**Re. Proposed use of Building 1 at Eras Eco for MSW transfer**

Dear Mr Dee

I refer to the meeting held between representatives of Eras Eco and the Agency on the 18<sup>th</sup> October 2011, and to your proposal to accept Municipal Solid Waste (MSW) at Building 1 of your waste licensed facility, W0211-01. The Agency notes that the proposed acceptance of MSW relates specifically to its bulking up and transfer only (as opposed to its treatment by mechanical segregation or by other means), and that additional odour control measures have now been put in place in that building (e.g. additional sealing of the building envelope, and provision of a new air handling and odour abatement system).

Based on the information provided, and subject to the Agency's requirements as outlined in previous correspondence on the use of Building 1 (e.g. GC05CN issued on 4/4/11), the Agency now agrees to the use of Building 1 for the acceptance and transfer of MSW.

In summary, the Agency has agreed to the following uses of Building 1 under waste licence W0211-01:

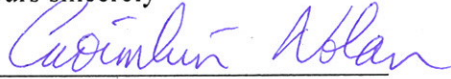

- the acceptance and transfer of MSW,
- the temporary storage of low odour sludges,
- the lime stabilisation of sewage sludge,
- the bulking up/transfer of Commercial Waste, and
- the storage/processing of waste wood/woodchip.

I wish to remind you of the obligations under the present licence with regard to the control of odour emissions from the facility, and should the Agency consider that the new air handling and odour abatement system for Building 1 is insufficient to control odour emissions adequately, the Agency may require additional odour control measures to be taken.

Should you have any queries relating to this matter, please contact the undersigned and quote the above reference in any future correspondence.

Yours sincerely

Mr. Caoimhín Nolan, Inspector  
Office of Environmental Enforcement

10<sup>th</sup> February 2012

Our Ref: W0211-01/AK06CN

Dear Mr Dee

I refer to your proposal received on the 3<sup>rd</sup> February 2012 in relation to the acceptance and bulking up of farm plastics. Based on the information provided, the proposal is to the satisfaction of the Agency subject to the following:

- The farm plastics (including baled plastics) will only be handled and stored indoors to prevent any run-off from entering outdoor storm water drains, and,
- compliance with the requirements of your waste licence (W0211-01).

Please quote the above reference in future correspondence in relation to this matter.

Yours sincerely

Mr. Caoimhín Nolan, Inspector  
Office of Environmental Enforcement
