Conditions

3.29 Delete condition 3.29.

5.8 Insert a new condition to read as follows: ‘The licensee shall prepare and report on an air dispersion model that evaluates the ground level concentration of relevant pollutants arising from operation of the standby boiler (AD and pasteurisation plant) in the vicinity of the installation. The model shall take into consideration the following:

- Air Dispersion Modelling from Industrial Installations Guidance Note (AG4);
- the cumulative impact of the boiler emissions combined with other emissions to air from the installation;
- relevant air quality standards; and
- relevant provisions including limit values set out in the Medium Combustion Plant Directive (2015/2193).

The report shall be submitted to the Agency within three months of the date of grant of this licence. The report and the assessment shall be to the satisfaction of the Agency.’.

5.9 Insert a new condition to read as follows: ‘The standby boiler shall not be operated without the agreement of the Agency.’.
