Dear Malcolm

**Re: Greenstar Sligo EPA Licence Amendment Request Q3**

I am writing to you in relation to item Q3 of the EPA Licence Amendment Request for existing Waste Licence W0058-01, which states "If 'Yes' for an Industrial Emissions Licenced activity, please provide evidence that an equivalent level of protection for the environment as a whole is guaranteed (section 86A (8))". I confirm that the proposed amendment to the existing Waste Licence W0058-01 will not cause a detrimental effect to the environment or decrease in effluent quality from the wastewater treatment plant. Following discussions with Irish Water we have been informed that the wastewater treatment plant has adequate spare capacity to receive the additional flows proposed in this Licence Amendment Request and the plant will provide an equivalent level of protection to the environment and will not lead to higher levels of pollution in the environment.

Yours Sincerely

**Niamh O'Malley**
