Environmental Licensing Programme Memorandum

To: Dara Lynott, Director
FROM: Brian Meaney, Senior Inspector
C.C: Frank Clinton, Programme Manager
DATE: 24 January 2017
RE: Industrial Emissions Licence Amendment

Section 76A(9) of the WMA 1996 as amended requires that all licences issued under the earlier Part V (of the Waste Management Acts) be examined by the Agency with a view to determining whether they address the provisions of the Industrial Emissions Directive. The Agency must then either: (i) declare that the licence does not require amendment; (ii) amend each licence that provides for the carrying on of an IED activity (for new activities specified in the IED, that were not previously covered by the IPPC Directive) to bring the licences into conformity with the IED; or (iii) if the licence cannot be brought into conformity with the IED by amending the licence, declare that a review of that licence may be required.

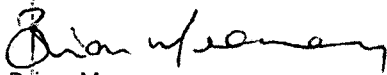

The required examination has been made to the licence listed below and a recommended amendment has been drafted. The amendment has been made using the 'IE licence amendment template' previously detailed and approved in a memo dated 5 November 2015.

Licence register number	Licensee	Details of installation
W0283-01	Bord na Móna plc	Drehid Mechanical Biological Treatment Facility, In the townlands of Coolcarrigan and Drummond, Carbury, County Kildare.

Recommendation

I recommend that the Industrial Emissions Licence Amendment for the above named licence is issued.

Signed

Brian Meaney
