Clerical or Technical Amendment Application Details

Proposed Alteration Description

The Licensee is seeking an increase in inert soil waste intake for recovery from a current maximum of 750,000 tonnes per annum to 1,500,000 tonnes per annum. The Licensee has identified a significant market demand for soil recovery capacity in the Greater Dublin area. This is being generated by increasing levels of activity in the construction and development sectors driven by both public infrastructure works and Foreign Direct Investment (FDI)(e.g. LUAS, Children's Hospital, Facebook data centre). There is limited available soil recovery capacity in the Greater Dublin area to meet current and predicted levels of demand from Q3 2016 onwards. The lack of available capacity has the potential to delay commencement of major infrastructure and inward investment projects.

Priority	3. Urgent
Category of Amendment	(c) Otherwise facilitating the operation of the licence (or certificate) and the making of the amendment does not result in the relevant requirements of section 83(5) of the EPA Act as amended/ section 42B(1) of the Waste Management Act as amended/environmental requirements ceasing to be satisfied
