

**SAFETY KLEEN IRELAND ANNUAL ENVIRONMENTAL REPORT 2015**  
**EPA LICENCE W0099-01**

---

Environmental, Health, Safety & Quality Policy

1.0 Introduction

1.1 General Description & Reporting Period

1.2 Waste Management Activities Carried Out At The Facility.

2.0 Quantity and Composition of waste received.

2.1 Total Amount of Waste Being Held at the Facility at the Time of the Report

3.0 Summary Report on Emissions

3.1 Air Emission Monitoring

3.2 Groundwater Monitoring

4.0 Environmental Management

4.1 Environmental Management Programme

4.2 Summary of Standard Operating Procedures since January 2011

5.0 Resource and Energy Consumption

6.0 Development Works carried out during the reporting period and Scheduled Works

7.0 Progress in implementing existing Environmental Objectives and Targets

8.0 Environmental Objectives and Targets for 2015

9.0 Procedures developed within the reporting period

10.0 Tank, drum, pipeline and bund testing

11.0 Reported Incidents and Complaints

12.0 Staffing Structure/Management

13.0 Financial Provision

**List of Appendices**

**Appendix 1:** Complete inventory of all waste movements into the transfer station

**Appendix 2:** Air Emission & Ground Water Monitoring Report

**Appendix 3:** Procedures Developed/amended during the reporting

**Appendix 4:** Facility Maintenance Report

**Appendix 5:** PRTR

## **ENVIRONMENTAL POLICY**

### **ENVIRONMENTAL POLICY**

#### **General Statement**

Safetykleen is an organisation committed to providing stakeholders with environmentally sound products and services, systems of work and waste disposal practices to introduce the best environmental techniques to reduce the environmental impact in the communities in which we operate.

Safetykleen is the market leader in the provision of parts washing, spraygun cleaning and waste services to the industrial and automotive sectors. The foundation of the service is the 'Closed Loop System.' Dependant on application, needs and concerns, the customer is provided with a machine employing aqueous or hydrocarbon based solvents, and a service comprising unit maintenance, supply of fresh cleaning fluid and the collection of waste fluid arising. This is either recycled or disposed of responsibly using only reputable, registered, licensed and audited operators.

We also provide a complete national service to the customer; providing advice, training, waste identification, carriage and onward disposal for the small and medium sized producer. This disposal will follow the accepted 'Waste Hierarchy' and 'Best Practice' where practicable, in addition to full compliance with applicable current legislation and regulations.

#### **Objectives**

A key objective of the company is to reduce dependence on fossil fuels by the use of recycled solvent, aqueous based fluids and the sustainable disposal of waste materials. This strategy has wide industry acceptance and not only helps to reduce our impact on the environment, but that of our customers. This is a key differential in our company's service to the customer.

Safetykleen is committed to the continual improvement of its environmental performance, including the prevention of pollution, as defined in the company's register of environmental aspects, and intends to achieve this by setting clear environmental objectives and targets and regularly monitoring progress against them.

#### **Philosophy**

Our philosophy relating to research, development, design and operation of products, plant and equipment is to consider the environmental impacts of these processes and, where practicable, work to improve our environmental control measures and minimise these impacts.

#### **Safetykleen will:**

1. Manage its activities internally, and in relation to our customer services in ways that conserve and protect the environment in a socially responsible manner. This is achieved by operating a documented management system that fully complies with the requirements of ISO9001 and ISO14001, as well as all applicable and pending Health & Safety and other legislation.
2. Promote environmental awareness throughout our employees, suppliers and customers and, where relevant, make them aware of the potential environmental impacts of their activities via suitable training and the provision of information and advice.
3. Carry out regular audits of identified aspects of the company's business to ensure compliance with this policy and associated procedures.
4. Ensure that this policy is understood, implemented and maintained at all levels throughout the company.
5. Provide public access, on request, to information on the company's environmental performance.

#### **Safetykleen's ISO14001:2004 registration is to the following scope:**

1. The supply, waste removal and replenishment of recycled solvents, which are used in machines provided for the degreasing and cleaning of component parts and equipment.
2. The design, construction and supply of machines and related equipment intended to be used for automated or manual cleaning processes using liquids.
3. The supply of ancillary products (such as absorbent socks) for liquid spill cleanup and subsequent collection and disposal of associated wastes.
4. Collection of drummed and bulk wastes, including oils, for onward transport to third parties for processing or disposal

Signed   
**Graham Webb**  
UK Operations Director

Date 14<sup>th</sup> August 2014.....

## 1.0 INTRODUCTION

### 1.1. General Description & Reporting Period

Safety Kleen Ireland's facility is located in it 5 Airton Road, Tallaght, Dublin 24. This site is licensed since 1999. The site acts as a hazardous waste transfer station and is the hub of the company's specialised waste services to the automotive, industrial and Medical sectors.

This document comprises the Annual Environmental report as required by Condition 2.8 and schedule C of the company's waste Licence ( W0099-01).

#### **Reporting Period:**

This Report covers the period 1st January 2015 to 31st December 2015

### 1.2. Waste Management Activities carried out at the Facility

Licensed waste disposal activities in accordance with the Third Schedule of the Waste Management Act 1996

Class 13: Storage prior to submission to any activity referred to in a preceding paragraph of this Schedule, other than temporary storage, pending collection, on the premises where the waste concerned is produced.

Specific wastes applicable are aqueous waste, card/ board / dry wastes

Licensed waste recovery activities, in accordance with the Fourth Schedule of the Waste Management Act 1996

Class 13: Storage prior to submission to any activity referred to in a preceding paragraph of this Schedule, other than temporary storage, pending collection, on the premises where such waste is produced.

Specific wastes applicable include:

- a) Kerosene
- b) Paint Related Material
- c) Xylene
- d) Oil Filters
- e) Flammable Solid material
- f) Aqueous Degreasers
- g) Misc

**2.0 Quantity and Composition of waste received, disposed of and recovered during the reporting period and previous years.**

**See Appendix 1**

Appendix 1 provides a complete inventory of all waste movements into the transfer station in 2015. Table 1 below summarizes the annual waste inward to the transfer station over the last 5 years (2011-2015). The total annual waste received for 2015 was 212,162kgs or 212.162 tonnes.

**Table 2.1 Inward and subsequent outward waste movements 2011-2015.**

Waste Stream	Destination	2011	2012	2013	2014	2015
Kerosene	Tradebe Ltd	99,502	91,8142	79,651	74,104	72,078
Xylene	Veolia	31,582	30,282	24,931	26,230	29,287
Paint Waste	Veolia	18,469	17,389	18,364	22,717	18,830
Solid Waste	Veolia	15,442	17,665	12,876	20,706	20,902
Aqueous Cleaner	Enva	44,400	37,662	34,471	16,525	50,086
Oil Filters	Enva	23,000	21,141	11,640	10,440	20,400
Aerosols	ATM	0	714	0	0	0
Printing Ink	ATM/Veolia	497	693	348	0	579
Misc.	ATM	0	0	3,450	0	0
Petroleum Distillers	ATM	697	870	400	0	
Adhesives	ATM	3522	0	0	0	0
Corrosive Liquid	ATM	319	0	0	0	0
Acetone	ATM	0	0	220	0	0
Toxic Liquids	ATM	1,227	0	100	0	0
<b>Total</b>		<b>238,657</b>	<b>218,258</b>	<b>186,451</b>	<b>170,722</b>	<b>212,162</b>

**Table 2.2 Total amount of waste currently being held at the facility**

WASTE TYPE	DRUM NUMBERS & VOLUME	TOTAL QUANTITY ( KG )
Kerosene	BULK	22,000
Paint / Thinners	34 x 25ltr drum 23x 205ltr drum	5,565
Xylene	209 x 25ltr drum	5,225
Oil Filters	205ltr bins x 12	2,460
Aquakleen	25 x 25ltr drum	625
Flammable Solid	205ltr drum x 28	5,740
Misc	Mixed Fuel x 1 205ltr drum	205

### 3.0 Summary Report on Emissions

No environmentally significant emissions were made during the reporting period. All waste storage areas are within the roofed and bunded site building and therefore storm water contamination is not likely to occur and any surface contamination through leaks or spillage's may be promptly cleaned up using absorbent materials stocked on site. Details of the most recent environmental monitoring for Air, and Ground water are provided below and in Appendices 2 and 3.

#### 3.1 Air Emission Monitoring

The results of air monitoring carried out at the facility on the 06 January 2016 by Fitz Scientific are provided in Appendix 2. The survey protocol is also provided here.

##### Sampling and Analysis Methods

##### Interpretation:

Results show the concentrations of Class A and Class B compounds and Total Organics to be very comfortably within the licence levels. The Class A value was <0.03/Nm<sup>3</sup> which was comfortably the 2 mg/m<sup>3</sup> level set by the licence. The Class B value was also <0.05mg/Nm<sup>3</sup> which was well under the 20 mg/m<sup>3</sup> level set by the licence.

The table below summarises the air emission trends for the last 5 years.

**Table 3.1 Air Emission Trends**

Parameter	Emissions Limit (mg/Nm <sup>3</sup> )	2011	2012	2013	2014	2015
VOC Class A	2	<3.5	<0.166	<0.83	<0.83	<0.4
VOC Class B	20	1.7	<0.166	<0.83	<0.83	<0.3
Organics as C	50	<3.5	<1	<0.83	<0.83	<0.5
Volumetric Flow	n/a m <sup>3</sup> /h					422.8
Particulates –blank						<0.4

### **3.2 Groundwater Monitoring**

Fitz Scientific, carried out a ground water quality-monitoring programme on behalf of Safety Kleen. Appendix 3 comprises the results of the water sampling carried on The 06-01-2016.

#### **Interpretation:**

Due to the nature of wastes stored at the facility analysis focused on the potential presence of Volatile Organic Compounds (VOC's). In the main, results show that VOC's were detected in the range of 1 to 10 µg/L. The licence set no limits however the reporting requirement is to quote groundwater results in mg/l. In this format our results are between one thousandth and one hundredth mg/l.

#### **Trends:**

**No discernible trends have become apparent since monitoring began at the site**

### **4.0 Environmental Management Programme**

The Environmental Management Programme for the reporting period has been previously submitted to the agency. The Transfer Station achieved ISO14001 – 2004 standard. Safety Kleen Dublin had its most recent internal audit in August 2011. A copy of the Environmental Management Manual is available upon request.

### **5.0 Resource and Energy Consumption**

Energy utilised is solely electricity, for heating and lighting, and wringing of office, canteen and plant equipment such as the air compressor. The total usage in 2015 was 24,511. water consumption is restricted to 'domestic' use from the kitchen and toilet facilities on site, and for the formulation of an aqueous product. Currently both uses are not metered separately.

### **6.0 Development Works carried out during the reporting period and scheduled work**

Development works completed in 2015 of the external fire and water retention bunds as requested by the EPA.

## 7.0 Progress in implementing existing Environmental Objectives and Targets

Table 7.1 Progress in implementing Objectives & Targets for 2015

### Health, Safety, Environmental & Quality Objectives and Targets 2014

1. Ensure 100% review of all DSE assessments within SafetyKleen for both Laptop and Desktop users.
2. Ensure all EHS data is received by the HSEQ team (Jayne Walker) by the Wednesday following the end of the period. Entered on to the Multi Dashboard and submitted to the Operations Director by the end of the Friday Wk1, *this information will be submitted to the Board the week following the submission.*
3. Reduce the Current AFR 1.22 by 30% to 0.85 by the end of 2014.
4. Reduce the number of Branch based consignment note NON CONFORMITIES by 20% by the end of 2014.
5. Log all spill information and target areas of concern campaign to begin Q1 2014.
6. To Increase the visibility and engagement of Senior Management each to complete housekeeping log inspection when they visit a Branch or Depot.
7. To roll out a training package (8Days) to all FA's that will give them a formal certificate (Internal) of competence in FMIR audits.
8. Enter Customer feedback information on to a central data sheet, review scores and comments provided by client and improve overall scores by 10% by the end of 2014

## **8.0 Environmental Objectives and Targets for 2015**

Our HSEQ department have advised that new objective & targets for 2015 are still in review. A number of those listed for last year are part of longer 3 year rolling projects so they will continue to be worked on.

## **9.0 Procedures developed within the reporting period**

The following procedure was developed during the reporting period: (Appendix 4 contains the full procedure).

SKI\_BWI\_01 Procedure

## **10.0 Tank, drum, pipeline and bd testing**

The tank, drum, pipeline and bd testing inspection reports are included as annex 5.

## **11.0 Reported Incidents and Complaints**

There have been no other incidents or complaints within the reporting period.

## **12.0 Staffing Structure/Management**

The management structure of the company has not changed during the reporting period. Philomena Freegrove (Facility Administrator) reports to Ceri Davies & David Birtwistle.

## **13.0 Financial Provision**

The Financial provision as per the *Closure, Restoration, Aftercare Management Plan* was submitted to the agency in 2012.

## **APPENDIX 1**

### **Quantity and Composition of waste received in the facility**

**TWI 6 – Procedure relating to Vehicle Servicing, Maintenance, Repairs, and Safety Inspections****1. Introduction**

This work instruction describes all the requirements and an activity associated with vehicle servicing, maintenance, repairs, and safety inspections and is to be carried out on all Safety-Kleen vehicles.

**2. Responsibility**

- The Driver is responsible for checking the vehicle and notifying the Branch Manager of any defects. The Branch Management must ensure their vehicle is available for service and inspection.
- The Facility Administrator is responsible for checking that this work is carried out on all vehicles at the branch location and that records are kept.
- A Maintenance Wall Chart must be displayed and used to schedule these activities.
- The Distribution Fleet Administrator, Dinnington is responsible for checking that this work is carried out on all vehicles at this location and that records are kept.
- A Maintenance Wall Chart must be displayed and used to schedule these activities.
- The Branch Fleet Administrator monitors and oversees the whole fleet and all work carried out.

**3. Scope**

This procedure relates to the following steps

- 1) Vehicle servicing
- 2) Vehicle safety inspections

**4. General Requirements**

- 4.1 Filing cabinet drawer specifically for the retention of transport files. Separate files must be held for each vehicle, with the oldest vehicle held at the rear most point, working forward to the most recent.
- 4.2 Files must contain all relevant documentation relating to the vehicles, which include:
  - i. Relevant Safety Inspection sheets.
  - ii. Service sheets
  - iii. Daily Vehicle Defect Reports. (These are now kept in separate files within the office)These must be retained in date order with the most recent placed in front.
- 4.3 A separate file containing general transport related documents must be placed in front of the vehicle files.
- 4.4 A copy of all Maintenance Agreements made between Safety-Kleen and each of its suppliers assigned to carry out preventative Safety Inspections must be retained on file, (Operators Licensed vehicles requirement). These agreements must be signed and stamped by both the supplier and The Safety-Kleen Transport Manager.

**5. Detailed Instructions****5.1 Vehicle Servicing**

- 5.1.1 All vehicles must be serviced according to the chart included within this works instruction. An allowance of 1000 miles, or 1,600 kilometres, or one month is acceptable either side of the due mileage/date, wherever appropriate. Any exceptions must have approval of the transport department.
- 5.1.2 Copies of service sheets must be fully completed on each and every occasion and stamped and signed by the servicing agent.
- 5.1.3 Service sheets must be filed in the relevant vehicle file with a copy of the invoice (Invoices are now retained by Fraikin) and retained for a minimum of 15 months and remain in place for this period after the vehicle has been disposed of.
- 5.1.4 When a vehicle is transferred to any other location within the company, the complete vehicle file must accompany the vehicle to the new location.

**5.2 Vehicle Safety Inspections**

- 5.2.1 Safety Inspections must be carried out for all vehicles in excess of 3500KG gross vehicle weight every six weeks.
- 5.2.2 Safety Inspections must not be given a lower priority than operational needs and should follow a set pattern, as these are the core of any roadworthiness maintenance system.
- 5.2.3 The Safety Inspection pattern must be detailed giving the current year's schedule on the company approved wall planner.
- 5.2.4 When a vehicle becomes due for a Safety Inspection, this must be booked with the supplier well in advance, to ensure the required date is fulfilled. Fraikin scheduling team e-mail all branches the Safety Inspection schedule on the 15<sup>th</sup> of the preceding month.
- 5.2.5 The service agent must use the approved Safety Inspection document when the vehicle is Safety-Kleen Owned. Manufacturer-approved documents must be used for contract hired vehicles.

5.2.6 These documents must be sent to Fraikin as per the agreement between Fraikin and the service provider. All documents are scanned on the Fraikin Document Library.

<http://coex.fraikin.co.uk/contentexplorer/tree/TreeView.jsp?type=omnilink&serverName=Document+Repository&id=CUSTOMER&do=open>

> Username is: Safe00  
> Password is: FR0824

5.2.7 The inspection report must show the following:

- i. Name of operator – Safety-Kleen UK Ltd.
- ii. Date of inspection and signature or initial of tester.
- iii. Vehicle identity.
- iv. Odometer reading.
- v. A list of all items inspected.
- vi. An indication of condition of each item inspected.
- vii. Details of any defects found.
- viii. Name of the inspector.
- ix. Details of any repair work and by whom it was done.
- x. Statement that any defects have been repaired satisfactorily.
- xi. Brake performance check has been completed.

5.2.7 Any sheet found not to be completed, must be brought to the attention of the supplier and corrected immediately.

5.2.8 Safety Inspection sheets must be filed in the vehicle file, which should also show any remedial work, carried out.

5.2.9 Vehicle inspection sheets must be retained on the vehicle file for a minimum period of **15 months** and must remain in place for the same period, after the vehicle has been disposed.

6.2.10 When a vehicle is transferred to any other location within the company the maintenance file must accompany the vehicle.

5.3 Vehicle Servicing and Safety Inspections

Safety Kleen (Ireland) Ltd.  
Unit 5, Airton Road, Tallaght, D24

## Bund Integrity Test Report

Report Date

24<sup>th</sup> May 2014

KD Environmental

1 Swiftbrook Glen, Virginia, Co. Cavan

Report No 2014/29/01

## 1.0 Introduction

KD Environmental were commissioned by Philomena Freegrove of Safety Kleen (Ireland) Ltd. to conduct an inspection and integrity test of the main solvent storage bund at their waste facility site in Tallaght, Dublin 24. A Hydrostatic water test and visual inspection of the bund was performed on 14<sup>th</sup> and 15<sup>th</sup> May 2014.

A previous hydrostatic test performed in January 2014 had failed. Safety Kleen undertook repairs to the bund, namely relining areas of the bund floor with an epoxy resin.

The Safety Kleen facility is situated in a small industrial/business park off Airton Road, Tallaght, Dublin 24. Surrounding land use is light industry/commercial and residential. The exact site location is N 53°17.576', W 006°21.283'.

Safety Kleen is required to perform integrity test on bund structures at least every 5 years under condition 4.8 of EPA waste license W0099-01 However, schedule D.1 requires for 3 yearly reporting on bund integrity.

## 2.0 Bund Details

The bund integrity tested was the main chemical storage bund used for the containment of clean and waste solvents/chemicals stored in 2 x 36m<sup>3</sup> metal tanks. It is a local bund and is made of poured concrete on three sides and concrete blocks on one side. The floor of the bund is poured concrete. The wall and floor of the bund is coated with an epoxy resin based paint. The total bund volume was measured to be 36m<sup>3</sup>.

## 3.0 Integrity Test Procedures

Bund integrity/water tightness test was performed following the procedure defined in the Environmental Agency (of England and Wales) R&D Technical Report P16. Testing also adhered to the EPA Guidance Note on Storage and Transfer of Material for Scheduled Activities, 2004.

A 24 hour hydrostatic test period was used for the bund tested.

A work plan was drawn up which detailed necessary preparatory work to be carried out by the company before testing could proceed. This included clearing the bund of any rubbish, debris etc. and raising of electrical equipment where necessary.

Bunds were filled using water services on site to required test fill depth at a fill rate not exceeding 2m/24Hrs. A hydrostatic stabilisation period of 24 hours was allowed as the bund is not newly constructed.

Water fill levels were measured using a meter stick and tape measure. A number of water depth measurements were made for the bund. The measurement locations were marked which allowed for the exact same location to be measured after the 24 hour test period.

A reference vessel containing a premeasured level of water was placed on the bund wall. After the test duration had elapsed, the water fill levels were then re-measured to determine if any water loss had occurred. The level in the reference vessels were also measured to gauge for rainfall or evaporation changes.

#### 4.0 Results & Compliance

An EPA bund test sheet is completed for the bund test performed and included as appendix 1 of this report. No water loss was recorded at the 3 measurement locations on the bund. No water loss was recorded in the control vessel – no evaporation of water occurred. Therefore, the bund is water tight and has passed a hydrostatic test. The repairs to the bund that Safety Kleen were successful in rendering the bund water tight and the bund is compliant with condition 4.8 of EPA waste license W0099-01.

#### 5.0 Conclusion

The bund tested passed a 24 hour hydrostatic test based on the EPA Guidance Note on Storage and Transfer of Material for Scheduled Activities, 2004.

A visual inspection of showed no seepage around the bunds outer walls and the bund is in good condition with no breaks or cracks noted.

David Kelly BSc. PgDip

Technical Manager  
KD Environmental

24<sup>th</sup> May 2014
