TECHNICAL AMENDMENT C  
To  
INDUSTRIAL EMISSIONS LICENCE

<b>Licence Register Number:</b>	W0165-02
<b>Company Registration Number:</b>	529259
<b>Licensee:</b>	Ballynagran Landfill Limited
<b>Location of Installation:</b>	Ballynagran, Coolbeg and Kilcandra, County Wicklow

## ***Reasons for the Decision***

The Environmental Protection Agency is satisfied, on the basis of the information available, that subject to compliance with the conditions of licence Reg. No. W0165-02 granted on 23/3/2010 and amended on 02/08/2011, 15/1/2013 and 20/12/2013 as well as any amendments noted herein, any emissions from the activity will comply with and not contravene any of the requirements of Section 83(5) of the Environmental Protection Agency Act 1992 as amended.

A screening for Appropriate Assessment was undertaken to assess, in view of best scientific knowledge and the conservation objectives of the site, if the activity, individually or in combination with other plans or projects is likely to have a significant effect on any European Site. In this context, particular attention was paid to the European Sites at Magherabeg Dunes SAC (Site Code: 001766), Deputy's Pass Nature Reserve SAC (Site Code: 000717), The Murrough Wetlands SAC (Site Code: 002249), The Murrough SPA (Site Code: 004186), Vale of Clara (Rathdrum Wood) SAC (Site Code: 000733), Buckronev Brittas Dunes and FEN SAC (Site Code: 000729).

The activity is not directly connected with or necessary to the management of any European Site and the Agency considered, for the reasons set out below, that it can be excluded, on the basis of objective information, that the activity, individually or in combination with other plans or projects, will have a significant effect on any European Site and accordingly determined that an Appropriate Assessment of the activity was not required.

The reasons for which the Agency determined that an Appropriate Assessment of the proposed activity is not required are as follows:

- The installation is not located within the above listed European Sites.
- There are no emissions to water courses from the installation and there will be no change on foot of the proposed technical amendment.
- There are no emissions to groundwater from the installation and there will be no change on foot of the proposed technical amendment.
- Storm water is passed through an oil interceptor before being collected on site in a lined surface water lagoon.
- Controls are in place to prevent discharge of contaminated storm water from the surface water lagoon.
- The activity will not result in damage to, or loss of, species and habitats of these European Sites.
