to any activity referred to in a preceding paragraph of this Schedule, other than temporary storage, pending collection, on the premises where the waste concerned is produced:
     This activity is limited to storage prior to the bulking and transfer of waste for disposal off-site.

Fourth Schedule of the Waste Management Act, 1996;

• Class 2. Recycling or reclamation of organic substances which are not used as solvents (including composting and other biological transformation processes):

This activity is limited to the segregation of cardboard, paper, wood, plastic and organic waste prior to recovery off-site.

- Class 3. Recycling or reclamation of metals and metal compounds:
   This activity is limited to the segregation of steel and metals prior to recovery off-site.
- Class 4. Recycling or reclamation of other inorganic materials:
   This activity is limited to the segregation of glass and construction and demolition waste prior to recovery off-site.
- Class 13. Storage of waste intended for submission to any activity referred to
  in a preceding paragraph of this Schedule, other than temporary storage,
  pending collection, on the premises where such waste is produced:

  This activity is limited to the storage of waste prior to recovery off-site.
- 4. Quantity and Composition of Wastes Recovered, Received and Disposed of During the Reporting Period and Each Previous Year.
- 4.1 Based on figures provided to WEML by Ray Whelan Ltd, Ray Whelan Ltd handled 35,547 tonnes of waste at the facility during the period 1<sup>st</sup> January 31<sup>st</sup> December 2015. This represents an increase of 3,136 tonnes compared to the quantity of waste handled at the facility during 2014 (see Table 1).
- 4.2 Of the 35,547 tonnes of waste handled at the facility in 2015, a total of 15,394 tonnes of waste were disposed of ie. approximately 43 % and a total of 20,153 tonnes of waste were recovered/recycled ie. approximately 57%.
- 4.3 Table 1 shows the percentage disposal and recycling rates over the period 2004 to 2015.

Table 1. Quantity of Waste Disposed of and Recycled by Ray Whelan Ltd over the period 2004 - 2015.

Year	Total	Disposed	%	Recycled	%
2004	21,525	20,062	93.2	1,463	6.8
2005	26,292	24,588	93.5	1,704	6.5
2006	28,521	23,223	81.4	5,298	18.6
2007	35,167	27,203	77.3	7,964	22.7
2008	28,028	22,863	81.6	5,165	18.4
2009	34,897	28,582	81.9	6,315	18.1
2010	33,004	15,444	46.8	17,506	53.0
2011	32,017	10,728	33.5	19,287	60.2
2012	30,985	7,331	23.7	23,654	76.3
2013	37,389	6,922	18.5	23,026	61.5
2014	32,411	13,999	43	18,410	57
2015	35,547	15,394	43	20,153	57

4.4 A breakdown of the waste quantities received, recovered and disposed of by Ray Whelan Ltd during 2015 are shown in Tables 2 & 3.

Table 2. Quantity of Waste Received & Disposed of by Ray Whelan Ltd (01/01/15 -31/12/15)

Waste Type	Origin of	EWC	Quantity	Destination	Treatment
	Waste	Code	(tonnes)	of Waste	of Waste
Pretreated Waste	Carlow	191212	15,394	Powerstown	Disposal
	Kildare			Landfill	
	Kilkenny				
	Laois				
	Wicklow				
		Total	15,394		

Table 3. Quantity of Waste Received & Recycled by Ray Whelan Ltd (01/01/15 –31/12/15)

Waste Type	Origin of	EWC	Quantity	Destination	Treatment
	Waste	Code	(tonnes)	of Waste	of Waste
Household (mixed collection)	Carlow Kildare Kilkenny Laois Wicklow	200301	9,778	Indaver	Recycled
Mixed Dry Recyclables	Carlow Kildare Kilkenny Laois Wicklow	200301	4,969	Re-Gen	Recycled
Mixed Dry Recyclables	As above	200301	2,676	Nurendale	Recycled

Table 3. Quantity of Waste Received & Recycled by Ray Whelan Ltd (01/01/15 –31/12/15) continued....

Waste Type	Origin of Waste	EWC Code	Quantity (tonnes)	Destination of Waste	Treatment of Waste
Soil & Stones	Carlow Kildare Kilkenny Laois Wicklow	200202	1,551	Powerstown Landfill	Recycled
Paper & Cardboard	Carlow Kildare Kilkenny Laois Wicklow	150101	638	Natural Energy & Recycling Ltd	Recycled
Household Food Waste	Carlow Kildare Kilkenny Laois Wicklow	200108	375	Waddock Composting Ltd	Recycled
Wood	Carlow Kildare Kilkenny Laois Wicklow	150101	73	Molloys, Clonmel	Recycled
Metal	Carlow Kildare Kilkenny Laois Wicklow	200140	63	Molly Metals Recycling Ltd	Recycled
Glass Packaging	Carlow Kildare Kilkenny Laois Wicklow	160120	26	MSM Recycling Ltd	Recycled
Plastic	Carlow Kildare Kilkenny Laois Wicklow	191204	4	Natural Energy & Recycling Ltd	Recycled
		TOTAL	20,153		

# 5. Summary Report of Emissions.

5.1 Waste licence 158-1 requires Ray Whelan Ltd to carry out the following site emissions monitoring.

**Table 4.** Site Monitoring Requirements.

Condition	Monitoring	Nos Locations	Frequency
Ref	Required		
Schedule D2	Dust Monitoring	D1, D2	Three times a year. Twice
			during May - September
Schedule D3	Noise Monitoring	N1-N5, NSL1	Annually
Schedule D4	Surface Water	SW1	Quarterly
	Monitoring		-
Schedule D4	Waste Water	WW1	Bi-Annually
	Monitoring		
Schedule D5	Ground Water	GW1	Annually
	Monitoring		

5.2 A summary of the site emissions monitoring surveys for 2015 is presented below. Laboratory certificates are available for inspection on Site.

# **Dust Deposition Results.**

- 5.3 WEML carried out dust deposition surveys at the facility in April, May & December 2015.
- 5.4 Dust deposition monitoring was based on a modified version of the Bergerhoff method VDI 2119 'Measurement of dustfall using the Bergerhoff instrument (standard method)'. Dust results are presented below.

Table 5. Dust Deposition Results (April 2015).

Location	Suspended Solids Mg/sample	Dust Deposition mg/m²/day	Dust Deposition Limit (mg/m²/day)
D1 Site Entrance	36	17.92 mg/m <sup>2</sup> /day	$350 \text{ mg/m}^2/\text{d}$
D2 Second Entrance	22	$10.95 \text{ mg/m}^2/\text{day}$	$350 \text{ mg/m}^2/\text{d}$
D3 Rear site boundary	54	$26.88 \text{ mg/m}^2/\text{day}$	$350 \text{ mg/m}^2/\text{d}$

5.5 The above dust deposition results are all in compliance with the licence limit of 350g/m<sup>2</sup>/day.

Table 6. Dust Deposition Results (May 2015).

Location	Suspended Solids Mg/sample	Dust Deposition mg/m²/day	Dust Deposition Limit (mg/m²/d)
D1 Site Entrance	46	$28.45 \text{ mg/m}^2/\text{day}$	$350 \text{ mg/m}^2/\text{d}$
D2 Second Entrance	34.5	$21.33 \text{ mg/m}^2/\text{day}$	$350 \text{ mg/m}^2/\text{d}$
D3 Rear site boundary	120	74.21 mg/m <sup>2</sup> /day	$350 \text{ mg/m}^2/\text{d}$

5.6 The above dust deposition results are all in compliance with the licence limit of 350 mg/m<sup>2</sup>/day.

Table 8. Dust Deposition Results (December 2015).

Location	Suspended Solids Mg/sample	Dust Deposition mg/m²/day	Dust Deposition Limit (mg/m²/d)
D1 Site Entrance	<10	<6 mg/m <sup>2</sup> /day	$350 \text{ mg/m}^2/\text{d}$
D2 Second Entrance	235	141 mg/m <sup>2</sup> /day	$350 \text{ mg/m}^2/\text{d}$
D3 Rear site boundary	25	15 mg/m <sup>2</sup> /day	$350 \text{ mg/m}^2/\text{d}$

5.7 The above dust deposition results are all in compliance with the licence limit of 350 mg/m²/day.

# Noise Results.

- 5.8 WEML carried out a noise monitoring survey at the facility on 22<sup>nd</sup> May 2015.

  Noise monitoring was carried out to the International Standard ISO 1996/1

  "Acoustics Description & measurement of environmental noise" using a calibrated Sound Level Meter.
- 5.9 Monitoring was carried out over a typical day. Weather conditions during sampling were dry and cloudy with little wind. Ray Whelan Ltd do not operate the site at night-time, therefore noise monitoring was not carried out overnight.
- 5.10 During monitoring, there was typical activity taking place on site. The monitoring equipment was manned throughout the sampling period and comments/notes taken to assist the interpretation and assessment of results.
- 5.11 Sampling was carried out at the following five boundary locations;
  - N1 Site entrance.
  - N2 Second site entrance.
  - N3 Rear corner site boundary (opposite second site entrance).
  - N4 Outside transfer station building.
  - NSL1 Outside closest house to the facility.
- 5.12 Noise monitoring results are summarised below.

**Table 8.** Summary of Site Boundary Noise Levels.

Location	Start Time	LAeq	Comments
N1	14:55	66.6	Site operational. Vehicles visiting site. Waste handling
			activities taking place on site.
N2	15:30	58.5	As above.
N3	13:40	47.6	As above.
N4	14:20	70.8	As above.

**Table 9. Summary of Sensitive Locations Noise Levels.** 

Location	Start Time	LAeq	Comments
NSL1	16:05	56.1	As above. Noise from passing traffic and birds.

- 5.13 The above results show that during the survey, the noise level recorded at the closest sensitive location (NSL1) was slightly above the waste licence daytime noise limit of 55 dB(A)  $L_{Aeq}$ . Noise levels at this location was impacted by passing traffic.
- 5.14 There are no complaints of noise from the residents at the closest sensitive receptor (NSL1) due to operation of the Ray Whelan Ltd facility. WEML therefore concludes that based on the above survey, noise levels from the Ray Whelan Ltd facility do not cause a significant noise nuisance at sensitive locations beyond the site boundary.

# **Surface Water Monitoring Results.**

- 5.15 Waste licence 158-1 requires Ray Whelan Ltd to carry out quarterly surface water sampling and monitoring for the following analysis;
  - pH
  - Conductivity
  - BOD
  - Suspended Solids
  - Ammonia
  - Mineral Oils

- 5.16 All site yard run off water is diverted to the underground 'blind' waste water collection sump prior to collection and disposal off site. There is no point discharge of yard surface water from the site.
- 5.17 Bi annual water samples were taken from the underground wastewater holding tank and tested for a range of analyses as presented below.

# **Waste Water Monitoring Results.**

- 5.18 Waste licence 158-1 requires Ray Whelan Ltd to carry out bi-annual waste water sampling and monitoring for the following analysis;
  - pH
  - BOD
  - COD
  - Suspended Solids
  - Ammonia
  - Mineral Oils
  - Fats, Oils, Grease
- 5.19 As detailed above, the site drainage infrastructure diverts all site run off and waste water in to the waste water collection sump prior to collection and disposal off site.
- 5.20 WEML took samples of the combined surface water and waste water in April, May & December 2015. The results of the combined surface water and waste water analyses are shown in Table 10 below.

Table 10. Summary of Combined Surface Water Waste & Water Analyses.

Parameter	Sample 1 April 2015	Sample 2 May 2015	Sample 3 December 2015
pH Units	6.82	No result	6.93
BOD mg/l	535	379	424
COD mg/l	1,670	885	1,720
Suspended Solids mg/l	1,160	580	930
Ammonia mg/l	19.2	21	6.71
Mineral Oils μg/l	29,500	11,800	31,800
Fats, Oils & Grease mg/l	165	50.9	81.7

5.21 There are no waste water quality limits set down in waste licence 158-1. The elevated mineral oils concentrations in the effluent samples are likely a result of washing commercial bins from take aways. The contents of the waste water storage tank are tankered off site for disposal as required by condition 3.12 of the waste licence. The above data is useful when arranging sub-contractors to empty and dispose of the contents of the waste water sump when required.

# **Ground Water Monitoring Results.**

- 5.22 Waste Licence 158-1 requires Ray Whelan Ltd to carry out annual ground water sampling and monitoring for the following analysis;
  - pH
  - Conductivity
  - Ammonia
  - Mineral Oils
- 5.23 A groundwater sampling well was installed at the facility in early 2005.
   WEML sampled the groundwater on 22<sup>nd</sup> May 2015. The results are presented below.

Table 11. Summary of Groundwater Sampling Results (2015).

Ref	pH units	Conductivity ms/cm @ 25°C	Ammonia mg/l	Mineral Oils μg/l
GW1	8.15	0.47	7.73	<10
EPA Limit	No limit Set	No limit Set	No limit Set	No limit Set
Compliance	No	No	No	No

5.24 There are no groundwater quality limits set down in waste licence 158-1.

However the above data will be useful when comparing and monitoring future groundwater quality data at the site.

# 6. Summary of Monitoring Results & Location Plan Showing Monitoring Locations.

A discussion and interpretation of the 2015 site monitoring data is presented in Section 5 above. A site map showing the location of monitoring points is presented in Figure 1.

# 7. Resource & Energy Consumption Summary.

- 7.1 The main resource used by Ray Whelan Ltd is diesel for fueling the waste collection vehicles, site waste handling and processing equipment. The total quantity of road diesel used by Ray Whelan Ltd during 2015 was 500,745 litres.
- 7.2 Electricity was connected to the site in November 2007. Site water (non potable) is provided by an onsite borehole.
- 7.3 An approximate breakdown of the resources used by Ray Whelan Ltd in 2015 is shown in the following table.

Table 12. Summary of Resources & Energy Use (2015).

Resource/Fuel	Use	Approximate Quantity
Road Diesel	Diesel for Lorries	500,745 litres
Green Diesel	Site Machinery/Equipment	20,756 litres
Hydraulic Oil	Lorries	3,600 litres
Engine Oil	Lorries	1,463 litres
Transmission Oil	Lorries	240 litres
Lubricants	Servicing Lorries	1,100 litres
Electricity	Site Power	436 units

# 8. Development/Infrastructure Works.

8.1 All site infrastructure works as detailed in Condition 3 and Schedule B of Waste Licence 158-1 has been installed as required.

# 9. Schedule of Environmental Objectives for 2015.

9.1 Ray Whelan Ltd has developed a schedule of Environmental Objectives & Targets for the period 2016. This schedule is presented in Table 13 below.

Table 13. Register of Environmental Objectives & Targets (2016).

	OBJECTIVES	TARGETS
1	Assess and reduce where	Not to exceed 350 mg/m²/day in order to reduce
	possible all dust emissions.	the possibility of causing dust deposition nuisance beyond site boundary.
2	Assess and reduce where possible all site noise emissions.	Not to exceed 55 db(a) L <sub>AEq</sub> (30 minutes) during day time at noise sensitive locations in order to reduce the possibility of causing noise nuisance at noise sensitive locations beyond the site boundary.
3	Assess and improve where possible surface water and waste water emissions	Compliance with waste licence quality limits and to ensure that there are no surface water pollution incidents.
4	Assess and improve where possible groundwater quality	Compliance with waste licence quality limits and to ensure that there are no groundwater pollution incidents.
5	Increase waste recycling rates	Investigate/implement options to increase waste recycling, including brown bin collections/ organic waste recycling, onsite processing.
6	Ensure that nuisance condition do not arise on site or beyond the site boundary.	Compliance with condition 7 of waste licence 158-1
7	Install and maintain site infrastructure/Specified Engineering Works	Compliance with condition 3 and Schedule B of waste licence 158-1
8	Develop and implement a site environmental management system (EMS)	Compliance with condition 2.3 of waste licence 158-1
9	Ensure that all staff receive appropriate environmental training	Compliance with condition 2.3.2.4 of waste licence 158-1
10	Strive to maintain environmental improvements and legal obligations	To meet all legal and waste licence requirements.

# 10. Progress on Environmental Objectives in Previous AER (2015).

- 10.1 Ray Whelan Ltd established a register of Environmental Objectives & Targets for 2015 which are similar to the above Environmental Objectives & Targets set for 2016.
- 10.2 Progress on meeting the 2015 Environmental Objectives & Targets are summarised in Table 14 below.

Table 14. Progress of 2014 Environmental Objectives & Targets.

OBJECTIVES TARGETS PROGRESS				
1				
1	Assess and reduce	Not to exceed 350	This target was achieved.	
	where possible all	mg/m <sup>2</sup> /day in order to	Surveys show that dust	
	dust emissions.	reduce the possibility of	emissions did not exceed	
		causing dust deposition	$350 \text{ mg/m}^2/\text{day in } 2015.$	
		nuisance beyond site		
		boundary.		
2	Assess and reduce	Not to exceed 55 db(a)	Although noise levels in	
	where possible all	L <sub>AEq</sub> (30 minutes) during	2015 at the closest	
	site noise emissions.	day time at noise sensitive	sensitive receptor were	
		locations in order to reduce	above the licence limits,	
		the possibility of causing	there are no noise nuisance	
		noise nuisance at noise	complaints associated with	
		sensitive locations beyond	the site.	
		the site boundary.		
3	Assess and improve	Compliance with waste	There are no direct surface	
	where possible	licence quality limits and	water discharges from the	
	surface water and	to ensure that there are no	site. All site run off and	
	waste water	surface water pollution	waste water is diverted to	
	emissions	incidents.	the waste water sump prior	
			to collection and disposal	
			off site.	
4	Assess and improve	Compliance with waste	This target was achieved.

9	Strive to maintain	To meet all legal and waste	There were no reported
	environmental	licence requirements.	waste licence non-
	improvements and		conformances identified by
	legal obligations		the EPA during 2015.

#### 11. Written Site Procedures.

11.1 Ray Whelan Ltd has developed a register of written site procedures as detailed in previous AER's. These procedures are available for inspection on site if required.

#### 12. Tank, Drum, Pipeline & Bund Testing Report.

12.1 There were no tests of tanks, drums, pipelines and bunds carried out in 2015 and there are no results/data available.

#### **13.** Reported Incidents & Complaints Summary.

13.1 There were no reported or recorded incidents/complaints in relation to the operation of the facility during the reporting period.

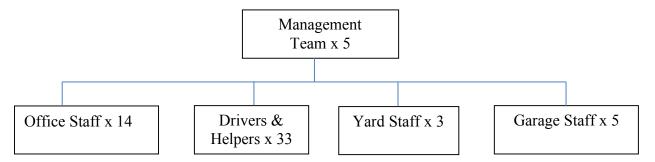

#### 14. **Review of Nuisance Controls.**

- 14.1 Ray Whelan Ltd has a written procedure (EOP 017) to monitor potential nuisance conditions at the facility in order to comply with conditions 7 and 8.8.1 of Waste Licence 158-1, including;
  - vermin
  - birds
  - mud
  - dust
  - litter
  - odours
- At a minimum of weekly intervals (or sooner if required), Ray Whelan Ltd site 14.2 staff carry out an inspection of the yard, access roads and surround area for potential nuisance conditions caused by any of the above issues.

14.3 Any potential nuisance conditions are addressed and rectified as soon as possible. Site inspections and actions taken are recorded on a weekly inspection sheet that is available at the site office for inspection if required.

# 15. Financial Provision, Management Structure & Public Information.

- 15.1 Ray Whelan Ltd management will make available all the necessary finances, resources and manpower required in order to ensure that the conditions of waste licence 158-1 are met. Furthermore, Ray Whelan Ltd management are committed to providing the necessary finances and resources in order to achieve the companys' stated Environmental Objectives and Targets.
- 15.2 Ray Whelan Ltd prepared and submitted to the Agency a comprehensive and fully costed environmental liabilities risk assessment (ELRA) in August 2005 as required by condition 12.2.1 of waste licence 158-1. The ELRA included a proposal for financial provision.
- 15.3 The management & staffing structure at Ray Whelan Ltd during 2015 is outlined below.

15.4 All information relating to the environmental performance of the facility, including emissions monitoring reports, waste licence conditions, incidents, complaints, operating procedures etc are available for public inspection at the site by prior arrangement. Furthermore, all reports, information and documents submitted by Ray Whelan Ltd to the Agency are available for public consultation and review.

# 16. Volume of Waste Water Produced and Volume Transported Off Site.

16.1 A total of approximately 948 m<sup>3</sup> of waste water was collected from the sump during 2015. The sump was emptied by a third party contractor and disposed of at Athy sewage treatment works.

# 17. Any Other Items Specified by the Agency.

17.1 There were no other items specified by the Agency during 2015 that require incorporation into this AER. This section is not applicable.

For the purposes of the National Inventory on Greenhouse Gases, landfill operators are requested to provide summary data on landfill gas (Methano) faced on Utilised on their facilities to accompany the figures for total methane generated. Operators should only report blish Nat methane (CH4) emission to the environment under T(total) KGyr for Section A: Sector specific PRTR pollutarib above, Please operate the table beigine. Additional Data Requested from Landfill operators
