Recommendation

Based on your responses to the forgoing questions the recommended option is for you to submit a 'Request Licence Amendment' for this proposed alteration.

To submit this request to the EPA you should locate it in the 'Request Alteration' area in LMA. Click on 'Proceed' against this saved request, and then click on the 'Request Licence Amendment' button (in STEP 2 of the process). Then you will be required to provide more detailed information about your proposed amendment.

Note: The responses you have provided in this Screening Report will form part of the information record if you decide to proceed with this alteration request.

Proposed Alteration Description

We have proposed 3 changes:
 1. Change to Condition 5 - add Condition 5.18 - for the control of ash waste residues. This new Condition 5.18 mirrors the content of an existing Condition 5.8 for asbestos waste, and is intended to provide adequate operational measures to ensure protection of the environment;
 2. Change Schedule A1 – A waste type compatible with the facility has been added, namely ash waste residues (and two associated List of Waste Codes).
 3. Change to Schedule D – add Table D.9.1 - Additional air monitoring which again mirrors monitoring requirements for the asbestos waste stream to establish air quality in the waste transfer building.

Priority	3. Urgent
-----------------	-----------

Category of Amendment	(b) Facilitating the doing of any thing pursuant to a condition attached to the licence where the doing of that thing may reasonably be regarded as having been contemplated by the terms of the condition or the terms of the licence taken as a whole but which was not expressly provided for in the condition
