Proposed Alteration Description

Condition 8.11.6 of W0167-03 expressly states that metals for recycling which have been recovered from bottom ash must be stored within the bottom ash hall. Indaver has previously received agreement to store these metals for short periods of time within the tipping hall at the site periodically. However this is not allowed for within the condition. Indaver request that the metal be stored in alternative locations to the bottom ash hall. This is to ensure sufficient storage capacity on site and also to relieve a safety issue in relation to a container being stored in the bottom ash hall which blocks a pedestrian access/fire exit. Indaver request that these metals, ferrous and non ferrous, be stored in any appropriate location on site e.g anywhere within the process building, and also including outdoors of the process buildings but within covered containers e.g. shipping containers, covered skips, large FIBC bags etc.

Priority	2. High
Category of Amendment	(b) Facilitating the doing of any thing pursuant to a condition attached to the licence where the doing of that thing may reasonably be regarded as having been contemplated by the terms of the condition or the terms of the licence taken as a whole but which was not expressly provided for in the condition

Licence Condition Changes

Condition / Schedule Reference	Current Condition / Schedule Wording	Suggested New Wording
8.11.6	Condition 8.11.6 Metals for recycling that are recovered from the bottom ash shall be stored at a dedicated area within the bottom ash handling building on concrete hardstanding with contained drainage.	Condition 8.11.6 Metals for recycling that are recovered from the bottom ash shall be stored in an appropriate location either within the process building or in covered units e.g. shipping containers, fibc's, skips etc within the facility's boundaries.
