Re: Proposed Technical Amendment to Licence Reg. NO. W0217-01

Dear Michelle,

In relation to the Agency's proposed technical amendment to our licence (Reg. NO. W0217-01) we would like to point out that these changes do not apply to our licence as we are not processing MSW.

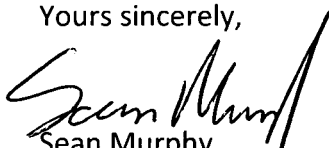

Furthermore the main waste we process is mixed dry recyclables and many points within the proposed technical amendment would be very difficult or if not impossible to implement for segregated loose or bailed recycling.

While we received this consultation letter on the 13th of April 2016 with a response required by the 22nd of April 2016, we feel this time period is too short for such a sizable amendment as this to our licence.

We therefore request the Agency grant a further extension to the consultation period to allow us to gather further information and clarifications on these proposed changes.

The IWMA has also requested a meeting with the Agency on behalf of its members who will be effected by these proposed technical amendments and we will be in a better position to make an informed submission following this meeting.

Yours sincerely,

Sean Murphy
