ENVIRONMENTAL LICENSING PROGRAMME MEMORANDUM

TO:	Dara Lynott, Director
C.C:	Frank Clinton
FROM:	Brian Meaney - Environmental Licensing Programme
DATE:	20 June 2016
RE:	Request for a Technical Amendment to IE Licence Register Number W0167-03 held by Indaver Ireland Limited for a facility at Carranstown, Duleek, Co. Meath.

Introduction

Indaver Ireland Ltd is authorised to incinerate waste at Carranstown, Duleek, Co. Meath in a waste to energy installation that generates electricity. The facility was first authorised under a waste licence in November 2005. The waste licence was reviewed in February 2011. The waste licence was amended in December 2013 for the purposes of the Industrial Emissions Directive. The Industrial Emissions licence was reviewed in June 2015. Up to 235,000 tonnes per annum of waste (including up to 10,000 tonnes of hazardous waste) can be accepted at the facility.

Details of request for technical amendment

Condition 8.11.6 of the licence stipulates that metals for recycling that are recovered from the bottom ash must be stored within the bottom ash handling building. The licensee would prefer the flexibility of being able to store the metals for recycling in other appropriate locations within the installation boundary, including outdoors.

There were no detailed technical proposals provided with the technical amendment request. However it is considered appropriate that some flexibility is allowed. It is proposed that the provisions of condition 8.11.1 be replicated in condition 8.11.6. Condition 8.11.1 allows for bottom ash to be stored in buildings other than the ash handling building, subject to the Agency’s agreement.

A screening for appropriate assessment was carried out and is documented in the proposed Technical Amendment and the Appropriate Assessment Screening Determination that accompanies this report.

Recommendation

I recommend that the Agency make a technical amendment of licence register number W0167-03 under Section 96(1)(c) of the EPA Acts 1992 as amended.

Signed:

Brian Meaney
